Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from the Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Case Number: EA-2014-0207

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from the Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.
