11	

1		REBUTTAL TESTIMONY
2	2	OF
3	3	KIMBERLY K. BOLIN
4	t THE	E EMPIRE DISTRICT ELECTRIC COMPANY
5	5	CASE NO. ER-2014-0351
6	Q. Please st	ate your name and business address.
7	A. Kimberly	K. Bolin, 200 Madison Street, Suite 440, Jefferson City, MO 65102.
8	Q. By whom	n are you employed and in what capacity?
9	A. I am em	ployed by the Missouri Public Service Commission ("Commission")
10	as a Utility Regulatory	Auditor V.
11	Q. Are you	the same Kimberly K. Bolin who has previously filed direct testimony
12	2 and portions of the Com	mission Staff's ("Staff") Cost of Service Report in this proceeding?
13	A. Yes.	
14	Q. What is t	he purpose of your rebuttal testimony?
15	A. The purp	pose of my rebuttal testimony is to respond to The Empire District
16	5 Electric Company's ("1	Empire" or "Company") direct filing and The Office of the Public
17	Counsel's ("OPC") di	rect testimony regarding the return to customers of the Iatan 2
18	Investment Tax Credit (ITC) over collection.
19	In addition, I w	ill respond to the Company's direct filing regarding two income tax
20	expense matters; cost of	removal deferred tax amortization and state income tax flow-through.
21	Lastly, I will pr	rovide a list of the corrections to Staff's direct revenue requirement
22	2 calculation for Empire i	n this proceeding.

Q.

1 INVESTMENT TAX CREDIT (ITC) OVER COLLECTION

2

What is the issue related to the ITC over collection?

- A. In Empire's previous rate case, Case No. ER-2012-0345, the Commission approved a stipulation and agreement which allowed the Company to track revenue stemming from the recovery of an Iatan 2 related ITC tax liability of \$266,150. As of March 2014, Empire had collected the full amount of the tax liability and began over collecting the liability in rates. As of August 31, 2014, the end of the update period in this case, Empire over collected the tax liability by \$119,218. This over collection should now be returned to Empire's customers.
- 10

Q. How does the Company propose to refund the over collections to customers?

A. In Company witness Scott Keith's direct testimony in this case, Empire
recommends that the balance in the ITC recovery account as of February 28, 2015 be included
in the FAC calculation as a reduction in energy costs.

14

Q. Does Staff agree with the Company's proposal?

A. Staff does not believe this refund should be included in the FAC 15 No. 16 calculation. Staff believes that only fuel and fuel related costs should be included in the FAC. 17 The ITC over collection is not related to any prior fuel or fuel related expense incurred by 18 Empire. Staff believes the amount of the over collection as of December 31, 2014, the end of 19 the true-up period in this case, should be recovered through rates via an amortization. Any 20 further over collection of the ITC amount included in rates in Empire's last rate proceeding 21 after December 31, 2014 would then need to be reviewed during the next rate case.

Q. What is OPC's position in regards to the over collection of ITC by theCompany?

A. OPC has proposed that Empire should return the amount of the over collection
 as of the end of December 2014 to the customers over a two year period via an amortization.

3

Q. Does Staff agree with OPC's position?

4 A. Staff does agree with OPC that the over collection should be recovered through 5 rates via an amortization. However, Staff proposes a 16 month amortization which would be 6 more in line with the expected timing of how long the current rates will be in effect. Empire 7 has informed Staff and other parties that the Company will most likely file another rate case 8 by the end of 2015. The operation of law date in this case is July 26, 2015. If the new rates 9 generated from this case go into effect on that date, the rates will be in effect for the last five 10 months of 2015. Assuming the Company files its new rate case the last month of this year, December 2015, the new rates will not go in effect until sometime in November 2016, which 11 12 would make an approximate period of 16 months between general rate case filings.

13

14

17

Q. What is "cost of removal?"

COST OF REMOVAL DEFERRED TAX AMORTIZATION

A. "Cost of removal" is the cost of demolishing, dismantling, tearing down or
otherwise removing plant in service at the end of its useful life.

Q. How is cost of removal currently treated for ratemaking purposes?

A. In Missouri, cost of removal is currently included in the cost of service on an
accrual basis as a component of a utility's authorized depreciation rates. Except for a brief
period in the prior decade, Empire's cost of removal has been recovered from customers using
this approach. This approach means that customers pay in rates an estimation of the future
cost of removal for the plant while the plant is still in service.

Q.

1

How is cost of removal treated for income tax purposes?

2 A. The Internal Revenue Service (IRS) allows a deduction on a utility's income 3 tax returns only for cost of removal amounts that are actually incurred. The difference 4 between the accrual approach used for cost of removal in setting rates and the cash approach 5 used for this cost for income tax purposes means that cost of removal is a "tax timing 6 difference." The term "tax timing difference" applies to costs for which the timing of 7 recognition for financial accounting and income tax purposes is different.

