| Purpose and summary of testimony | 3    |
| High Prairie Wind Energy Center  | 4    |
| Keeping Current Program          | 9    |

#### 1 I. Introduction

- 2 Q: Please state your name, title, and business address.
- 3 A: James Owen, Executive Director, Renew Missouri Advocates d/b/a Renew Missouri
  4 ("Renew Missouri"), 409 Vandiver Dr. Building 5, Suite 205, Columbia, MO 65202.
- 5 Q: Please describe your current position, your education, and background.

6 Renew Missouri is an advocacy group based in Missouri that appears before regulatory A: 7 agencies such as the Missouri Public Service Commission ("MPSC") and the Kentucky 8 Public Service Commission ("KPSC") as well as monitoring and providing comments on 9 matters before the Kansas Corporation Commission. ("KCC"). Our work involves engaging as intervenors on utility rate cases, applications for certificates of convenience 10 11 and necessity ("CCNs"), merger and acquisition, Accounting Authority Orders ("AAOs"), and energy efficiency investment portfolios. Before the KPSC, I have provided general 12 13 testimony on rate increases, rate design, and opposition to utility proposals involving 14 excessive fees against net metered customers.

15 Renew Missouri routinely engage in workshops, providing comments and serving 16 on panels before Commissioners, regulators, and other stakeholders. Most recently, we 17 have engaged in dockets involving co-generation rulemaking as well as utility responses 18 to the COVID-19 crisis. I have provided testimony before these agencies on general policy 19 involving the generation, transmission, and distribution of power. Attached as Schedule 20 JO-1 is a list of my case participation. We have also lent our expertise and knowledge on 21 legislative matters between the two states that includes issues ranging from energy 22 efficiency investments to securitization of debt held by utility companies as well as 23 community solar.

In regards to my background, I am an attorney by trade and was appointed as an
 Associate Circuit Court Judge prior to my experience in utility ratemaking. As far as my
 education goes, I obtained a law degree from the University of Kansas in Lawrence, Kansas
 as well as a Bachelor of Arts in Business and Political Science from Drury University in
 Springfield, Missouri.

# 6 Q: What experience does Renew Missouri have in advocating for low-income 7 ratepayers.

8 A: Renew Missouri is deeply engaged with obtaining policy results that provide access for 9 low-income residents to renewable energy and energy efficiency. Through our representation of nationwide groups such as National Housing Trust ("NHT") and Energy 10 11 Efficiency for All ("EEFA"), Renew Missouri has secured energy efficiency programs for 12 all ratepayers as well as crafting on-bill financing tariff programs designed to aid lowincome customers in making improvements to their living spaces. Before the KPSC, I have 13 14 provided testimony for a coalition that includes the Metropolitan Housing Coalition located 15 in Louisville, KY in regards to rate increases proposed during the COVID-19 crisis. 16 Additionally, Renew Missouri has worked with utility companies to develop pilots to 17 provide community solar to low-income neighborhoods. We have worked to expand these 18 efforts throughout Missouri and Kansas.

#### 19 Q: What work does Renew Missouri conduct in the field of energy policy?

A: In my role as Executive Director at Renew Missouri, I continue to provide information and
 testimony on pieces of proposed legislation that may impact how utility regulators
 approach energy efficiency and renewable energy. Most recently, Renew Missouri staff
 and myself have been developing and offering educational programs on topics related to

2

energy law and policy in Missouri on topics including demand response aggregation,
 accounting authority orders, and our year-end update covering state and federal
 rulemakings, PSC appeals, and energy efficiency/renewable energy updates. We have
 provided nearly sixty hours of continuing legal education credit over the past three years.

5

#### **Q:** Please summarize your professional experience in the field of utility regulation.

A: Before becoming Executive Director of Renew Missouri, I served as Missouri's Public
Counsel, a position charged with representing the public in all matters involving utility
companies regulated by the State of Missouri. While I was Public Counsel, I was involved
in several rate cases, CCN applications, mergers, and complaints as well as other filings.
As Public Counsel, I was also involved in answering legislators' inquiries regarding
legislation impacting the regulation of public utilities.

#### 12 Q: Have you been a member of, or participant in, any workgroups, committees, or

#### 13 other groups that have addressed electric utility regulation and policy issues?

A: In May 2016, I attended the National Association of Regulatory Utility Commissioners
("NARUC") Utility Rate School. In the Fall of 2016, I attended Financial Research
Institute's 2016 Public Utility Symposium on safety, affordability, and reliability. While I
was Public Counsel, I was also a member of the National Association of State Utility
Consumer Advocates ("NASUCA") and, in November of 2017, the Consumer Council of
Missouri named me the 2017 Consumer Advocate of the Year.

