Public Comments Report
West 16th Sewer Company
Case No. SR-2008-0389

Date : 9/10/2008

Item	First Name	Last Name	City	State	Public Comments	Office Receiving Comment	Staff Person	Resolution
P200900019	kenneth	Emery	Sedalia	MO	We just had a increase and feel that it is too soon for another and this is to high. No one pays this much in side the city. Our water bill is just around 20. We should be charged by that. Two people are not using that much water.	PSC	JMR	Letter sent July 17, 2008.
P200900012	Kathy	Klinginsmith	Sedalia	MO	I hope the Public Commission Investigates this thoroughly and just does not grant a 100% increase for no valid reason. We suffered an increase last year and now Monsees has requested another exorbinant increase when nothing has changed.	PSC	JMR	Letter sent October 1, 2008., 2008.
P200900043	Brian	Koral	Sedalia	MO	See attached letter. Thank you.	PSC	JMR	Letter sent October 1, 2008., 2008.
P200900075	ERIC	LAPINE	SEDALIA	MO	W 16th Sewer just raised thier rates last year from \$18 to over \$26 a month. Now they want to double their rates over the increased amount. The Sedalia sewer Dept only charges \$8.18 per month based on 3000 gal water usage (an average month`s consumption) If we increase that to a summertime watering high of 12000 gal , the rate increases to only \$26.27. The request to charge us \$52.84 is outrageous. Please don`t raise our already high rates.	PSC	JMR	Letter sent October 1, 2008., 2008.
P200900033	Marsha	Metzner	Sedalia	MT	I understand an increase may be necessary, but this amount of an increase is ridiculous. I am totally against a 100% increase but would agree with a much smaller one.	PSC	JMR	Letter sent July 23, 2008.
P200900038	C	Palmer	Sedalia	MO	We startered with \$18.something a month and just a short time ago was rasied to \$26.42 a month. Now they want to raise to \$52.84 per month. I know everything is highter, but a 100% rasie? I belive this should have a very close see through. Thanks	PSC	JMR	Letter sent July 23, 2008.

P200900054	Robert	Paulson	Sedalia	MO	In regards to the request for a 100% increase: we just had a 47% increase a year ago and I have not seen any work being done on the sewer plant or even landscaping work. Last year's increase raised our rates from just slightly higher than Sedalia's rates to about double their rates. There is no explanation on the PSC web site to indicate why another increase is justified. I am opposed to anothe rincrease.	PSC	JMR	Letter sent October 1, 2008., 2008.
P200900017	Stephen	Stoddard	Sedalia	MO	I'm voicing my displeasure about this customer notice I received in the mail to increase my sewer rates again. This company just applied last year to increase our rates and you approved that so my rate went from \$18 a month to now over \$26 a month, a 40% increase. Now the following year this company wants another increase, 40% is NOT enough so lets go with 100% increase this time. Since moving here in 2004 my sewer is going to go from \$18 to \$53 a month are they on crack?	PSC	JMR	Letter sent October 1, 2008., 2008.
P200900018	Stephen	Stoddard	Sedalia	MO	I oppose this rate increase. Why do we have our sewer rate increased 140% over the last two or three years? Poor management of this sewer compnay means I need to pay more? This sewer company has never attended any homeowners ass. annual meetings in the last 4 yrs. to explain to us (Hunters Ridge) of the status of the sewer system and if there is any needed upgrades. All we get is a letter in the mail we are going to raise your rate a 100% let alone we raised the rate last year by 40%.	PSC	JMR	Letter sent October 1, 2008., 2008.
P200900016	Kevin	Woody	Sedalia	MO	The double rate increase is way to high. Already had one increase withing the last 2 years, now being doubled? TO MUCH	PSC	JMR	Letter sent July 17, 2008.
Letter	Kenneth & Charlotte	Cordy			See attached letter.	PSC	JMR	Letter sent July 23, 2008.
Letter	Murray & Sandy	Whitehead			See attached letter.	PSC	JMR	Letter sent July 23, 2008.

7/15/08

Public Service Commission:
Attn: Water / Sewer Dept.

SR- 2008- 0389.

As a retired couple living
on a fixed income we feel
this increase which doubles
our latest increase on monthly
sewer fees is not justified
and should not be approved.

Kenneth + Charlotte Cordry

To Whom It May Concern:

This letter references SR 2008-0389.

The proposed residential rate increase by the West Sixteenth Street Sewer Company is a 100% increase. It has been less than two years since we sustained a 47% increase. The number of houses on the system has not changed proportionately nor have we been advised of any substantial increase in the size or function of the system that would justify a 147% for services in less than two years. We, as homeowners, have only the Public Service Commission to help control this excessive rate increase. We have no other sewer service choices. We need your assistance in controlling these planned increases. Please review this matter and help us.

Sincerely,

Murray and Sandy Whitehead
1510 Hunter's Circle

SUBJECT: MO PSC CASE NO SR-2008-0389

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

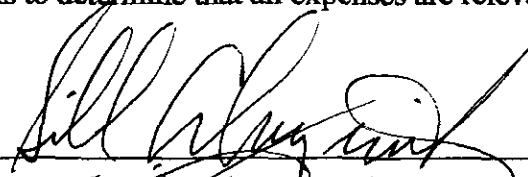

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally platted in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

SUBJECT: MO PSC CASE NO SR-2008-0389

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

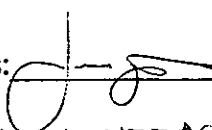

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally plated in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

SUBJECT: MO PSC CASE NO SR-2008-0389

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally plated in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally plated in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

SUBJECT: MO PSC CASE NO SR-2008-0389

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally plated in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally platted in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally plated in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

SUBJECT: MO PSC CASE NO SR-2008-0389

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally platted in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.

SUBJECT: MO PSC CASE NO SR-2008-0389

APPEAL IN OPPOSITION TO REQUESTED RATE INCREASE
BY 16TH STREET SEWER COMPANY OF SEDALIA MO

On 9 July 2008, West 16th Street Sewer Company submitted their Second Request for a rate increase in the last 22 months. The first request was granted by the Commission for a 47% increase (\$8.42) for a current charge of \$26.42 per month. Now the Sewer Company wants another 100% increase of \$26.42 per month, for a total charge of \$52.84 per month.

The residents of Hunter's Ridge are the sole customers of the West 16th Street Sewer Company, and we wish to strongly urge the Commission to deny this request.

We wish to make a point of the lack of knowledge by the owners and employees of the West 16th Street Sewer Company. In their request for an increase of \$26.42 they state that their annual revenue would be increased to \$52,946.00. We currently have 150 homes in our addition with none under construction. Multiplying 150 homes by the requested increase by the Sewer Company would yield \$47,556.00. The total annual revenue increase requested by the Sewer Company is based on the total number of lots that were originally platted in the subdivision. Some of these lots have been added to other lots or subdivided by adjoining owners.

We checked with the City of Sedalia and according to the City Collector, their assessment for monthly sewer connection of \$23.88 and has not changed in several years. The requested rate increase would place this addition at a disadvantage and tend to lower property values. We certainly are aware that we are at the mercy of the Commission to help us keep property values up by not saddling homeowners with an inflated monthly sewer charge.

We are confident that the Commission will perform an audit of the 16th Street Sewer Company books to determine that all expenses are relevant to the Sewer Company.
