**2.1.3. Transport**

(T)

**Tandem Switched Transport**

Tandem-Switched Transport consists of the circuits used in common by multiple customers from the LEC's access tandem to the Telephone Company's end office. The Tandem-Switched Transport Rate includes a Tandem-Switched Transport – Termination rate, a Tandem-Switched Transport rate and a Shared Multiplexing rate as follows:

1. The Tandem-Switched Transport – Termination element is a usage rated, per minute Rate to recover costs incurred at the ends of the transmissions links.
2. The Tandem-Switched Transport element is usage rated and distance-sensitive, i.e., a per access minute per airline mile rate. The rate recovers costs of the transmission facilities, including intermediate transmission circuit equipment, between the end-points of the circuits.
3. For Tandem Switched Transport, a Shared Multiplexing Rate will be assessed to all minutes of use between the LEC's Access Tandem to the Company's end office. The Shared Multiplexing rate recovers multiplexing costs on the end office side of the tandem.
