

Dear Missouri Public Service Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Strengthening our region's economy by creating new jobs is a key component to improving our quality of life. The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

The wind energy delivered by the Grain Belt Express Clean Line will provide our state with a new source of clean, renewable, and competitively priced electricity. The low-cost energy will benefit residents and businesses in Missouri by diversifying the power generation mix and by putting downward pressure on wholesale electricity prices.

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri and my community. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Re: Support for Grain Belt Express Clean Line

Dear Commissioners:

Strengthening our region's economy by creating new jobs is a key component of improving our quality of life. Also important are efforts to provide competitively priced, reliable, and clean energy. Projects such as the proposed Grain Belt Express Clean Line, which will transmit wind-generated energy from Kansas to Missouri and other states, advance both of these objectives.

The Grain Belt Express Clean Line will spur economic growth in our region. The transmission line and resulting increase in demand for wind turbines and their components will result in billions of dollars of investment in energy infrastructure. Many of the materials and services needed to construct the transmission line and wind farms can be provided by companies in Missouri.

GRAIN BELT EXPRESS  
CLEAN LINE

June 05, 2014

Dear Commissioners Sievers, Wright, and Albrecht:

I am writing to express support for the Grain Belt Express Clean Line, a transmission line that will enable more than 3,500 megawatts of new wind energy projects to be built in Kansas.

Kansas has a rich history of exporting our products across the nation, and it has helped our economy grow. Now Kansas has the opportunity to export wind energy, but the existing transmission grid is limiting our ability to do so. The Grain Belt Express Clean Line offers a solution that will enable us to export wind energy to larger markets.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Justin Cline  
St. Louis, MO

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

This project will create much needed jobs and job support.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

donna smith

Johann Bruhn  
Columbia, MO

March 29, 2014

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

The source of clean energy is in Kansas. By putting in a high voltage line from Kansas to Sullivan Indiana the energy will be near to where it is needed. I would like the line to be a high voltage direct current (HVDC) because there is less loss in the transmission. AC lines lose about 15% while HVDC lines lose 4.54% over 600 miles.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

John Bohney  
St. Louis, MO

March 29, 2014

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102-0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Kansas is the source of clean energy it is needed in Indiana. Missouri is expected to gain from taxes on the line as well as more wealth for individuals. High voltage DC losses are lower than AC transmission losses. It's good for the counties, State, and nation.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

John Bohney  
Chesterfield, MO

April 01, 2014

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

We are a very small business in Missouri and need every job we can get. With economic slowdown of the last 8 years, changes in the health mandates, and new taxes, it's really difficult to keep a small company afloat, much less try to grow. We could really use the benefits of working with Clean Line on this job.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

william kirkpatrick  
La Plata, MO

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Clean energy is the future.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

luke lenhardt  
Lee's Summit, Mi

April 30, 2014

Missouri Public Service Commission  
200 Madison Street, PO Box 360  
Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

Burn less coal, produce less toxic ash waste, produce more clean energy for MO! It only makes sense. In Labadie, where we are fighting to stop the placement of toxic ash in the water table of the floodplain, we know just how much 500,000 tons of ash waste/yr looks like and the implications of continuing down the path of coal dependency.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Patricia Schuba  
Labadie, MO

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

I have believed in this country be self sustainable. The only way we can do that is to use the resources we have at home, Wind, Water and Solar generated power should have been used many years ago, and to waste them should be a crime.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Sincerely,

Carl Taplin

Jefferson City, MO 65102- 0360

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

I think it's a good project that will add manufacturing and construction jobs for Missouri corporations when the line is designed, purchased and built. The line will also strengthen and reinforce the electrical transmission infrastructure.

The biggest reasons I support this project are:

- Job Creation
- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings
- HVDC Technology

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.

Dear Commissioners:

I urge you to approve Grain Belt Express Clean Line's application for a Certificate of Convenience and Necessity. The Grain Belt Express Clean Line is a 750-mile, direct current transmission line that will serve the public interest by creating new jobs, giving much needed tax revenue to rural communities, and providing Missourians access to low-cost, clean energy.

As a civil and environmental engineering student, I've learned that a major barrier to wind energy is the lack of transmission to carry it to places that can use it. The Grain Belt project is an opportunity to combat this problem and Missouri has the chance to be a leader by choosing to approve it.

The biggest reasons I support this project are:

- New Investment
- New Wind Energy Generation
- Powering Homes at a Lower Cost
- Pollution Reduction
- Water Savings

The Grain Belt Express Clean Line represents an exciting opportunity for the state of Missouri. I support the Grain Belt Express Clean Line and urge you to provide the regulatory approvals required to move the project forward.
