

STATE OF MISSOURI  
PUBLIC SERVICE COMMISSION

At a session of the Public Service  
Commission held at its office  
in Jefferson City on the 11th  
day of August, 1992.

In the matter of the request for community optional )  
service from Contel of Missouri, Inc.'s Morrison ) Case No. TO-91-196  
exchange to Contel of Eastern Missouri, Inc.'s Hermann )  
exchange. )

ORDER OF DISMISSAL

The Commission has received a petition signed by residents of the  
Morrison exchange requesting extra-exchange calling at less than toll rates from  
the Morrison exchange served by Contel of Missouri, Inc. to the Hermann exchange  
served by Contel of Eastern Missouri, Inc.

By order issued November 20, 1990, the Commission directed Contel of  
Missouri, Inc. to perform a calling usage study covering one billing cycle in  
order to ascertain whether a sufficient community of interest exists between  
these exchanges to justify providing them with community optional service (COS).

On April 9, 1991, Contel of Missouri, Inc. filed the results of the  
calling usage study performed in said exchanges. The results of said study are  
as follows:

<u>Originating</u> <u>Exchange</u>	<u>Terminating</u> <u>Exchange</u>	<u>Average</u> <u>Calls Per</u> <u>Access Line</u>	<u>Percent</u> <u>Making</u> <u>2+ Calls</u>
Morrison	Hermann	6.439	56.07

In its Report and Order issued in Case No. TO-87-131, the Commission  
found that a community of interest would be demonstrated if a calling usage study  
showed that six calls per access line per month are made on the average from the  
petitioning exchange to the requested exchange and two-thirds of the customers  
in the petitioning exchange make two or more calls per month to the requested  
exchange. *In re the investigation of experimental extended measured service*  
(EMS), 30 Mo. P.S.C. (N.S.) 45 (1990).

Since the petitioned route did not demonstrate a sufficient community of interest, the Commission determines that this case should be dismissed.

Even though the COS petition in this case has been dismissed, customers may still be provided expanded calling through a statewide expanded calling scope plan currently under consideration by the Commission in Case No. TO-92-306. The plan under consideration would implement a Metropolitan Calling Area (MCA) service in St. Louis, Kansas City and Springfield. The MCA service modifies and expands the Wide Area Service Plan currently in place in St. Louis and Kansas City. The plan being considered by the Commission would also provide an Outstate Calling Area (OCA) service for those exchanges not included in an MCA. The OCA service would be an optional service offered for expanded calling beyond a customer's local exchange. The Commission is considering two alternatives for the scope of the OCA: a 23-mile radius from each exchange's central office or a 23-mile multipoint service measured from central office to central office.

Inquiries concerning the calling scope plan under consideration by the Commission should be directed to the Information Office of the Missouri Public Service Commission, P. O. Box 360, Jefferson City, Missouri 65102.

IT IS THEREFORE ORDERED:

1. That this case is hereby dismissed.
2. That this order shall become effective on the 21st day of August,

1992.

BY THE COMMISSION
