MISSOURI PUBLIC SERVICE COMMISSION

STATE OF MISSOURI

In the Matter of the Invest Class Cost of Service and Union Electric Company	· ·
	AFFIDAVIT OF GREGORY L. NELSON
STATE OF MISSOURI)
CITY OF ST. LOUIS) SS.)
Gregory L. Nelson	n, being first duly sworn on his oath, states:
_	regory L. Nelson. I work in the City of St. Louis, Missouri, and I am ax Counsel of Ameren Services Company.
Testimony consisting of	to and made a part hereof for all purposes is my Supplemental Rebuttal pages 1 through 10, including Exhibits 1-2, all of which has been for introduction into evidence in Missouri Public Service Commission
3. I hereby swea questions therein propour	r and affirm that my answers contained in the attached testimony to the added are true and correct.
Subscribed and s	Affiant Worn to before me this /2 day of May, 1999. ANZALO Motary Public R. P. ANZALONE MOTARY SEAL MOTARY PUBLIC — STATE OF MISSOURI ST. LOUIS COUNTY MY COMMISSION EXPIRES MAY 18, 2000
	MY COMMISSION EXPIRES MAY 18, 2000

1	Supplemental Rebuttal Testimony
2	of Gregory L. Nelson
3 4	Vice President and Tax Counsel
5	MPSC Case No. EO-96-14
6	
7	Q. Please state your name and business address.
8	A. My name is Gregory L. Nelson, and my business address is 1901
9	Chouteau Avenue, St. Louis, Missouri, 63103.
10	Q. By whom are you employed and in what position?
11	A. I am employed by Ameren Services Company as Vice President and Tax
12	Counsel.
13	Q. Please describe your educational background and work experience.
14	A. I graduated from Vanderbilt University in 1978 with a Bachelor of Arts
15	degree in Business Administration. I also received a Juris Doctor degree from Vanderbilt
16	University in 1981 and a Master of Laws in Taxation from Georgetown University in
17	1988.
18	I assumed the position of Manager of the Tax Department of Union Electric
19	Company ("Company") in October, 1995. On December 31, 1997, with the closing of
20	the merger transaction involving the Company and CIPSCO, Inc., I became the manager
21	of the Tax Department of Ameren Services Company. I was elected to my current
22	position in February, 1999. My department is responsible for the federal, state and local
23	tax compliance and planning functions for the Ameren group of corporations, including
24	the Company.
25	From 1988 through 1995, I was employed by the Washington, D.C. office of the
26	law firm Reid & Priest. My responsibilities at Reid & Priest were representing and

24

1 counseling electric utilities and the Edison Electric Institute, the trade association of 2 investor-owned electric utilities, on taxation matters. From 1984 through 1988, I was a trial attorney for the Tax Division of the United States Department of Justice in 3 4 Washington, D.C. From 1982 through 1984, I was an Assistant Attorney General for the 5 State of Tennessee. From 1981 through 1982, I was a tax consultant with Touche Ross and Company in Nashville, Tennessee. 6 7 I am a member of the Missouri, District of Columbia and Tennessee bars. 8 **Purpose of Testimony** 9 Q. What is the purpose of your testimony in this proceeding? 10 A. The purpose of my testimony is to rebut portions of the direct testimony of 11 Commission Staff witness Stephen M. Rackers concerning Staff's proposed adjustments related to federal income taxes in connection with the computation of the sharing credits 12 13 in the third year of the Experimental Alternative Regulation Plan ("EARP") for the 14 Company approved in Case No. ER-95-411. 15 Proposed Adjustment Regarding the Debt Component of AFUDC 16 Q. What adjustment is Mr. Rackers proposing at page 12, line 14 17 18 through page 13, line 6? 19 A. Mr. Rackers is proposing to include the debt portion of the allowance for 20 funds used during construction ("AFUDC") as a deduction in the calculation of current 21 income taxes for purposes of the EARP. 22 O. Do you agree with this proposed adjustment? 23 A. No. Mr. Rackers' adjustment has the effect of providing for the deduction

of the same interest twice in computing current income taxes. Such a double deduction is

