7 **CASE NO. GC-2006-0491**

8
9 **Introduction and Qualifications**

10 **Q. Please state your name and business address.**

11 A. My name is Christopher A. John, my business address is 1155 15th Street, N.W.,
12 Suite 400, Washington, D.C. 20005.

13 **Q. Would you please state your occupation?**

14 A. I am a Vice President at the energy consulting firm of Brown, Williams, Moorhead &
15 Quinn, Inc. ("BWMQ"), which has offices in Washington, D.C. and Houston, Texas.

16 **Q. Please briefly state your professional experience and qualifications.**

17 A. Since October 2002, I have provided technical and/or policy assistance as well as
18 expert testimony to numerous electric utilities, natural gas pipelines, oil pipelines,
19 local distribution companies and customers thereof. I have provided consulting
20 services on business, rate and regulatory matters. I have provided testimony on
21 policy, rate design, cost of service and tariff matters before the Federal Energy
22 Regulatory Commission ("FERC") and in several states. A list of proceedings in
23 which I have provided testimony is attached as Appendix A.

1 From December 1998 to the date of my retirement from FERC in September
2 2002, I was the technical advisor to FERC Commissioner Linda K. Breathitt. During
3 this time, I was directly involved in advising Commissioner Breathitt on every major
4 rulemaking undertaken by FERC. I was also extensively involved in electric policy
5 matters and was primarily responsible for all rate-related and rate of return issues for
6 Commissioner Breathitt.

7 From April 1994 until December 1998, I was a team leader in FERC's
8 Division of Pipeline Rates. In this position, I was responsible for drafting memos and
9 orders as advising the FERC Commissioners on numerous complex rate and tariff
10 filings. I worked on filings involving key gas pipeline-related issues and initiatives
11 such as FERC Order No. 636. I supervised and was responsible for team review of
12 filings ranging from compliance filings to complex rate cases.

13 From January 1989 until April 1994, I was assigned to FERC's Allocation and
14 Rate Design Branch in the Office of Pipeline and Producer Regulation. In this
15 position, I provided expert technical analysis in numerous natural gas pipeline rate
16 proceedings on complex rate design and tariff issues, including market-based rates,
17 mileage-based rates, and contract storage rates. I was also responsible for individual
18 pipeline tariff and rate filings following Order No. 636. In those proceedings all
19 interstate pipelines essentially filed completely revised tariffs and rates to implement
20 FERC's initiative to have pipelines unbundled gas sales and transportation functions.

21 From the time of my employment with FERC in July 1979 until December
22 1988, I was responsible for setting depreciation rates and cost of service levels to be

1 used in developing rates for interstate natural gas and oil pipelines. I testified as an
2 expert witness in formal rate and certificate proceedings.

3 I served in the United States Navy from 1972 until 1975 as an electronics
4 technician.

5 **Q. Would you briefly explain your educational background?**

6 A. I graduated from Frostburg State University in Frostburg, Maryland with a Bachelor
7 of Arts degree in May 1979 with majors in accounting and economics.

8 **Q. On whose behalf are you presenting testimony in this proceeding?**

9 A. I am appearing on behalf of Missouri Pipeline Company (“MPC”) and Missouri Gas
10 Company (“MGC”).

11 **Q. Please detail your experience with complaints and regulatory staff investigations.**

12 A. The majority of my experience with complaints and staff investigations occurred
13 when I was the Technical Advisor to FERC Commissioner Breathitt from 1998 to
14 2002.

15 **Q. What is your experience with Standards of Conduct regulations?**

16 A. While I was the technical advisor to FERC Commissioner Breathitt, the Commission
17 initiated a rulemaking, which greatly broadened which affiliated entities would be
18 required to abide by the standard of conduct rules. This rulemaking was entitled
19 FERC Order No. 2004 - Standards of Conduct for Transmission Providers.

20 **Purpose of Testimony**

21 **Q. What is the purpose of your testimony?**

22 A. My testimony addresses five of the six allegations or counts against MPC and MGC
23 brought by the Missouri Public Service Commission Staff in this proceeding.

1 **Executive Summary**

2 **Q. Please summarize your recommendations.**

3 A. My recommendations and the results of my analysis are as follows:

4 (1) Count One, in part, asserts MPC/MGC failed to maintain separate operational
5 facilities and personnel from any marketing affiliate and that contracts entered into
6 between Omega and MPC/MGC gave preferential treatment to an affiliate. My
7 review of documents shows that MPSC Staff was aware of the fact that MPC/MGC
8 were sharing employees and office space with energy affiliates and, in fact, urged
9 FERC to grant a waiver allowing this sharing of employees. My analysis also shows
10 that the contract negotiated between Omega and MPC/MGC resulted in Omega
11 paying the highest rate for transportation service on both systems, thus there was no
12 preferential treatment for Omega and no other shippers were disadvantaged due to
13 those contracts.

14 (2) Count Two alleges that MPC/MGC have provided transportation for Omega
15 without an executed Transportation Agreement. Based on my review of
16 transportation agreements, agency agreements, invoices and other relevant data,
17 MGC/MPC have had valid and binding transportation agreements with all shippers.

18 (3) Count Three alleges that MPC/MGC charged non-affiliate customers higher
19 rates than the rates charged to an affiliate, without approval, thereby overcharging
20 non-affiliated shippers for transportation service. My review indicates that
21 Commission Staff is comparing rates for service under transportation service
22 agreements between MPC and MGC and shippers with payment provisions from gas
23 sales and agency agreements between Omega and various third parties. My review

1 indicates that it is not appropriate to compare the rates and charges from the gas sales
2 and agency agreements to those set forth in the transportation agreements of other
3 shippers when the functions and services provided are not equivalent. Moreover, the
4 rates paid by Omega, MPC/MGC's former affiliate, are the highest rates being paid
5 on those systems. Consequently, no non-affiliated shippers could be overcharged
6 when compared to the Omega firm transportation contract.

