Jefferson City, Missouri 65102

Dear Sir:

This is to reply to your letter of October 20, 1981, requesting compliance with the orders of the Commission regarding District Five..The operating permit mentioned in paragraph four can be issued, only after facilities are completed and ready for use. The facilities mentioned in paragraph six are not to be constructed until the project is 30% occupied and since at this time only two lots are occupied it seems unlikely this goal will be reached in the near future. There will be no charges levied until the facilities are in place so it seems to us attempting to establish a rate structure at this time would be premature.

Due to the unusual nature of this project and the uncertain monetary conditions existing in the construction industry we are at a loss to predict any schedule for completion of the facilities and therefore the necessity of service.

The escrow account for Airport West and North has been established at Charterbank of Cassville and the developer is making regular deposits thereto.

We wish to do whatever is necessary to maintain the orders in force until such time as the project is constructed and service required.

Sincerely yours,

Paul L. Heath