1	not permitted by the tax law and is not reflected on the Company's tax returns or on its
2	books.
3	Q. What is AFUDC?
4	A. AFUDC is a term used in the utility industry to describe a utility's
5	carrying costs for construction work in progress. AFUDC includes both debt and equity
6	components.
7	Q. Describe the Company's ratemaking and financial accounting
8	treatment of AFUDC.
9	A. The Company follows the electric utility industry practice of capitalizing
10	both the debt and equity portions for recovery through future rate revenues. Specifically,
11	the Company:
12 13	 Records all interest on its long-term debt, including interest on the debt component of AFUDC, as an expense.
14 15	Records the debt and equity components of AFUDC as non-operating income.
16	Q. Describe the federal income tax treatment of equity and interest.
17	A. Costs of equity are not deductible for federal income tax purposes.
18	Interest is either deductible as incurred or capitalized for federal income tax purposes.
19	Q. What is the difference between the book treatment and tax treatment
20	of the debt component of AFUDC?
21	A. The same amount will ultimately be recovered for book and tax purposes
22	(i.e., recorded as a book expense and claimed as a deduction in computing taxable
23	income), but the timing of that recovery will be different. Essentially, interest is
24	deducted sooner for tax purposes than it is expensed for book purposes.

9

10

16

17

18

19

20

21

22

23

24

25

- Q. How does the Company show the differences between the book treatment and tax treatment of items on its federal income tax returns?
- A. The Company shows its book/tax differences on Schedule M-1 of its
- 4 annual federal income tax return. Schedule M-1 requires the taxpayer to reconcile its
- 5 book income and taxable income. This reconciliation is accomplished by identifying
- 6 book/tax differences in the following four different categories:
- Income that is subject to tax, but not recorded on the books;
 - Expenses that are recorded on the books, but not deducted on the return;
 - Income recorded on the books, but not subject to tax; and
 - Deductions on the return, but not expensed on the books.
- Items in these categories are referred to as "Schedule M" items. For example, tax-exempt interest is a Schedule M item in the third category—income that is recorded on the books, but not subject to tax. Tax depreciation in excess of book depreciation is another Schedule M item; it is an expense that is deducted on the tax return, but not expensed on the books.
 - Q. How do the Company's books reflect temporary differences between book treatment and tax treatment of Schedule M items?
 - A. The Company establishes and adjusts deferred tax accounts to reflect temporary differences between book treatment and tax treatment. For example, in the case of accelerated depreciation, utility assets are typically depreciated more rapidly for tax purposes than for book purposes. In addition to recording the differences on Schedule M of its the tax returns, the Company increases its deferred tax liability during those years when tax depreciation exceeds book depreciation and reduces its deferred tax liability during those years when book depreciation exceeds tax depreciation. Over the life of a single asset, the effect of these deferred tax adjustments is zero.

1	Q. De	escribe the formula by which the Company computes its current income
2	tax expense f	or book purposes.
3 4 5 6 7 8 9	A.	Net operating income Plus/minus: non-operating income and expense items Plus: current and deferred income taxes Equals: pre-tax book income Plus/minus: Schedule M items Equals: taxable income Times: applicable tax rates Equals: current income tax expense
12	Q.	Describe this process as it relates to AFUDC.
13	A.	Due to the complexity of the computation of current taxes, the process is
14	best explaine	d by using a hypothetical example, which for convenience is summarized on
15	a single page	, Schedule 1 to my testimony. The example will compare the computation
16	of current inc	ome tax expense under the Company's book method described above, under
17	the method th	nat the Company provided to Mr. Rackers in this proceeding and under Mr.
18	Rackers' met	hod. It will demonstrate the error of Mr. Rackers' method.
19	The e	xample makes the following assumptions:
20 21 22 23 24 25 26 27 28 29 30 31	• In • To de • \$8 cu • Tl sc • To	et operating income is \$100. Iterest on long-term debt is \$50. Iterest on long-term debt is AFUDC-equity and \$10 is AFUDC-Iter. Iterest on long-term debt is AFUDC-equity and \$10 is AFUDC-Iter. Iterest on long-term debt is \$50. Iterest on long-t
32		on of \$12 (\$10 related to the AFUDC-equity and \$2 related to the currently-
33	deductible A	

