COMPLAINANTS)

v.)

Case No. EC-2013-0377

**UNION ELECTRIC COMPANY d/b/a)
AMEREN MISSOURI,)**

RESPONDENT)

NOTICE REGARDING EXTRA-RECORD COMMUNICATION

Issue date: February 6, 2013

On February 1, 2013, the below included materials were sent via email to each of the five Commissioners serving on the Missouri Public Service Commission (“the Commission”) and several members of their staff. The materials are related to an online petition hosted on the site change.org. The petition was create by staff members of Renew Missouri for the purpose of soliciting signatures and other input from members of the Missouri public to support Renew Missouri’s efforts to achieve enforcement of Missouri’s Renewable Energy Standard (“RES”).

Renew Missouri is a party to the above-styled case. Pursuant to Commission Rule 4 CSR 240-4.020(3)(A), these emailed material may represent Ex Parte Communications. Although Renew Missouri did not send the majority of the emails directly, the emails were sent in response to the online petition created by Renew Missouri. This Notice is intended to comply with Commission Rules 4 CSR 240-4.020(3)(C) and 4 CSR 240-4.020(4).

The manner in which these emails were sent was the result of a misunderstanding between Renew Missouri staff and a mistake in the creation of the online petition. Renew Missouri intended to collect online signatures and input from members of the Missouri public

before transmitting the petition along with the signatures and additional input in their entirety via the Comments feature on EFIS. However, due to an unforeseen detail, change.org sent an email to each Commissioner for each instance that a member of the public signed the online petition. Upon discovering that this was occurring on the night of February 1, 2013, Renew Missouri staff corrected the error and ensured Commissioners would not receive any further emails from change.org.

Summarized below are the email communications received by the Commissioners between January 8 and February 1, 2013. Renew Missouri does not make any admission as to whether or not the referenced emails qualify as ex parte communications. However, this notice is being filed in the interest of caution and at the request of Shelley Brueggemann, Chief Litigation Attorney for the Missouri Public Service Commission.

Respectfully Submitted,

Andrew J. Linhares, MO Bar ID # 63973

The below text is what Commissioners received approximately 68 times between January 8, and February 1, 2013:

Dear Kevin Gunn (Missouri Public Service Commission),

Renew Missouri started a petition "[Missouri Public Service Commission: Require utilities to comply with Missouri's renewable energy standard](#)" targeting you on Change.org that's starting to pick up steam.

Change.org is the world's largest petition platform that gives anyone, anywhere the tools they need to start, join and win campaigns for change. Change.org never starts petitions on our own -- petitions on the website, like "[Missouri Public Service Commission: Require utilities to comply with Missouri's renewable energy standard](#)", are started by users.

While "[Missouri Public Service Commission: Require utilities to comply with Missouri's renewable energy standard](#)" is active, you'll receive an email each time a signer leaves a comment explaining why he or she is signing. You'll also receive periodic updates about the petition's status.

Here's what you can do right now to resolve the petition:

Review the petition. Here's a link:

<http://www.change.org/petitions/missouri-public-service-commission-require-utilities-to-comply-with-missouri-s-renewable-energy-standard>

See the 253 signers and their reasons for signing on the petition page.

Respond to the petition creator by sending a message here:

<http://www.change.org/petitions/missouri-public-service-commission-require-utilities-to-comply-with-missouri-s-renewable-energy-standard?response=71b1c24cd560>

Sincerely,
Change.org

Included below are the names of the 68 individuals or groups who signed the petition and caused an email to be sent to the Commissioners between January 8 and February 1, 2013:

Additionally, Commissioners received an email from change.org whenever a signatory chose to give additional input regarding their reasons for signing the online petition. The below text is what Commissioners received approximately 34 times on February 1, 2013:

Dear [name of Commissioner],

I just signed Renew Missouri's petition "["Missouri Public Service Commission: Require utilities to comply with Missouri's renewable energy standard"](#)" on Change.org.

Here's why I signed:

[individual's text; see below]

Sincerely,
 [individual's name], [individual's home city]

Included below are the comments themselves, the text of which the Commissioner's received in the above-referenced emails.

Renewable energy is something that this state unfortunately lags behind in, and is unacceptable. The benefits of working towards a more sustainable form of energy is immense both for the individual and the environment. RES was passed by ballot initiative meaning THE PEOPLE want this. Utilities who only care about their bottom line need to be held accountable for failing to meet the fairly modest standards set out for them.

I am a small business owner who has benifitted by a solar pv installer. My business has benifitted and I now have 5 more employees. Customer can afford to install systems that offset the need and use of enviroment destroying facilities such as nuclear and coal burning facilities. Although those types of facilities are needed for now I look forward to a time when we utilize and protect our natural

resources more wisely.

Thank you,

Stanley Cain

This measure is a direct challenge to the will of the voters of Missouri. In 2008 they supported renewable energy standards for Missouri in 2008 on the clear understanding that new renewable sources would be cultivated to meet the standard.

My professional opinion as a scientist specializing in energy matters is that the United States (including my grandson who is too young to protect himself) will be in terrible trouble if we are not heavily renewable by 2070. The technology needed does not yet exist and may never exist unless the public demands action this day!

I am signing because investor owned utilities have transgressed the will of the People of Missouri. They have done so by their non-compliance with a referendum passed in 2008.

In 2008, two-thirds of Missouri voters demanded that investor-owned utilities (IOUs) increase their use of renewable energy. This was the highest passage margin of any statewide renewable energy law.

Last year, utilities were required to demonstrate that 2% of their energy came from renewable sources. However, utilities have built virtually no new renewable energy at all; instead, they have sought to confuse the intent of the law through their influence in Jefferson City.

Utilities claim they can comply by using renewable energy generated at a time when the law wasn't even in effect.

This is like trying to roll over cell phone minutes from a time before you even had the phone.

Utilities are trying to use large, century-old hydroelectric facilities, even though the law explicitly forbids the the use of large hydro-power.

The Missouri renewable energy law was passed to bring Missouri new, cleaner sources of energy and create jobs here in our local communities.

Instead, IOUs are wasting our money on "renewable credits" from far-away states. This means that Missouri sees no new jobs and no change in how we get our energy, while out-of-state energy producers see larger profits.

Invest in Missouri Jobs and Local Economies:

Missouri gets roughly 85% of our energy from Wyoming coal, sending \$1.3 billion out of our state every year.

If we instead invested in clean energy back home, we would keep more of that money in our local economies and create thousands of jobs, giving us cleaner air and healthier people in the process.

It is time the MO PSC take the will of the voters seriously and require utilities to produce renewable energy. A super-majority has spoken. Why isn't the PSC listening? All the PSC is doing is allowing the public to see who is really in charge...the utilities.