7 (4) Count Four alleges that MPC and MGC failed to report discounts offered to
8 their affiliates. Mr. Ries addresses this issue in his rebuttal testimony.

9 (5) Count Five alleges that MGC paid Omega's expenditures related to the cost of
10 constructing, establishing and modifying the MGC facilities required for the delivery
11 of gas to an Omega customer without billing Omega for reimbursement of these
12 expenditures, as required by the MGC Tariff. My review indicates that MGC
13 properly incurred pipeline extension expenses on its own behalf and said actions were
14 prudent business decisions and necessary to meet potential growth on its system.
15 Other shippers ultimately will benefit from MGC retaining and expanding the usage
16 of the MGC system. Based on these factors, I view MGC's actions in making the
17 investment in the facilities to Willard and recording those investments on its books as
18 prudent.

19 (6) Count Six alleges, that in violation of its tariffs, MPC/MGC have not billed
20 Omega in the same way it has billed other transportation customers. The results of
21 my review of invoicing and payment data showed that MGC/MPC clearly abided by
22 the terms of their tariffs with regard to billing and payment.

23 **Count One – Standards of Conduct**

1 **Q. What is the alleged violation of the standards of conduct claimed by Commission**
2 **Staff?**

3 A. Mr. Schallenberg, at page 9 of his Direct Testimony asserts that MPC/MGC failed to
4 comply with the tariff provisions that require these companies to apply their terms
5 and conditions of service in a uniform and nondiscriminatory manner to non-affiliated
6 shippers as provided to affiliated shippers and to maintain separate operational
7 facilities and personnel from any marketing affiliate.

8 **Q. Please provide more detail on the first allegation concerning the application of**
9 **the terms and conditions of service.**

10 A. In essence, Witness Schallenberg maintains that MPC/MGC allowed its affiliate,
11 Omega Pipeline Company (“Omega”) to carry transportation imbalances while other
12 shippers were required to keep their receipt volumes and their delivery volumes in
13 balance. Mr. David Ries will respond to the portion of the allegations concerning
14 imbalances.

15 **Q. Please provide more detail as to the allegation that MPC/MGC failed to**
16 **maintain separate operational facilities and personnel from any marketing**
17 **affiliate.**

18 A. On page 13 of his Direct Testimony, Mr. Schallenberg sets forth his arguments on the
19 alleged shared personnel violation. Mr. Schallenberg maintains that MPC/MGC
20 violated Paragraph 12.b. of their General Terms and Conditions. This paragraph,
21 which contains provisions dealing with marketing affiliates, states:

22 “For efficiency purposes, Transporter occupies office space on
23 the same floor as its affiliates, but maintains separate
24 operational facilities and personnel. Operational and

1 accounting information is confidentially maintained by
2 Transporter.”

3 Mr. Schallenberg states that “one key violation resulted in most of the misconduct
4 that is the subject of this complaint.” Specifically, Mr. Schallenberg states that
5 MPC/MGC allowed confidential operational and accounting information to be shared
6 with Omega that was not available to other shippers. He argues that the violation
7 occurred because David Ries was the President of MPC/MGC at the same time he
8 was Omega’s President. The alleged violation occurred because while Mr. Ries was
9 President of MPC, MGC and Omega, he was negotiating a transportation contract
10 with MPC/MGC on Omega’s behalf.

11 **Q. What is your response to that allegation?**

12 A. There are two points I would make in response to Mr. Schallenberg’s allegations.
13 First, Staff was aware of the fact that MPC/MGC were sharing employees and office
14 space with affiliates and urged FERC to grant a waiver allowing this sharing of
15 employees and space to continue. Second, the contract negotiated between Omega
16 and MPC/MGC requires Omega to pay the highest rates of any shipper on both
17 systems.

18 **Q. What support do you have for your contention that Staff knew that MPC/MGC
19 were sharing employees and office space with affiliates?**

20 A. As Mr. Ries details in his Rebuttal Testimony, he had discussions with MPSC Staff in
21 2002 where relationships between personnel of MPC/MGC and Omega were
22 explained. Mr. Ries’ status as President of MPC/MGC, MIG and Omega was
23 explained to MPSC Staff in 2002.

1 **Q. Are there other reasons why you would conclude that the MPSC Staff was aware**
2 **of the affiliate relationships at issue?**

3 A. Yes. The tariff provision, paragraph 12.b, cited by Mr. Schallenberg clearly states
4 that “Transporter occupies office space on the same floor as its affiliates.”

5 Additionally, all interstate pipelines were required to file in compliance with
6 FERC’s Order No. 2004 referenced above. MPC/MGC affiliate Missouri Interstate
7 Gas, LLC (“MIG”) made such a filing in FERC Docket No. TS04-259-000. In this
8 filing, MIG sought waiver of the FERC Regulation found in section 358.4(a)
9 concerning separation of function. This regulation requires, except in emergency
10 circumstances, that transmission function employees of the pipeline must function
11 independently of the pipeline’s marketing or energy affiliates. MIG’s filing in FERC
12 Docket No. TS04-259-000 is attached as Appendix B to this testimony. As this
13 appendix presents, MIG explained the relationships with Omega and MPC/MGC.
14 Further, MIG requested a waiver of regulation concerning separation of function due
15 to its small size and the inherent cost efficiencies that would be realized by shared
16 employees.

17 On April 12, 2004, the Missouri Public Service Commission (“MPSC”)
18 intervened in that proceeding. This pleading is attached as Appendix C to this
19 Rebuttal Testimony. On page 2 of the attached pleading, MPSC acknowledges that
20 MPC, MGC and Omega are affiliates and that the same management and
21 administrative personnel are shared by the affiliates. On page 10 of its pleading, the
22 MPSC supported MIG’s request for waiver of the separation of function regulation
23 stating that it would be cost inefficient or even prohibitive to require the pipeline to

1 employ a staff entirely separate from its affiliate. Specifically, the April 12 pleading
2 stated “[t]he MoPSC urges the Commission to grant MIG a waiver from complying
3 with 18 CFR 358.4(a).”