8 Is it reasonable to expect the amount of cost of removal collected in rates by a Q. 9 utility will ever be equal to the amount of cost of removal actually incurred by a utility?

10 A. No. Current ratemaking policy allows for collection in rates of estimated cost 11 of removal amounts in some cases decades in advance of when the actual expenditures are 12 expected to be made. This means, as a practical matter, that the amount of cost of removal 13 collected in rates will never be "trued-up" to the amount of actual costs of removal 14 expenditures for a company.

15

Q. What is the difference between "normalization" treatment and "flow-through" 16 treatment of tax timing differences for rate purposes?

"Normalizing" tax timing differences means that, for rate purposes, a cost is 17 A. 18 considered to be recognized in the income tax calculation at the same time as the item is 19 recognized as an expense on the utility's income statement. "Flowing through" tax timing 20 differences means that, for rate purposes, a cost is recognized in the income tax calculation at 21 the same time the item is recognized as a deduction on the utility's income tax returns.

22 As it applies to cost of removal, normalization of this item would mean the cost is 23 taken as a deduction for ratemaking purposes at the time it is accrued as part of the utility's

depreciation rates. Under the flow-through approach, the cost would be taken as an income
 tax deduction at the time the utility's cost of removal expenditures are made.

3

Q. What is the Company's position regarding this issue?

4 A. The Company has included an adjustment for a cost of removal deferred tax 5 amortization in its workpapers for this case, but has provided no support for this adjustment in 6 its filed direct testimony. This adjustment was an issue in previous Empire rate cases, 7 including its last general rate proceeding, Case No. ER-2012-0345. In that case, the Company 8 alleged that the tax deduction for cost of removal was inadvertently provided to customers 9 twice in prior Empire rate cases from 1981 to 2008, once by normalizing the cost of removal 10 component included in Empire's authorized depreciation rates for tax purposes and again by simultaneously flowing through the amount of cost or removal actually incurred by 11 12 the utility in the income tax calculation. The Company believed that this resulted in an alleged under recovery of accumulated deferred income tax by Empire, and that this amount 13 14 should be recouped through an amortization of a cost of removal deferred tax asset over 15 an 18-year period.

16

Q.

What is Staff's position regarding this proposed amortization?

A. Staff is opposed to inclusion in rates of this amortization. Staff has not been
provided credible evidence that this alleged double-reflection of the cost of removal tax
deduction in cost of service actually occurred.

20

21

Q. Is it possible to determine how certain items are treated for rate purposes based upon a review of income tax accounting schedules from previous cases?

A. No. The income tax accounting schedules used in Staff's accounting
schedules do not necessarily contain the detail of how certain values contained therein

are derived. Also, many rate cases proceedings are settled and a negotiated dollar basis does
 not usually allow for a direct reconciliation of the negotiated amount to any one party's
 revenue requirement.

4 Q. Were some of Empire's rate case filings from 1981 to 2008 resolved by
5 stipulation and agreement?

A. Yes, most of them were. Even for those cases that went to hearing, to my
knowledge no tax issues associated with cost of removal were litigated. Of course, the
existence of stipulations and agreements in Empire's past rate cases reflecting a "black box"
settlement of revenue requirement makes it very difficult to make a determination of
how certain items, such as income tax treatment of cost of removal, were treated for
ratemaking purposes.

12 Q. What is the nature of the deferred tax asset that Empire seeks to amortize in the13 rate proceeding?

A. The amount proposed for amortization by Empire in this case is derived from a
deferred tax asset booked by Empire pursuant to Financial Accounting Standard (FAS)
No. 109, "Accounting for Income Taxes." This asset was not booked by Empire until the
early 1990s, when the provisions of FAS 109 went into effect, even though some of the cost
of removal expenditures reflected within the asset balance date back to 1981.

Q. Is the cost of removal deferred tax asset the same type of deferred taxasset/liability ordinarily given rate treatment by the Commission?

A. No. The deferred tax assets and liabilities reflected in the Company's rate base
result from prior normalization treatment of utility tax timing differences. The cost of removal
deferred tax asset Empire is seeking to amortize in this case results from prior flow-through

treatment of this tax timing difference. This amount has also not been reflected in Empire's
 rate base in past rate proceedings, unlike other deferred tax assets and liabilities.

3 Q. Is the cost of removal deferred tax asset that Empire seeks to amortize a
4 "regulatory asset?"

A. No, not in the usual sense of that term. It is my understanding that Empire is booking this particular asset as a requirement applied to regulated utilities under the provision of FAS No. 109. This amount is not a regulatory asset in that its booking was authorized or approved by the Commission through an accounting authority order application or other means. This issue has the characteristics of attempting to validate after the fact a regulatory asset placed on the books without regulatory approval that will need to be written off if regulatory approval for rate recovery is not given.

