RE: Docket #EW-2019-0002

Chairman Hall and Commissioners:

Senate Bill 564 which passed by the Missouri General Assembly this session and became law requires electrical corporations to make available solar rebates to Missouri customers beginning January 1, 2019. The law as established in Section 393.1670 RSMo of the bill did not address the disbursement process for the rebates. It is my understanding the Commission is now considering a rule in Docket #EW-2019-0002 to establish those provisions. I would like to take this opportunity to submit the following suggestions for the implementation of the solar rebate rule:

- No more than 25% of the available rebates be directed to low income areas in any one year.
- Unused rebates shall roll-over to a pool for use by Missouri customers the following year in addition to the predetermined amount in the pool.
- Low income areas are to be defined using the economic census map used in the Historic Tax Credit bill passed by the Missouri General Assembly in the 2018 session.

Please do not hesitate to contact me if I can further facilitate with the establishment of Missouri's solar rebate rule.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason R. Holsman".

Jason R. Holsman
State Senator