#### 20 II. <u>Purpose and summary of testimony</u>

#### 21 Q: What is the purpose of your testimony?

A: First, to respond to the testimony filed by Office of the Public Counsel ("OPC") witness
Geoff Marke and MIEC witness Greg Meyer related to disallowances for the High Prairie

Wind Energy Center ("High Prarie"). Second, I respond to the recommendations in the
 Staff's Report related to the administration of the Keeping Current Program.

#### **3 Q:** What is your recommendation to the Commission in this case?

- A: The Commission should reject the disallowances proposed by MIEC and OPC related to
  High Prairie. In addition, to increase the benefits to customers, Ameren should include
  education about low-income and other energy efficiency program offers to all customers
  receiving assistance under the Keeping Current Program.
- 8

#### III. <u>High Prairie Wind Energy Center</u>

#### 9 Q: Please summarize the testimony offered by OPC on this issue.

A. OPC discusses the approach Ameren has taken to minimize the impact on bats and birds
by curtailing High Prairie nightly turbine use. Dr. Marke ultimately recommends "that 25%
of the costs related to the High Prairie Wind Farm be removed from the revenue
requirement to account for the fact that High Prairie is only operational 75% of the year."
He recommends this disallowance because ratepayers should not "be responsible for any
costs related to Ameren's poor managerial decisions in electing to site its wind farm where

16 it did."<sup>2</sup>

17 Q: How do you respond?

18 A: As background, the Commission granted Ameren a CCN for High Prairie in Case No: EA-

19 2019-0202. Both OPC and MIEC participated in that case and the CCN was resolved by a

- 20 Stipulation and Agreement. The location of the project was specifically called out in the
- 21 stipulation:
- Ameren Missouri, Staff, Renew Missouri, MIEC, DE, the Sierra Club, the
  NRDC, and OPC agree that, with the conditions provided below, the

<sup>1</sup> Marke Direct, p. 10.

<sup>&</sup>lt;sup>2</sup> Marke Direct, p. 10.

| 1<br>2<br>3<br>4<br>5<br>6                         | Missouri Public Service Commission ("Commission") should grant Ameren<br>Missouri's request for a CCN pursuant to Section 393.170.1 to <b>construct</b><br><b>and own a wind generation facility to be constructed in Schuyler and</b><br><b>Adair Counties in Missouri</b> , under the Build Transfer Agreement ("BTA")<br>with TG High Prairie Holdings, LLC (the "Project") as set forth in the<br>Company's Application. <sup>3</sup>   |
|--|---|
| 7  | Furthermore, the stipulation addressed the prudence of acquiring the High Prairie facility  |
| 8  | under the terms of the Build Transfer Agreement ("BTA") which necessarily included the  |
| 9  | site of the project:  |
| 10<br>11<br>12<br>13<br>14<br>15<br>16<br>17<br>18 | Prudence: The Signatories agree that they shall not challenge the prudence<br>of the decision to acquire the facility under the terms of the BTA, including<br>Non-Compliant wind turbine generators under the terms of the BTA, and to<br>merge TG High Prairie, LLC into Ameren Missouri if the acquisition of the<br>facility closes pursuant to the BTA. Nothing in this Stipulation limits the<br>ability of any Signatory or other party from challenging the prudency of the<br>design, construction costs, interconnection costs, and all other project<br>related costs, including costs impacted by construction duration. <sup>4</sup> |
| 19   | The Stipulation and Agreement also identified conditions related to wildlife impacts as a   |
| 20   | result of issues raised by Missouri Department of Conservation and OPC in that case.  |
| 21<br>22<br>23<br>24<br>25                         | <ul><li>Wildlife: Appendix A attached hereto and incorporated herein by this reference reflects terms and conditions agreed upon by the Signatories relating to conservation issues raised in testimony in this case.<sup>5</sup></li><li>Dr. Marke acknowledges that wildlife concerns were raised in that docket in his testimony</li></ul>   |
| 26   | and that parties advised "the Company against the siting of High Prairie." <sup>6</sup> Appendix A of   |
| 27   | the Stipulation and Agreement describes that Ameren is required to take certain actions   |
| 28   | related to conservation of wildlife, including spelling out that some curtailment was a   |
| 29   | possibility:  |
| 30<br>31   | 8. Prior to commencement of operations at 6.9 meters/second or higher during the active bat season at night when temperatures are 50 degrees  |

