OF THE STATE OF MISSOURI**

In the Matter of the Application of The)
Cathedral Square Corporation, a Missouri)
Non-Profit Corporation, For a Variance)
from Kansas City Power & Light) Case No. EO-2012-0141
Company's General Rules and Regulations)
Requiring Individual Metering)

**KANSAS CITY POWER & LIGHT COMPANY'S NOTICE OF CORRECTED
REBUTTAL TESTIMONY OF TIM M. RUSH**

COMES NOW Kansas City Power & Light Company ("KCP&L") and for its Notice of Corrected Rebuttal Testimony of Tim M. Rush states as follows:

1. On March 14, 2012, KCP&L filed the Rebuttal Testimony of Tim M. Rush.
2. KCP&L has discovered that Schedule TMR-1 filed on March 14, 2012 is incorrect. Schedule TMR-1 should have been KCP&L's Medium General Service tariff, Sheet No. 10. KCP&L's Medium General Service – ALL ELECTRIC (FROZEN) tariff, Sheet No. 18 was attached. This is a frozen tariff and therefore is unavailable and incorrect.
3. KCP&L is filing herewith a corrected Schedule TMR-1 of the Rebuttal Testimony of Tim M. Rush.
4. KCP&L is filing herewith a corrected page 4 (lines 10-11) of the Rebuttal Testimony of Tim M. Rush which originally, and incorrectly, also referenced the frozen tariff.

WHEREFORE, KCP&L respectfully provides its Notice of Corrected Rebuttal Testimony of Tim M. Rush.

Respectfully submitted,

/s/ Roger W. Steiner

Missouri Retail Service
For Area

MEDIUM GENERAL SERVICE Schedule MGS

AVAILABILITY:

For electric service through one meter to a customer using electric service for purposes other than those included in the availability provisions of the Residential Service Rate Schedule. At the Company's discretion, service may be provided through more than one meter where it is economical for the Company to do so.

For electric service through a separately metered circuit for water heating connected prior to July 9, 1996.

For secondary electric service through a separately metered circuit for existing customers for electric space heating purposes. Electric space heating equipment may be supplemented by or used as a supplement to wood burning fireplaces, wood burning stoves, active or passive solar heating, and in conjunction with fossil fuels where the combination of energy sources results in a net economic benefit to the customer. Electric space heating equipment shall be permanently installed, thermostatically controlled, and of a size and design approved by the Company. In addition to the electric space heating equipment, only permanently installed all electric equipment, used to cool or air condition the same space which is electrically heated, may be connected to the separately metered circuit.

Service will not be supplied where the ultimate use is primarily for residential purposes.

Standby, breakdown or supplementary service is available under this schedule if the customer seeking such service first enters into a special contract which includes technical and safety requirements similar to those required for qualifying facilities in 4 CSR 240-20.060(2)(C). These requirements, and the associated interconnection costs, shall be reasonable and assessed on a nondiscriminatory basis with respect to other customers with similar load characteristics. Temporary service supplied under this schedule will be connected and disconnected in accordance with the General Rules and Regulations.

The Separately Metered Space Heat rate of this schedule is available only to Customers' physical locations currently taking service under such Separately Metered Space Heat rate and who are served under such rate continuously thereafter.

APPLICABILITY:

Applicable to multiple-occupancy buildings when the tenants or occupants of the building are furnished with electric service on a rent inclusion basis.

This rate also will be applied to the combined use of a customer at the premise where two or more classes of service (such as one-phase and three-phase services) to the customer at such premise are measured by separate meters, but only in the case of such customers connected prior to May 5, 1986. Monthly Maximum Demand will be computed as the sum of the individual meters' monthly maximum 30-minute interval demand at each service. Customers with more than one class of service connected on or after May 5, 1986 will be billed separately for each class of service.

TERM OF CONTRACT:

Contracts under this schedule shall be for a period of not less than one year from the effective date thereof, except in the case of temporary service.

January 1, 2008

Schedule TMR-1

FILED
Missouri Public
ER-2007-0291 Service Commission

1 means that other customers will pay more. CSC has not shown why it is entitled to a
2 variance which would be paid for by other customers. KCP&L does not agree that the
3 level of savings advanced by CSC exists, but if such savings do exist, KCP&L does not
4 believe that the public interest is served by allowing CSC to qualify for a rate to which it
5 is not entitled so that it can finance improvements to private property. It is not in the
6 public interest to change the rate CSC pays since the cost of the investment and ongoing
7 costs to serve CSC will then be recovered from other KCP&L customers.

8 **Q: Should the Commission grant CSC a variance do you believe CSC would qualify for**
9 **the Medium General Service rate?**

10 A: No I do not. The Availability section of the Company's Medium General Service tariff,
11 attached here as Schedule TMR-1, specifically states "Service will not be supplied where
12 the ultimate use is primarily for residential purposes."

13 **Q: What rate would CSC be eligible for should the Commission direct the Company to**
14 **provide service through one meter?**

15 A: The only rate CSC would be eligible for under the Company's current tariffs is
16 Residential Service. I have attached as Schedule TMR-2 a copy of KCP&L's Residential
17 Service Schedule R tariff. On Sheet No. 5 of that tariff, the Availability section states
18 "For secondary electric service to a single-occupancy private residential and individually-
19 metered, multiple occupancy residential dwellings." Further in that same Availability
20 section, the tariff states,

21 For secondary electric service through one meter, at one point of delivery
22 to a single metered multiple-occupancy residential building:

23 The total monthly bill to each such building to which service is delivered
24 and metered at one point shall consist of the customer charge multiplied
25 by total number of residence units plus each kilowatt hour step shall be
26 multiplied by the total number of residence units and calculated on the