book expense, but not a tax deduction.

1 Q. Explain how to calculate the current tax expense using these 2 assumptions under the Company's book method. 3 A. The first step is to compute pre-tax book income. The Company's book method accomplishes this step by adjusting its net operating income for the two non-4 5 operating items: 6 Nonoperating income: \$100 7 20 Plus: AFUDC (debt and equity) income 8 Minus: Interest on long-term debt <u>(50)</u> 9 \$70 Equals: Pre-tax book income 10 The second step is to compute taxable income. To do this, the Company would 11 make two Schedule M adjustments to pre-tax book income. 12 Pre-tax book income \$70 Minus: Schedule M item to 13 14 remove AFUDC (debt and equity) (20)15 16 Plus: Schedule M item to reverse the book interest deduction 17 18 for the portion of interest that is 19 capitalized for tax purposes __8 20 Equals: Taxable income 58 21 The reason for the first Schedule M item is that the AFUDC is income for book purposes, 22 but not for tax purposes. The reason for the second Schedule M item is that all interest 23 relating to AFUDC-debt is expensed for book purposes, i.e., it is included in the \$50 24 interest on long term debt which was deducted in computing book income. Therefore, 25 the interest that is capitalized for tax purposes (i.e., not deducted in the year incurred) is a

- 1 This calculation demonstrates that the net Schedule M item for AFUDC is \$12 (\$10 for
- 2 the AFUDC-equity and \$2 for the AFUDC-Debt that is deducted currently for tax
- 3 purposes).

8

- 4 The final step is to compute the tax:
- 5 Taxable income:

\$58

6 Times: tax rate

40%

7 Equals: current income tax

\$23.2

- Q. In responding to Staff's requests for data on the current income tax
- 9 calculation, did the Company follow the foregoing format?
- 10 A. No, in responding to Staff's request for data on its current income tax
- calculation, the Company departed from the foregoing analysis in two places. Using the
- 12 numbers from the example, the Company omitted the \$20 AFUDC addition to net
- operating income and the corresponding Schedule M item to subtract the same \$20
- 14 AFUDC. The net effect of the omission of the two items was zero—the taxable income
- 15 was still \$58 and the tax was still \$23.2, as depicted in Schedule 1 (the second
- 16 calculation).
- 17 Q. How does Mr. Rackers' approach differ from the Company's
- 18 approach?
- 19 A. Mr. Rackers' approach followed the data that Staff was given by the
- 20 Company, but he added a deduction for the interest on the AFUDC-debt. In the example,
- 21 Mr. Rackers would have added a deduction for the \$10 interest on the AFUDC-debt.
- 22 This treatment is incorrect because the \$10 interest on AFUDC-debt was already included
- in the \$50 interest on long-term debt that was deducted in computing the book income.

