<b>Brief Description</b>	Events or Circumstances Impacting Level of Electrical Usage or Demand	
<b>Description</b>	Please identify and describe any events or circumstances known to MIEC or Noranda impacting the level of electrical usage or demand experienced in the months March 2013 – December 2014 for the LTS rate classification, for example, equipment malfunction or increases and decreases in plant production. If any event or circumstance increased or decreased the level of electrical usage or demand during that time, please identify whether it is expected to persist. Data Request submitted by Sarah Kliethermes (sarah.kliethermes@psc.mo.gov).	
<b>Response</b>	Noranda has experienced higher than normal pot failures since around mid-2014 which has led to lower production levels and therefore lower electricity consumption. Noranda is currently estimating to be back to full production by the end of March 2015. This is the only circumstance known to have materially affected power usage during the specified time period.
