Case No. TO-99-593

ORDER DIRECTING ADDITIONAL NOTICE

In a Report and Order issued June 10, 1999, in Case No. TO-99-254, et al., the Commission created this case to investigate the issues of signaling protocols, call records, trunking arrangements, and traffic measurement. The Commission originally provided notice that these issues were going to be considered to all telecommunications companies in the state of Missouri on June 15, 1999, and allowed until July 16, 1999, for interventions.

During the course of this proceeding, certain issues have been raised that may be beyond the scope of the original notice. Accordingly, the Commission is providing additional notice to all telecommunications companies in the state of Missouri, and allowing an additional intervention period. The additional issues raised are:

- Should the Commission change the business relationship that currently exists among telecommunications companies so that the former primary toll carriers (PTCs) are responsible for all terminating traffic based on terminating recordings (with the exception of interstate feature group A, interstate intraLATA, IXC, MCA, and intraMTA wireless transited by another LEC to the terminating LEC)?
- Should the Commission require the former PTCs and the former secondary carriers (SCs) to divide the responsibility for unidentified traffic or discrepancies between originating recordings and terminating recordings?

- Should the Commission allow the former PTCs, at the request of a former SC, to block traffic for non-compensation?

IT IS THEREFORE ORDERED:

1. That the Records Department of the Commission shall send notice to all telecommunications companies certificated to do business in the state of Missouri.

2. That any party wishing to intervene or to file comments in this matter shall file an application, or shall file their written comments, no later than June 6, 2001, with:

Dale Hardy Roberts, Secretary
Missouri Public Service Commission
Post Office Box 360
