Subject: The Mains Allocator for Summit

The Company's mains allocator was based on January and February usage for each class in GR-2014-0086. Staff used the Company's values but combined several classes to match the Staff's COS classes. For example, the Company's Branson COOS had two classes for residential customers, GS-RES and GS-RES-OP. Staff had a single class for residential and combined the two values. $9.53\% + 1.31\% = 10.84\%$