4 **Q. Why is this statement by the MPSC in the MIG proceeding important in current**
5 **proceeding involving MPC/MGC?**

6 A. It is important because Mr. Schallenberg’s testimony is silent on the fact that MPSC
7 Staff was aware of the affiliate relationship between MPC/MGC and Omega and the
8 fact that they were sharing management personnel.

9 **Q. What was FERC’s response to MIG’s request for waiver of the separation of**
10 **function regulation?**

11 A. On July 7, 2004, FERC issued an order on requests for waivers from the Standards of
12 Conduct. That order is attached as Appendix D to this testimony. In that order,
13 FERC waived MIG’s obligation to comply with FERC’s independent functioning
14 requirements and waived the information disclosure prohibitions with respect to
15 MPC/MGC. MPSC sought rehearing of the July 7 order on several areas, but not
16 with regard to the separation of functions waiver. I have attached the MPSC’s
17 August 3, 2004 Request for Rehearing in MIG’s Docket No. TS04-259-000 as
18 Appendix E to this testimony.

19 **Q. What is your conclusion on Staff allegations concerning shared employees and**
20 **the negotiation of Omega contracts with MPC/MGC?**

21 A. My review shows that the MPC/MGC tariffs incorporated a provision acknowledging
22 that there were shared personnel between the affiliates – MPC/MGC and Omega.
23 Further, Mr. Ries is in a management position, not an operational personnel position,

1 so his position as President of the three affiliates would not create a violation of the
2 tariff. Moreover, the MPSC knew and supported the sharing of personnel between
3 the affiliates in filings before FERC.

4 **Q. Was it the understanding of MPC/MGC that the MPSC Staff knew of the**
5 **affiliate relationships existing between MPC/MGC, MIG and Omega?**

6 A. Yes. MPC/MGC and MIG operated with the express understanding that the MPSC
7 knew of the limited staff available and that such employees were shared among the
8 three utilities.

9 **Q. Please discuss the contracts at issue between Omega and MPC and MGC.**

10 A. My analysis shows that the contracts negotiated provide for Omega to pay the highest
11 rates on both the MPC system and the MGC system. I would not view the resulting
12 Omega contracts as giving them an advantage over any other shippers. My analysis
13 of the data indicates that Mr. Ries gave no preferential treatment. Appendix F to my
14 Rebuttal Testimony presents the transportation agreement that was in place with
15 between Omega and MGC when Gateway purchased MPC/MGC. This agreement
16 provided for a reservation rate that was lower than the rate negotiated by Mr. Ries.
17 This does not indicate to me that MPC/MGC were harmed through the 2005
18 agreement with Omega (see Appendix F-1) or that there was preferential treatment
19 provided any affiliate.

20 **Q. What are your conclusions on this count?**

21 A. Based on the foregoing facts, it is my opinion that: (1) MPC/MGC did not violate
22 their tariffs with regard to shared personnel, and (2) the contract negotiated between
23 Omega and MPC/MGC resulted in Omega paying the highest rate for transportation

1 service on both systems, thus there was no preferential treatment for Omega and no
2 other shippers were disadvantaged due to those contracts.

3 **Count Two – Transportation Agreements**

4 **Q. What are the details of the Commission Staff's allegations regarding**
5 **transportation agreements?**

6 A. In the Complaint, Staff notes that the MGC/MPC tariffs require a written
7 Transportation Agreement for each shipper (Sheet 4, Paragraph 1.c). Staff asserts
8 that MPC/MGC have provided transportation for Omega without an executed
9 Transportation Agreement. Staff believes that the failure to execute Transportation
10 Agreement hides actual transactions and makes detection of irregularities difficult and
11 less likely.

12 **Q. What is your experience with transportation contracts?**

13 A. I have had considerable experience in reviewing transportation contracts while I was
14 employed at FERC. In most rate cases I was involved with while at FERC, there was
15 a need to review the rate and contract terms of transportation agreements in setting
16 rates and establishing or revising tariff provisions. In every position I had during my
17 23 years at FERC, reviewing transportation agreements was necessary.

18 **Q. Based on your regulatory experience, what is your response to these allegations?**

19 A. Based on my review of transportation agreements, agency agreements, invoices and
20 other relevant data, MGC/MPC have had valid and binding transportation agreements
21 with all shippers. Most of Staff's disagreement revolves around the operation of
22 agency agreements that a number of MGC/MPC shippers utilize.

1 **Q. Please explain how an agency agreement operates on natural gas pipeline**
2 **systems.**

3 A. An end-user of gas would authorize an agent, who typically is a marketing company,
4 to assume some of the administrative functions and obligations that the end-user may
5 have in order to receive gas supply. Examples of such obligations are nominations
6 and scheduling receipts and deliveries on the pipelines and receiving billings. Small
7 end-users and small local distribution companies (“LDCs”) may structure the
8 agreement so that the agent is also responsible for obtaining necessary gas supplies.

9 **Q. What was your first experience with agency agreements?**

10 A. My first experience was during the implementation of FERC’s Order No. 636
11 beginning in 1992. Prior to 1992, most interstate pipelines provided a bundled
12 service - both a gas sales function and a transportation function for their customers.
13 Order No. 636 required interstate pipelines to functionally unbundle the gas sales and
14 transportation functions. Subject to a short transition period, interstate pipelines were
15 not allowed to continue to provide a gas sales service to customers. As pertinent to
16 this case, all users of the interstate pipeline system were required to find their own
17 supplier of natural gas, and to begin to take on certain scheduling and nomination
18 functions with the pipeline. These were services previously provided by interstate
19 pipelines. One consequence of entities being responsible for scheduling and
20 nomination functions was that the pipelines were allowed to impose penalties when
21 shippers did not keep their receipts into the system in balance with their deliveries off
22 the pipeline system.