<sup>&</sup>lt;sup>3</sup> Third Stipulation and Agreement, p. 2 (Emphasis added).
<sup>4</sup> Third Stipulation and Agreement, pp. 3-4.
<sup>5</sup> Third Stipulation and Agreement, p. 3.
<sup>6</sup> Marke Direct, p. 9.

| 1<br>2<br>3<br>4<br>5<br>6<br>7<br>8<br>9 |    | Fahrenheit or above, the Company will in good faith work with MDC toward the goal of reaching agreement on a research plan involving post-construction monitoring for a limited time period (between one and three years) and with appropriate confidentiality protections, to be conducted at the Company's expense for research purposes as a part of a collaboration between the Company and MDC relating to conservation issues with wind facilities, with such research plan to be implemented if an Incidental Take Permit for bats is not obtained and/or the Company operates the Project during the active season at a cut-in speed of 6.9 meters/second or higher. <sup>7</sup> |
|---|----|---|
| 10  |    | The Commission approved the Third Stipulation and Agreement,8 and, after a hearing  |
| 11  |    | unrelated to the CCN where OPC challenged the company's ability to use a RESRAM   |
| 12  |    | cost-recovery mechanism, approved the requested RESRAM.9 OPC appealed the   |
| 13  |    | RESRAM issue in court and the Court of Appeals affirmed the PSC decision. <sup>10</sup>   |
|   | •  |   |
| 14  | Q: | How do you respond to OPC's proposed disallowance related to siting of the  |

OPC's recommendation violates  |

MIEC witness Greg Meyer provides his calculations about foregone wind generation due 23 A: to nighttime curtailment at High Prairie to mitigate wildlife impact. He proposes "to reduce 24 the return portion paid by ratepayers for the High Prairie investment to recognize the 25

 <sup>&</sup>lt;sup>7</sup> Third Stipulation and Agreement, Appendix A.
 <sup>8</sup> Order Approving Third Stipulation and Agreement, Case No. EA-2018-0202, Doc. No. 101.
 <sup>9</sup> Report and Order, Case No. EA-2018-0202, Doc. No. 142.

<sup>&</sup>lt;sup>10</sup> Office of The Public Counsel v. Missouri Public Service Commission, 591 S.W.3d 478.

reduced output the wind farm is currently not generating."<sup>11</sup> His calculations appear to
 apply this reduction to the entire lifetime value of High Prairie rather than the discrete, and
 possibly temporary, ongoing curtailment time-periods.<sup>12</sup> He states that because the
 curtailments are related to improperly-identified "environmental" concerns – it is more
 accurate to describe them as "wildlife concerns" - customers should not pay for the entire
 wind project.<sup>13</sup>

7

#### **Q:** How do you respond to MIEC?

A: As a signatory to the stipulation and agreement, MIEC is also bound not to challenge the
prudence of acquiring the project at the High Prairie site. Despite raising similar concerns
and project disallowance as OPC, MIEC couches its objections to full recovery as because
of Ameren's decision to curtail High Prairie's generation at certain nighttime periods due
to wildlife impacts. While MIEC's position is not a black-letter violation of the Stipulation
and Agreement, while OPC's position very much is such a violation, it should still be
rejected.

MIEC was a party and participant to the CCN case where wildlife issues and mitigation were discussed. I noted above this stipulation and agreement signed by MIEC specifies that curtailment would occur. Ameren's curtailment of High Prairie's wind turbines to comply with regulations was a foreseeable part of approving the CCN. Mr. Meyer's logic behind for his calculation of his disallowance is flawed and unreasonable.

#### 20 Q: Is the periodic curtailment of generation at High Prairie permanent?

<sup>&</sup>lt;sup>11</sup> Meyer Direct, p. 21.

<sup>&</sup>lt;sup>12</sup> Meyer Direct, p. 22.