12

STATE TAX FLOW-THROUGH

13

Q. What is the issue?

14 A. The state flow-through adjustment amount was included in the Company's 15 workpapers supplied in this case, though there was no support for this adjustment in the 16 filed direct testimony submitted by Empire in this proceeding. This adjustment was an issue 17 in previous Empire general rate proceedings, including its most recent case, Case No. 18 ER-2012-0345. My understanding of this issue is that Empire is asserting that the 19 normalization treatment of tax timing differences provided to it by the Commission up to the 20 early 1990s was authorized only at the stand-alone federal tax rate, and not the composite 21 federal-state income tax rate usually used to record deferred taxes resulting from 22 normalization of tax timing differences. Therefore, when Staff applies the current composite 23 federal-state income tax rate for the purpose of returning deferred taxes to customers,

1	Empire claims that use of the composite tax rate for this purpose, which is higher than the		
2	stand-alone federal rate, results in a shortfall to the Company. Empire is proposing in this		
3	case to recover this alleged shortfall through an amortization over 18 years.		
4	Q. What is the current difference between the federal-state composite tax rate and		
5	the stand-alone federal income tax rate?		
6	A. The current composite income tax rate used by Staff is 38.3886%, while the		
7	stand-alone federal income tax rate is 35%.		
8	Q. What is Staff's position on this issue?		
9	A. Staff is opposed to Empire's proposed state tax flow-through amortization.		
10	Q. To your knowledge, what has been Staff's position in the past regarding the		
11	calculation of deferred taxes for purposes of setting customer rates?		
12	A. To my knowledge, Staff has advocated the approach of calculating deferred		
13	income taxes using a composite federal-state income tax rate. I am not aware of any instance		
14	of the Commission ordering rates be set using a different income tax rate to calculate deferred		
15	income taxes.		
16	Q. If Empire's deferred taxes were calculated using the normal composite		
17	federal-state tax rate, how would acceptance of its state tax flow-through amortization		
18	affect its customers?		
19	A. Adoption of Empire's proposed amortization would mean its ratepayers would		
20	not be fully compensated for the full amount of deferred taxes they provided to Empire in		
21	earlier rate cases. This result would be unfair and inequitable.		

1 **CORRECTIONS TO DIRECT FILING** 2 Is Staff aware of corrections that need to be made Staff's direct revenue **Q**. 3 requirement calculations? 4 Yes. After the direct filing on January 29, 2015, Staff became aware of A. 5 corrections that needed to be made to the direct revenue requirement amount. 6 Q. What are the corrections? 7 A. The following issues were corrected: 8 Other Electric Revenue – Staff corrected an allocation factor. • 9 SPP Transmission Revenue – Staff corrected an allocation factor. • 10 • Weather Normalization – Staff corrected a formula error. 11 • Rate Revenue - Due to the weather normalization correction, total 12 weather normalized kWhs changed which in turn changed Staff's direct 13 filed rate revenues. 14 Large Customer Revenue – Staff removed a customer that was double • 15 counted. 16 Rate Case Expense – Staff updated rate case expense to the most • 17 current amount. Accumulated Depreciation Reserve - Staff included the impact of the 18 • 19 past Regulatory Plan Amortization that was excluded from direct filing. Accumulated Deferred Income Tax – Staff corrected certain balances. 20 Income Tax – Staff corrected adjustments to income tax and removed 21 • 22 the deduction for ESOP. 23 Operations and Maintenance Expense - Staff corrected adjustments to • 24 test year for certain items. Iatan 2, Iatan Common and Plum Point O&M Trackers - Staff 25 • corrected the rate base balances. 26 27 Vegetation Management Expense – Staff corrected the adjustments to • test year. 28 29 Fuel and Purchased Power - Staff corrected fuel prices and inputs into • 30 the fuel model. 31 Cash Working Capital – This item was corrected to reflect new fuel and • 32 purchase power expenses. 33 SPP IM Revenues – This item was corrected to reflect the results of the • 34 fuel model.

Q. What is Staff's recommended revenue requirement after reflecting the
 above corrections?

A. With the above corrections, Staff's calculated revenue requirement for Empire in this proceeding ranges from approximately \$9,323,652 to \$13,883,462, based upon a recommended rate of return range of 7.41% to 7.73%. Staff's recommended revenue requirement at the midpoint of the rate of return range (7.60%) is \$11,594,755. All of Staff's revenue requirement amounts discussed above include a true-up estimate for the construction cost of the Asbury Air Quality Control System that was completed in December 2014, after the end of the update period in this case.

10

11

- Q. Does this conclude your rebuttal testimony?
- А.

Yes.

BEFORE THE PUBLIC SERVICE COMMISSION