1 Many larger cities and end-users were able to adapt to the changes, sometimes
2 with the assistance of a marketer. However, smaller cities and end-users did not have
3 the ability to operate in an unbundled environment to secure their former gas sales
4 function and the transportation functions necessary to receive reliable service. Due
5 to the temperature sensitive nature of some small LDCs and end-users, these parties
6 began incurring significant imbalance charges on interstate pipelines. An alternative
7 for these entities was to enter into an agency agreement with an entity that would
8 allow the agent to be responsible for certain functions required by the pipeline. These
9 agreements could also be structured such that the agent was responsible for the
10 natural gas supply requirements of the other party to the agreement. Several pipelines
11 filed pro forma Agency Agreements during their Order No. 636 restructuring
12 proceedings beginning in 1992. This was my first experience with agency
13 agreements.

14 **Q. Please detail the functions done under the agency agreement.**

15 A. Some of the functions that can be done under approved interstate agency agreements
16 include: nominations, confirmations, amending receipt and delivery points, receiving
17 billing, making payments to the pipeline and viewing reports.

18 **Q. Does the fact that a shipper on MGC/MPC has an agency agreement in place**
19 **with a third-party change their existing transportation agreement?**

20 A. No. Where there was an existing transportation agreement in place, such as with the
21 City of Cuba, the agency agreement had a specific provision – “Section 16.
22 Independent Contracts.” This provision not only acknowledges Omega’s common
23 ownership with intrastate pipelines and that there has been no tying of the agency

1 agreement to any transportation agreement, but the agency agreements provide for
2 Omega to be responsible for scheduling and nominations of volumes on MPC/MGC
3 on behalf of Cuba. Cuba has firm transportation agreements with both MPC
4 (Contract No. MP-1025-TAF) and MGC (Contract No. MG-1009-TAF), both of
5 which were entered into on July 1, 1999. These agreements are attached to my
6 testimony as Appendices G and H. The responsibilities under those firm
7 transportation agreements ultimately lie with the City of Cuba. The city has just
8 delegated certain of those responsibilities to an agent – Omega.

9 **Q. Is there other evidence of the independent nature of the MPC/MGC**
10 **transportation agreement with Cuba and the Sales and Agency Agreement**
11 **between Cuba and Omega?**

12 A. Yes. Witness Clark Smith details, in his Rebuttal Testimony, reasons why the two
13 are independent of each other. Mr. Smith explains that the transportation agreements
14 were entered into years before the sales agreement between Cuba and Omega. He
15 also notes that the obligations of Cuba under the transportation agreement are
16 between Cuba and MPC/MGC and the obligations of Cuba under the sales agreement
17 is an obligation only between Cuba and Omega. Mr. Smith also correctly points out
18 that the sales agreement offered no advantage to Omega solely by virtue of the
19 affiliate relationship between Omega and MPC/MGC. In summary, Mr. Smith
20 clearly established that the two agreements are independent of each other.

21 **Q. Are there other functions provided by a marketer or agent, which MPC/MGC**
22 **do not provide?**

1 A. Yes. For example, the agreements with the City of Cuba, Willard Asphalt Paving
2 Company (“Willard”), Georgia Pacific Gypsum Plant (“G-P”), and Emhart Glass
3 Manufacturing, Inc. (“Emhart”) also require Omega to provide a gas sales function.
4 These agreements are attached to my testimony as Appendices I, J, K and L.
5 MPC/MGC do not provide a natural gas sales service. Consequently, entities enter
6 into such agreements in order to receive the bundled sales and transportation services
7 that they had before pipelines unbundled these services.

8 **Q. What are the specific allegations set forth by Staff on this count?**

9 A. Staff witness Schallenberg states on page 19 of his direct testimony that the violation
10 occurred from July 1, 2003 to January 31, 2005 when MGC allegedly provided
11 transportation service to Omega, without a transportation service agreement. He
12 argues that MPC/MGC delivered Omega’s gas to Cuba City Gate for G-P beginning
13 on September 1, 2003 without an executed contract. Further, he states that
14 MPC/MGC delivered Omega’s gas to the Willard Interconnection on behalf of
15 Omega’s obligation to the Willard beginning around June 1, 2004 through January
16 31, 2005 without an executed transportation agreement.

17 **Q. Discuss MPC/MGC’s deliveries to the Cuba City Gate for G-P.**

18 A. As discussed in the testimony of David Ries, the volumes transported for both the
19 City of Cuba and G-P were pursuant to Cuba’s effective firm transportation contracts
20 with MPC (Contract No. MP-1025-TAF), MGC (Contract No. MG-1009-TAF) and
21 the agency agreement between Omega and the City of Cuba dated May 17, 2003.

22 **Q. Was there any benefit to the City of Cuba by having G-P’s volumes transported**
23 **under its transportation agreement?**

1 A. Yes. The City of Cuba benefited from retaining G-P on its distribution system. In a
2 June 17, 2003 transportation agreement between Cuba and Omega, Cuba provides
3 Omega with the right to transport G-P's gas through the Cuba distribution system and
4 references a rate of **_____** for the use of the Cuba distribution system.

5 **Q. Do you agree with Staff's contention that MPC/MGC permitted transport of**
6 **Omega's gas to Cuba City Gate for G-P beginning on September 1, 2003 without**
7 **an executed contract.**

8 A. No. Cuba clearly has had executed transportation agreements in place since July 1,
9 1999 for transportation service on MPC/MGC. Omega entered into agreement with
10 the City of Cuba on May 17, 2003, which provided for Omega to make nominations
11 and scheduling on MPC/MGC. Cuba acknowledged the use of its capacity for G-P in
12 the June 13, 2003 transportation agreement between Cuba and Omega, Cuba
13 benefited from such use of its capacity on MPC/MGC. All of these actions are before
14 the September 1, 2003 date when Staff alleged the transportation without an
15 agreement for G-P began.

