AIRLINK SPECTRUM ACCESS ATTACHMENT

Last Mile Spectrum

Air Link intends to use an existing nationwide (NN) 3.65Ghz license (call sign WQPZ496) to deploy fixed wireless service to the areas it will bid on in Auction 903. Air Link will convert to the use of CBRS GAA spectrum (3.62-3.7 GHz) under FCC Part 96 rules when the FCC has finalized and implemented the use of CBRS. Air Link will utilize additional GAA channels, bid on PAL licenses, and utilize unlicensed 5 GHz spectrum to supplement the initial GAA channels if service demands grow beyond the 70% take rate base assumption.

Backhaul Spectrum

Air Link also intends to utilize the licensed 11Ghz band. We currently hold six 11Ghz Licenses on our current network. License applications for the proposed wireless links have not been submitted to the FCC at this time. If Air Link is awarded CAF Phase II funds then the link applications will be filed in a timely manner and will be thoroughly identified on the long-form application.

Existing Spectrum in Use

Air Link currently utilizes unlicensed fixed wireless equipment at over 50 tower sites in the 2.4 and 5 GHz band to provide broadband service. Additionally, Air Link has deployed a total of six licensed 11 GHz microwave backhaul links (WQUD386, WQUD387, WQWU384, WQWY386, WQXF299, WQXV321) and 18 (NN) 3.65Ghz locations. (WQPZ496)
