RE: HT-2015-0262

Mr. Woodruff:

Filed through EFIS is the following steam tariff sheet for filing on behalf of KCP&L Greater Missouri Operations Company – For St. Joseph, Missouri and Environs, providing the current Quarterly Cost Adjustment per the Stipulation and Agreement in Case No. HR-2009-0092.

The tariff sheet, listed below, has an effective date of September 1, 2015.

Also filed are the supporting calculation worksheets.

In October 2014, the Company filed a QCA for its steam business reflecting an adjustment to the Coal Performance Standard as a result of the unavailability of Boiler 5 to operate at full capacity. A planned outage occurred May 17th, 2015 and is expected to run through July 18th, 2015 to repair Boiler 5 and restore its capability to operate at 250,000 PPH. This outage will impact the 2015 second and third quarters in the QCA that require further adjustment to the Coal Performance Standard. As outlined in 2. (c.), of the Quarterly Cost Adjustment Rider (QCA) – Steam Tariff, the Coal Performance Standard may be adjusted to reflect major scheduled outage for system maintenance and improvement. In such case, the three-month and twelve-month coal performance standard will be further adjusted proportionately as agreed to reflect any reduced availability of the Lake Road Boiler 5.

The aforementioned adjustment to the Coal Performance Standard is reflected in the current steam tariff sheet and supporting calculation worksheets. For further description and quantification of the Coal Performance Standard adjustment refer to the Lake Road Generating Station – Boiler 5 Outage document.

Mr. Morris Woodruff, Secretary
