and Modification of Federal Communications) **Case No. TO-97-220**
Commission Rules Regarding IntraLATA Dialing)
Parity.)

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group received a standard 12-week training program, while the experimental group received a 12-week training program with a 4-week pre-training period. The subjects were then divided into two subgroups: the control subgroup and the experimental subgroup. The control subgroup received a standard 12-week training program, while the experimental subgroup received a 12-week training program with a 4-week pre-training period. The subjects were then divided into two subgroups: the control subgroup and the experimental subgroup. The control subgroup received a standard 12-week training program, while the experimental subgroup received a 12-week training program with a 4-week pre-training period.
