

STATE OF MISSOURI
PUBLIC SERVICE COMMISSION

At a Session of the Public Service
Commission held at its office
in Jefferson City on the 21st
day of August, 1992.

In the matter of the request for community)
optional service from Southwestern Bell)
Telephone's Center exchange and New) Case No. TO-91-187
London Telephone's New London exchange.)

ORDER OF DISMISSAL

The Commission has received a petition signed by residents of the Center exchange requesting extra-exchange calling at less than toll rates from the Center exchange served by Southwestern Bell Telephone Company to the Perry exchange served by Contel of Missouri, Inc. and the New London exchange served by New London Telephone Company.

By order issued November 27, 1990, the Commission directed Southwestern Bell Telephone Company to perform a calling usage study covering one billing cycle in order to ascertain whether a sufficient community of interest exists between these exchanges to justify providing them with community optional service (COS).

On March 21, 1991, Southwestern Bell Telephone Company filed the results of the calling usage study performed in said exchanges. The results of said study are as follows:

<u>Originating Exchange</u>	<u>Terminating Exchange</u>	<u>Average Calls Per Access Lines</u>	<u>Percent Making 2+ Calls</u>
Center	Perry	4.97	40.48%
Center	New London	5.89	48.61%

In its Report and Order issued in Case No. TO-87-131, the Commission found that a community of interest would be demonstrated if a calling usage study

showed that six calls per access line per month are made on the average from the petitioning exchange to the requested exchange and two-thirds of the customers in the petitioning exchange make two or more calls per month to the requested exchange. *In re the investigation of experimental extended measured service (EMS)*, 30 Mo. P.S.C. (N.S.) 45 (1990).

Since the petitioned routes did not demonstrate a sufficient community of interest, the Commission determines that this case should be dismissed.

Even though the COS petition in this case has been dismissed, customers may still be provided expanded calling through a statewide expanded calling scope plan currently under consideration by the Commission in Case No. TO-92-306. The plan under consideration would implement a Metropolitan Calling Area (MCA) service in St. Louis, Kansas City and Springfield. The MCA service modifies and expands the Wide Area Service Plan currently in place in St. Louis and Kansas City. The plan being considered by the Commission would also provide an Outstate Calling Area (OCA) service for those exchanges not included in an MCA. The OCA service would be an optional service offered for expanded calling beyond a customer's local exchange. The Commission is considering two alternatives for the scope of the OCA: a 23-mile radius from each exchange's central office or a 23-mile multipoint service measured from central office to central office.

Inquiries concerning the calling scope plan under consideration by the Commission should be directed to the Information Office of the Missouri Public Service Commission, P. O. Box 360, Jefferson City, Missouri 65102.

IT IS THEREFORE ORDERED:

1. That this case is hereby dismissed.

2. That this order shall become effective on September 1, 1992.

BY THE COMMISSION