16 **Q. Is the sales agreement between Omega and G-P unusual?**

17 A. No. As Witness Clark Smith explains in his Rebuttal Testimony, there is nothing
18 unusual or discriminatory in the sales agreement between Omega and G-P. Mr.
19 Smith explains that these sales agreements are normal across the natural gas industry
20 for many small industrial customers, who desire the ability to buy their gas supply in
21 the form of a "bundled" service.

22 **Q. Please discuss the Staff allegation that MPC/MGC delivered Omega's gas to the**
23 **Willard Interconnection on behalf of Omega's obligation to Willard beginning**

1 **around June 1, 2004 through January 31, 2005 without an executed**
2 **transportation agreement.**

3 A. Omega and Willard executed an agency agreement on April 4, 2004, which required
4 Omega to deliver natural gas to meet the Willard Plant's needs. Omega was
5 providing nominations, scheduling and billing functions on MPC/MGC. The actual
6 daily deliveries for Willard under the Cuba contracts was broken out on the
7 MPC/MGC invoices to Cuba. MPC/MGC are providing its services to Willard under
8 a valid and binding firm transportation service agreement with the City of Cuba
9 through the city's agent – Omega.

10 **Q. Do you agree with Mr. Schallenberg's opinion that a transportation agreement is**
11 **required for the transactions discussed above?**

12 A. For all the reasons stated above, I do not agree with Mr. Schallenberg. There are
13 other marketers on the MPC/MGC systems that currently provide similar agency and
14 sales services. Specifically, ONEOK Marketing currently provides agency and sales
15 services to the city of St. James, St. Robert and Waynesville. ONEOK is providing
16 the same services for these cities that Omega provides for Cuba. Furthermore, as is
17 explained by Mr. Ries in his Rebuttal Testimony, Cuba had a similar agency
18 agreement with Ameren Energy marketing for several years prior to entering into the
19 sales agreement with Omega. A copy of the Ameren sales agreement with Cuba is
20 attached to my testimony as Appendix M.

21 **Q. What is your overall reaction to Staff's allegations concerning MPC/MGC**
22 **allowing Omega to transport on their systems without a transportation**
23 **agreement?**

1 A. There was a valid firm transportation agreement supporting MPC/MGC's deliveries
2 for use by both G-P and Willard. Further, there were valid agency agreements in
3 place between Omega and Cuba, Omega and G-P, and Omega and Willard covering
4 the periods stated in Staff's allegations. Omega was providing agreed upon
5 nomination, scheduling and billing services on MPC/MGC pursuant to the agency
6 agreements. My experience is that another transportation agreement would not be
7 needed for G-P and Willard in this situation where they are making valid use of
8 available firm capacity of Cuba's existing firm transportation agreement on
9 MPC/MGC. Finally, Omega's sales agreements with Cuba and the industrials is
10 consistent with an agreement in place previously with Ameren and, as Witness Clark
11 Smith explains, normal in the natural gas industry.

12 **Count Three – Rates and Discounts**

13 **Q. Please detail the relevant tariff provisions relied upon by Staff for their**
14 **allegations concerning rates and discounts.**

15 A. At page 21 of his Direct Testimony, Staff witness Schallenberg reproduces Section
16 3.2 of the MPC/MGC tariffs, these provisions set forth the range of rates that may be
17 charged by the pipelines. He highlights language in this provision that provides that
18 the lowest transportation rate charged to an affiliate shall be the maximum rate that
19 can be charged to non-affiliates. Witness Schallenberg states that MPC/MGC would
20 be in violation of their tariffs to charge a non-affiliate more than MPC/MGC is
21 charging Omega.

22 **Q. What are the allegations of Staff concerning transportation rates and discounts**
23 **to those transportation rates?**

1 A. Staff asserts that MPC/MGC charged non-affiliate customers higher rates than the
2 rates charged to an affiliate, without approval, thereby overcharging non-affiliated
3 shippers for transportation service (complaint at Paragraph 17).

4 **Q. Do you concur with Staff's allegation?**

5 A. No.

6 **Q. Please summarize your disagreement with Staff on this count.**

7 A. My analysis shows that Staff's position that MPC/MGC is charging affiliates lower
8 rates than those charged to non-affiliates is inaccurate. Based on the methodology set
9 forth in the MPC/MGC tariffs to compare rates, Omega is paying the highest rates on
10 either system. MPC/MGC's rates to affiliates and non-affiliates are also consistent
11 with generally accepted ratemaking methodologies.

12 **Q. Would you please generally describe the ratemaking process used to set rates?**

13 A. The first step involves the determination of a pipeline's overall cost of service or
14 revenue requirement. The cost of service is the main consideration upon which a
15 pipeline's overall rate structure is based. The second step is to categorize the costs
16 from the revenue requirement as fixed costs or variable costs. The third step is to
17 classify the fixed or variable costs to either the reservation (demand) or commodity
18 components. The fourth step is to allocate the classified costs to the services offered
19 by the pipeline. The final step is to design rates for each of the services based upon
20 allocated costs and representative levels of service (or billing determinants).

21 **Q. Please detail acceptable rate forms for shippers such as those served by**
22 **MGC/MPC.**

1 A. Rates for firm transportation service provided by pipeline companies typically take
2 the reservation charge-commodity charge or two-part rate form. The reservation
3 charge is derived based on shipper contract demand levels. The commodity charge is
4 typically based on total annual throughput on the system. Thus, the minimum
5 monthly charge in the reservation-commodity form of rate is the firm reservation
6 charge multiplied by the contract demand of the shipper.