- 1 Mr. Rackers' treatment therefore has the effect of deducting the \$10 twice. This results in
- an incorrect taxable income of \$48 and an incorrect tax of \$19.2 in the example.
- Q. Why is Mr. Rackers' proposed adjustment incorrect?
- 4 A. The tax law does not permit a taxpayer to deduct an item twice in computing taxable income.
- O. What is the rationale for Mr. Rackers' adjustment?
- A. Mr. Rackers states at page 12, lines 17-20 that a provision for deferred tax
- 8 associated with AFUDC has been included in the calculation of income taxes and that it
- 9 is therefore appropriate to have an associated deduction in the calculation of current
- income taxes. Thus, it appears that he noticed the deferred tax entries associated with the
- 11 AFUDC-debt but did not see AFUDC-debt as a separate Schedule M item.
- Q. Why did Mr. Rackers not see AFUDC-debt as a separate Schedule M
- 13 item?
- A. As I stated above, the Company's response to the Staff's request followed
- the Company's book treatment with two differences: the AFUDC was not added to net
- operating income, nor listed as a Schedule M item. These omissions netted dollar-for-
- dollar and did not affect the calculation of deferred taxes. However, their omission
- appears to have caused Mr. Rackers to conclude that there was not a Schedule M item for
- 19 AFUDC when in fact there was.
- Q. What is the effect of Mr. Rackers' proposed adjustment for the debt
- 21 component of AFUDC?
- A. The Company's calculation of current income tax liability for the 12
- 23 months ending June 30, 1998 for book purposes is attached as Schedule 2. The total

1	AFUDC is \$11,599,424 (analogous to the \$20 in the example). The portion that Mr.
2	Rackers proposes to deduct twice (the \$10 in the example) is \$2,773,969. This
3	adjustment thus understates the Company's taxable income by \$2,773,969. The Missouri
4	jurisdictional portion of that amount is \$2,538,459. That understatement of income has
5	the effect of understating the Company's current tax liability by approximately
6	\$1,015,387. The Company's treatment, on the other hand, is consistent with the actual
7	income tax calculation on the tax return and in its provision for income taxes in its books.
8	Mr. Rackers' proposed adjustment under the EARP therefore is inappropriate and should
9	be rejected.
10	Q. Do you agree with Mr. Rackers' statement at page 13, lines 1-2 that
li	his proposed treatment is consistent with the income tax calculation in Case No. EC-
12	87-114?
13	A. Yes. However, the fact remains that such treatment is erroneous and
14	distorts the Company's income tax calculation under the EARP. As stated in the rebuttal
15	testimony of Messrs. Brandt and Baxter, it is appropriate to correct errors under the terms
16	of the EARP agreement. Similar corrections have been accepted by the Company in this
17	proceeding, such as in the case of property taxes on plant held for future use, as discussed
18	in the rebuttal testimony of Mr. Baxter.
19	Proposed Treatment IRS Audit Adjustments
20 21 22	Q. Would you like to address any other matters raised in Mr. Rackers' testimony?
23 24	A. Yes, at page 7, line 24 through page 12, line 13, Mr. Rackers proposes to
25	eliminate the effect of adjustments that the Company made on its books to its income tax

expense in connection with adjustments to its tax liability as determined upon audit by

- the Internal Revenue Service. Mr. Rackers proposes to defer ratemaking treatment of
- these items until the first general rate or complaint case following the second EARP.
- Q. Do you agree with Mr. Rackers' proposal?
- A. I concur with Mr. Rackers' conclusion that his proposed adjustments 4 should not be considered in this proceeding. However, I disagree with his contention that 5 these adjustments should be considered in a future proceeding. The Company's 6 omission of prior period tax adjustments is "consistent with the Staff's traditional 7 8 calculation of income taxes" and therefore should not be considered for purposes of 9 computing the EARP. If the Commission proposes to address those proposed adjustments in this proceeding, I request the opportunity to supplement this testimony to 10 11 address the substance of those proposed adjustments.
- 12 Q. Does this conclude your supplemental rebuttal testimony?
- 13 A. Yes, it does.

Assumptions:

1	Net operating income	100
2	Interest on long-term debt	50
3	AFUDC, debt and equity	20
4	AFUDC, equity	10
5	AFUDC-debt, tax deductible portion	2
6	AFUDC-debt, tax capitalized portion	8
7	No other additions to net operating income	
8	No other Schedule M items	
	Simplifying assumption: current and deferred taxes are not added to book income.