<sup>&</sup>lt;sup>13</sup> Meyer Direct, p. 23.

| 1                                       | A:              | For the moment, we don't know. What we do know is Ameren is in the process of taking   |
|---|-----------------|--|
| 2                                       |                 | additional steps to manage conservation impact while maximizing energy production. In  |
| 3                                       |                 | response to Staff Data Request ("DR") 0855 on mitigation efforts, Ameren stated:   |
| 4<br>5<br>7<br>8<br>9<br>10<br>11<br>12 |                 | [It] is working on a multipronged strategy to minimize the impacts to protected bat species from operation of the High Prairie wind turbines and to ensure regulatory compliance. This multipronged approach includes outside engineering investigations of bat behaviors and habits, studies of meteorological tower data, development and procurement of an active curtailment system, development of a model curtailment system, as well as a trial installation and development of a deterrent system. These multiple efforts are intended to significantly reduce operational curtailments of the wind farm. <sup>14</sup>    |
| 13                                      |                 | MIEC's position and method assumes the curtailment periods will be permanent. Given  |
| 14                                      |                 | the availability of technology and Ameren's efforts noted in response to DR 0855, its  |
| 15                                      |                 | unreasonable to assume the project will be curtailed permanently.  |
|   |                 |  |
| 16                                      | Q:              | Do you have any other issues with MIEC's method of calculating a disallowance.   |
| 16<br>17                                | <b>Q:</b><br>A: | <b>Do you have any other issues with MIEC's method of calculating a disallowance.</b><br>Yes. For High Prairie to produce the wind energy portion that MIEC is not challenging,  |
|   |                 |  |
| 17                                      |                 | Yes. For High Prairie to produce the wind energy portion that MIEC is not challenging,   |
| 17<br>18                                |                 | Yes. For High Prairie to produce the wind energy portion that MIEC is not challenging, 100% of the investment made would still have to be made. Consider, if Ameren invested   |
| 17<br>18<br>19                          |                 | Yes. <sup>&</sup>lt;sup>14</sup> Ameren Response to Staff DR 0855.

1

2

impacts, customers either remain in the status quo or in fact are in a better position than if the project had been built out of state.

#### 3 Q: Do you have any other comments about the High Prairie wind project?

In addition to allowing customers to benefit from clean and economically affordable renewable generation, wind projects create a variety of other benefits, including: payments to landowners, construction jobs, and increased state and local tax revenues. Wind technicians are the fastest growing profession in the nation, and one of the fastest-growing job sectors in Missouri. Farmers can lease their land to wind energy producers and make money while continuing to farm their land. Counties see increased tax revenue. Building this wind farm here is good for Missouri, including Ameren's customers.

#### 11 IV. Keeping Current Program

#### 12 Q: How can Ameren improve its Keeping Current Program?

A: First, I want to note my support for the program and general agreement with the
recommendations identified in Staff's report in pages 187-189 related to administration of
the program. One aspect that can be improved is to ensure that all customers receiving lowincome utility assistance are provided opportunities to reduce their bills in the long-term.
When customers use energy more efficiently, their demand is reduced and their bills will

18 be lower. There are both short-term and long-term benefits.

#### 19 Q: What specific recommendation do you have?

20 A: In its Report, the Staff lists a series of recommendations from APPRISE, Inc. on the

21 program. Recommendation Number 14 states:

Energy Efficiency: Ameren should prioritize high usage Keeping Current
 Program participants for weatherization. They should educate landlords
 about the Program and encourage landlords to provide authorization for
 program measures.

In addition to weatherization, Ameren also has several low-income MEEIA
 programs - including the new PAYS® program. When a customer receives
 Keeping Current Funds, Ameren should educate them about its MEEIA offerings.
 In particular, I think the PAYS® program home assessments would be especially
 valuable in helping these customers.

# 6 Q: Why would offering Keeping Current recipients the PAYS® home assessment 7 be an improvement to the program?

8 A: Yes. The home assessment for PAYS® is a comprehensive energy audit. The audit
9 includes blower door and duct evaluation, historic usage analysis, and estimating
10 the cost and expected savings of the upgrades. During the home assessments, there
11 is an opportunity to distribute direct install measures that are pre-defined and
12 installed during the assessment.

If the assessment shows that improvements - such as insulation, air sealing,
 HVAC replacement, duct sealing, smart thermostats, and additional lighting create
 more savings to customers than the costs – customers could participate under
 PAYS® to lower their bills while saving energy more permanently.

17 Q: Are you suggesting that customers receiving energy assistance funds be
18 required to participate in PAYS®?

A. No. Although, I am a strong advocate for the program as a way for customers to
reduce energy consumption and save money, I do not believe customers should be
required to participate. However, even if a customer does not choose to participate,
there is still value and savings to conducting the home assessment. This value
includes, among other things, savings from direct install measures.

10

- 1 Q: Does this conclude your testimony?
- 2 A: Yes.

## CASE PARTICIPATION OF JAMES OWEN

| Date              | Proceeding               | Docket No.     | On Behalf of:  | Issues           |