7 In some instances, a single volumetric rate is used by some pipelines for firm
8 service to smaller shippers. A volumetric rate would be based on annual throughput
9 determinants and would be charged to each shipper based upon their monthly usage.
10 In certain instances, the one-part volumetric rate charged to small shippers is
11 computed at an imputed load factor. The load factor will typically be based on the
12 average small shipper use of the system compared to the amount of gas that shippers
13 could transport based upon their contract demand levels. Under a one-part volumetric
14 rate form, if a shipper did not ship on the pipeline during the month and there was no
15 minimum bill provision in the agreement, their monthly transportation charge would
16 be zero.

17 Many pipelines also provide interruptible transportation services. These
18 services are typically charged a volumetric rate based on a 100% load factor
19 equivalent of the firm transportation rates. Specifically, the 100% load factor
20 interruptible rate is developed by adding the firm commodity charge to the monthly
21 reservation rate converted to a daily equivalent rate.

22 **Q. Please explain the form of rates charged by MPC and MGC.**

1 A. MPC's firm customers all pay a two-part reservation and commodity rate. MPC's
2 interruptible transportation service is a one-part volumetric rate.

3 MGC's provides firm service under both two-part rates and one-part firm rates
4 imputed at a 25% load factor. In addition, MGC has a separate set for two-part rates
5 for service to Fort Leonard Wood. MGC also offers interruptible transportation
6 service on a one-part volumetric rate basis.

7 **Q. Given that MPC and MGC each have firm shippers with different firm rates,**
8 **how did you compare rates charged on these pipelines?**

9 A. In order to compare shippers on both systems on an equivalent basis, I used the
10 methodology required by both tariffs. Specifically, Paragraph 3.2(b)(4) of the firm
11 transportation rate schedule of both the MPC (P.S.C. MO. No. 2, Sheet No. 6) and
12 MGC tariff (P.S.C. MO. No. 2, Sheet No. 6) provides that:

13 Rate comparisons for compliance with these provisions will be
14 calculated assuming a 25% load factor.

15 I have utilized the 25% load factor specified in the tariffs for my rate comparison
16 detailed below.

17 **Q. Please provide greater detail on the allegations concerning rates charged by**
18 **MPC and MGC to former affiliate, Omega.**

19 A. As I explain later in my testimony, Staff's recommendations would place both
20 pipelines in a veritable death rate spiral. My analysis goes over the allegations
21 against each pipeline independently as the charges are not similar for both pipeline
22 systems.

23 **Q. What are the specific rate allegations regarding transportation service on MPC?**

1 A. Staff witness Schallenberg, on page 22 of his Direct Testimony, asserts that MPC
2 provides (1) discounted interruptible transportation to Omega and (2) discounted firm
3 transportation to **_____** City Gate. He next asserts that the discounts
4 disadvantaged shippers paying the maximum rates on MPC. These shippers are
5 identified, on page 22 of his Direct Testimony, as the **_____
6 _____
7 _____** at the **_____** delivery point and non-
8 affiliated interruptible shippers.

9 **Q. What are Staff's recommended rate changes for MPC?**

10 A. Staff Witness Schallenberg presents his recommended rate changes in the form of rate
11 adjustment charts, which start on page 24 and conclude with a chart on page 27. As
12 the chart on page 27 shows, Mr. Schallenberg proposes that the MPC firm reservation
13 rate ultimately be decreased from **_____**. This chart
14 also shows a recommended dramatic reduction in MPC's rate for interruptible
15 transportation service – **_____**.

16 **Q. Do you agree with Mr. Schallenberg's analysis and conclusions with regard to**
17 **MPC transactions?**

18 A. No. On page 27 of his Direct Testimony, Mr. Schallenberg contends that Omega
19 received discounted transportation service from MPC through Omega entering into
20 contracts with the City of Cuba, Willard, G-P and Emhart to provide gas supply at
21 rates that were independent of the rates MPC would charge for transportation service.
22 He states that MPC would allow Omega to assume an existing transportation service
23 agreement or host contract through an agency agreement.

1 Mr. Schallenberg is comparing rates for service under transportation service
2 agreements between MPC and shippers with payment provisions from gas sales and
3 agency agreements between Omega and The City of Cuba, G-P and Emhart. As Mr.
4 Schallenberg notes on page 27 of his Direct Testimony Omega charges included
5 charges for performing a gas supply function as well as charges for the transportation
6 service provided by MPC and MGC. It is not appropriate to compare the rates and
7 charges from the gas sales and agency agreements to those set forth in the
8 transportation agreements of other shippers when the functions and services provided
9 are not equivalent.

10 **Q. Have you done a comparison, based on the 25% load factor required by the**
11 **tariff, of rates charged by MPC to Omega and other shippers?**

12 A. Yes. My analysis shows that the rate Omega and the City of Cuba are paying on
13 MPC are not discounts compared to any other shipper. In fact, as this chart shows,
14 both Omega and the City of Cuba are paying the highest MPC rates of any other
15 shipper.

MPC Shipper	25% Load Factor Rate
Omega	** _____ **
Cuba	** _____ **
Waynesville	** _____ **
St. Robert	** _____ **
St. James	** _____ **

Laclede	** _____ **
AmerenUE	** _____ **
Fidelity	** _____ **
Royal Canin	** _____ **
Phelps	** _____ **
Busy Bee	** _____ **
U.M. – Rolla	** _____ **

1 I have also included two graphs as Appendices N and O to my Rebuttal
2 Testimony. These appendices compare the rates charged on MPC for the period
3 February 2005 through March 2006. Omega and Cuba have both been paying the
4 ** _____ ** tariff rates for services on MPC.

5 **Q. Please summarize your reaction to Staff's allegations with regard to the rates**
6 **MPC charged.**

7 A. I disagree with Mr. Schallenberg's attempt to compare rate terms from the Agency
8 agreements with rates charged under transportation service agreements. I also
9 disagree with his attempt to project the rates charged to the City of Cuba as being
10 ones charged to an affiliate. The City of Cuba has never been an affiliate of
11 MPC/MGC. Nonetheless, my rate analysis showed that Omega and Cuba were
12 paying the ** _____ ** rates for service on MPC. Thus, what these shippers were
13 paying was on a par or more than that paid by all other shippers. Consequently, I
14 disagree with his contention that MPC provided its one-time affiliate, Omega with a
15 discount that should be offered to other non-affiliated shippers.

