

STATE OF MISSOURI
PUBLIC SERVICE COMMISSION

At a Session of the Public Service
Commission held at its office
in Jefferson City on the 26th
day of August, 1992.

In the matter of the request for community)
optional service from Contel of Missouri's)
Lesterville exchange to Contel of Missouri's) Case No. TO-91-327
Annapolis and Ironton exchanges.)

ORDER OF DISMISSAL

The Commission has received a petition signed by residents of the
Lesterville exchange requesting extra-exchange calling at less than toll rates
from the Lesterville exchange served by Contel of Missouri, Inc. to the Annapolis
and Ironton exchanges served by Contel of Missouri, Inc.

By order issued May 10, 1991, the Commission directed Contel of
Missouri, Inc. to perform a calling usage study covering one billing cycle in
order to ascertain whether a sufficient community of interest exists between
these exchanges to justify providing them with community optional service (COS).

On September 17, 1991, GTE North, Incorporated, which previously
purchased Contel of Missouri, Inc.'s systems, filed the results of the calling
usage study performed in said exchanges. The results of said study are as
follows:

<u>Originating</u> <u>Exchange</u>	<u>Terminating</u> <u>Exchange</u>	<u>Average</u> <u>Calls Per</u> <u>Access Lines</u>	<u>Percent</u> <u>Making</u> <u>2+ Calls</u>
Lesterville	Annapolis	.809	8.15%
Lesterville	Ironton	4.118	46.92%

In its Report and Order issued in Case No. TO-87-131, the Commission
found that a community of interest would be demonstrated if a calling usage study
showed that six calls per access line per month are made on the average from the

petitioning exchange to the requested exchange and two-thirds of the customers in the petitioning exchange make two or more calls per month to the requested exchange. *In re the investigation of experimental extended measured service (EMS)*, 30 Mo. P.S.C. (N.S.) 45 (1990).

Since the petitioned routes did not demonstrate a sufficient community of interest, the Commission determines that this case should be dismissed.

Even though the COS petition in this case has been dismissed, customers may still be provided expanded calling through a statewide expanded calling scope plan currently under consideration by the Commission in Case No. TO-92-306. The plan under consideration would implement a Metropolitan Calling Area (MCA) service in St. Louis, Kansas City and Springfield. The MCA service modifies and expands the Wide Area Service Plan currently in place in St. Louis and Kansas City. The plan being considered by the Commission would also provide an Outstate Calling Area (OCA) service for those exchanges not included in an MCA. The OCA service would be an optional service offered for expanded calling beyond a customer's local exchange. The Commission is considering two alternatives for the scope of the OCA: a 23-mile radius from each exchange's central office or a 23-mile multipoint service measured from central office to central office.

Inquiries concerning the calling scope plan under consideration by the Commission should be directed to the Information Office of the Missouri Public Service Commission, P. O. Box 360, Jefferson City, Missouri 65102.

IT IS THEREFORE ORDERED:

1. That this case is hereby dismissed.

2. That this order shall become effective on September 9, 1992.

BY THE COMMISSION