16 **Q. What are Staff's recommended rate changes for MGC?**

1 A. Witness Schallenberg also recommends drastic reductions to both components of the
2 firm rates – the reservation and commodity charges. Per the chart on page 27, Mr.
3 Schallenberg recommends that MGC’s just and reasonable firm reservation rate be
4 eliminated, reducing the tariff reservation rate of **_____**. Mr.
5 Schallenberg also recommends slashing the MGC firm commodity charge from
6 **_____**. The one-part interruptible rate would go from
7 **_____** under the rates presented on the chart on page 27.

8 **Q. What are the allegations concerning MGC transactions?**

9 A. Witness Schallenberg states MGC provided its former affiliate, Omega, with a form of
10 discount for FT or IT to deliver to (1) the Cuba City Gate; (2) the Willard
11 Interconnection; (3) the Owensville City Gate; and (4) the Fort Leonard Wood City
12 Gate. Next, witness Schallenberg asserts that the discounts disadvantaged shippers
13 paying the maximum rates on MGC. He states that there are non-affiliates paying
14 maximum rates on MGC including the **_____**
15 _____**.

16 **Q. Do you agree with Mr. Schallenberg’s analysis and conclusions with regard to**
17 **MGC transactions?**

18 A. No. Once again, Omega is the shipper paying the highest rate on the MGC system.
19 Further, as was explained earlier, Mr. Schallenberg is comparing rates for service
20 under transportation service agreements between MGC and shippers with payment
21 provisions from gas sales and agency agreements between Omega and The City of
22 Cuba, G-P and Emhart. The charges from the transportation agreement is not
23 comparable to the charges from the gas sales and agency agreements because the

1 agency agreement will provide for charges for gas supply as well as charges for the
2 transportation service provided by MPC and MGC and perhaps other pipelines. As
3 Mr. Clark Smith makes clear in his Rebuttal Testimony, the obligations, rights and
4 duties between Omega and Cuba under the Sales Agreement is entirely independent
5 of the obligations of Cuba under its MGC Transportation Agreement. Consequently,
6 it is not appropriate to compare the rates and charges from the gas sales and agency
7 agreements to those set forth in the transportation agreements of other shippers when
8 the functions and services provided are not equivalent.

9 **Q. Have you done a comparison, based on the 25% load factor required by the**
10 **tariff, of rates charged by MGC to Omega and other shippers?**

11 A. Yes. My analysis shows that the rate Omega is paying on MGC is the highest on the
12 MGC system. The specific 25% load factors rates are:

MGC Shipper	25% Load Factor Rate
Omega	** _____ **
Royal Canin	** _____ **
Phelps	** _____ **
Busy Bee	** _____ **
AmerenUE	** _____ **
Waynesville	** _____ **
St. Robert	** _____ **
St. James	** _____ **
Cuba	** _____ **
U.M. – Rolla	** _____ **

1 The chart above presents data for the period February 2005 until March 2006.
2 This timeframe was chosen because Omega's firm natural gas transportation
3 agreements under Contracts MG-1103-TAF and MOP-1103-TAF began in February
4 2005. I have also included two graphs as Appendices P and Q to my Rebuttal
5 Testimony. These appendices compare the rates charged on MGC for the period
6 February 2005 through March 2006. As these charts and tables show, Omega has
7 been paying the highest rate on the MGC system during that period.

8 **Q. What are your general concerns about the levels of the rate reductions sought by**
9 **Witness Schallenberg?**

10 A. The rate levels reflected on the chart on page 27 of Mr. Schallenberg's would not
11 provide MPC and MGC a reasonable opportunity to recover prudently incurred costs
12 and could be detrimental to shippers and end-users in the long run.

13 **Q. Please explain how the rates set forth in Mr. Schallenberg's testimony at page 27**
14 **would not provide the pipelines with a reasonable opportunity to recover**
15 **prudently incurred costs.**

16 A. As discussed above, a pipeline's rates are based upon an established cost of service or
17 revenue requirement. In the ratesetting process, these costs are classified as either
18 fixed or variable costs. Fixed costs are those that do not vary with the volumes of gas
19 transported and generally consist of costs related to (1) operation and maintenance
20 costs, and (2) investment in facilities, including depreciation, state and federal taxes,
21 and a rate of return component. Fixed costs are typically classified to the reservation
22 component of rates and recovered by the pipelines in its firm reservation charge.

1 Variable costs are those that vary proportionally to the volume of gas
2 transported. Variable costs are made up largely of costs related to compressor station
3 use and purchased gas costs, if any. Variable costs are typically classified to the
4 commodity component of rates and recovered in the firm commodity charge.

5 By making recommendations that MPC's and MGC's firm reservation rates
6 be adjusted to **_____**, the pipelines would have no opportunity to recover
7 prudently incurred fixed costs related to operation and maintenance of the system.
8 The pipeline's ability to carry on its existing operations would be severely limited.

9 **Count Five – Willard Facilities**

10 **Q. Please provide some details on this allegation concerning the Willard facilities.**

11 A. Mr. Schallenberg, on page 34 of his Direct Testimony, states that MGC paid Omega's
12 expenditures related to the cost of constructing, establishing and modifying the MGC
13 facilities required for the delivery of gas to an Omega customer without billing
14 Omega for reimbursement of these expenditures, as required by Section 6.e of the
15 General Terms and Conditions of the MGC Tariff.

16 **Q. Why did MGC decide to construct the facilities necessary for the Willard**
17 **interconnection?**

18 A. My understanding is that MGC made the decision to construct the minor amount of
19 pipeline and the meter station to create an interconnection with the Willard Asphalt
20 plant based on business factors.

21 Without the interconnection, MGC would lose the opportunity to serve the
22 plant. In addition, the plant primary usage was during off-peak periods on the MGC
23 system. This allowed MGC to add throughput without impacting existing customers

1 needs. There was also the potential to add other customers located in close proximity
2 to the pipeline that was constructed.

3 **Q. Please explain the circumstances behind the construction of the Willard**
4 **facilities.**

5 A. Mr. Ries, in his Rebuttal Testimony, fully explains the business reasons for MGC
6 electing to build and pay for the lateral and meter station to Willard. As Mr. Ries
7 states, there are a number of potential gas users in the vicinity of the lateral. Mr. Ries
8 also explains that the revenues received under the Willard are expected to increase
9 based on equipment changes at the Willard plant.

10 **Q. Would Omega have had a sufficient incentive to pay or construct the facilities**
11 **themselves?**

12 A. No. Omega would want to be guaranteed of a quick payback period for the
13 expenditure involved. Willard could opt to choose another marketer at any time.

14 **Q. Have any other shippers had to incur any costs related to this investment?**

15 A. No. MGC has not filed a rate case since these facilities went into service.
16 Consequently, none of the costs of these facilities would have been reflected in the
17 determination of the currently effective rates.

18 **Q. Is it reasonable for MGC to carry the costs of these facilities as regulated assets?**

19 A. MGC actions appear prudent and necessary to meet existing and potential growth on
20 its system. The Willard plant's off-peak usage enables MGC to increase utilization of
21 the system when others are not putting great demands on the system. Other shippers
22 ultimately will benefit from MGC retaining and expanding the usage of the MGC

1 system. Based on these factors, I view MGC's actions in making the investment in
2 the Willard facilities as prudent.

3 **Count Six - Billing**

4 **Q. What allegation has been made concerning MPC/MGC's billing procedures?**

5 A. The Staff complaint (at paragraph's 32 and 33) note that MGC and MPC's tariffs
6 specify that they will apply all terms and conditions in a uniform and
7 nondiscriminatory manner without regard to affiliation. Staff alleges, that in violation
8 of its tariffs, MPC and MGC have not billed Omega in the same way it has billed
9 other transportation customers. The complaint states that MPC and MGC have
10 provided service but have not billed Omega by the tenth of the month following the
11 service delivery, without charging Omega interest for not paying by the 20th of the
12 month. Finally, the complaint maintains MPC and MGC have not provided such
13 billing arrangements for other customers.

14 **Q. What do the MPC/MGC tariffs provide for with regard to billing statements by**
15 **the pipelines and payments by shippers?**

16 A. Paragraph 6 – Statements and Payments of the General Terms and Conditions of both
17 MPC/MGC's tariff sets forth the provisions regarding billing statements and
18 payments.

19 On billing procedures, Paragraph 6.a states, in part that "*Transporter shall*
20 *send to shipper, on or before the 10th of each month, a billing of charges rendered in*
21 *the preceding month.*"

1 As to payments by shippers, Paragraph 6.b provides that “*Shipper shall pay*
2 *Transporter within 10 days from the date on which the bill is sent for all charges*
3 *billed in accordance with the provisions of this Rate Schedule.*”

4 **Q. Did your review show that MPC and MGC billed their shippers by the 10 of the**
5 **month in compliance with their tariff provisions?**

6 A. I have created as Appendix R to my Rebuttal Testimony a table that lists the date of
7 the month in which invoices were sent to all shippers for the period January 2005 to
8 March 2006. This table clearly shows that Omega was billed at the same time as all
9 other shippers on MPC/MGC. Furthermore, this table shows that in every month
10 during this period, the invoices were sent out by the 3rd of the month. The billing
11 dates for MPC/MGC were clearly before the 10th of the month required by Paragraph
12 6.a.

13 **Q. How has Omega compared to other shippers in making payments on their**
14 **monthly billings?**

15 A. Appendix S to my Rebuttal Testimony is a table which shows the average days for
16 each MPC and MGC shipper to make their payments after the invoices have been
17 sent. The period reviewed is from January 2005 to March 2006. As the attachment
18 shows, Omega, as Cuba's agent, has averaged 7.8 days to pay MPC / MGC invoices
19 and Omega has paid it's invoices under it's transportation contract with MPC and
20 MGC on average within 8.3 days. The remaining shippers on average take from 11.3
21 days to 27.5 days to make their payments. Consequently, Omega is the only entity
22 who, on average, makes payment within 10 days from the date of the billing, as is
23 required pursuant to Paragraph 6.b of the General Terms and Conditions.

1 **Q. In your review of invoices and billing material, did you see evidence of**
2 **preferential treatment to Omega in the billing procedures of MPC and MGC?**

3 A. No. MPC and MGC both billed Omega at the same time that other shippers were
4 billed. Omega also was the only shipper during the period I reviewed (January 2005
5 to March 2006) that met the tariff requirement that shippers pay their billings within
6 10 days of the date the bill was sent.

7 **Q. Do you agree with the allegations made in the Staff complaint concerning billing**
8 **practices of MPC and MGC?**

9 A. Not at all. The results of my review of invoicing and payment data showed that both
10 MGC and MPC clearly abided by the terms of their tariffs with regard to billing and
11 payment.

12 **Conclusion**

13 **Q. Please summarize your conclusions on the allegations to which you presented**
14 **testimony.**

15 A. Staff has not supported or justified the allegations against MPC/MGC on any of the
16 counts, which I addressed in my testimony. The fatal flaw in Staff's case is their
17 position that MPC/MGC required transportation agreements for services provided
18 under valid, binding and independent sales and agency agreements. This position
19 has been shown incorrect by all MPC/MGC witnesses. Consequently, all the counts
20 and allegations related to this position should be dismissed.

21 **Q. Does that conclude your testimony?**

22 A. Yes it does.
