

Philip Dahlheimer, Saint Louis, MO.

Hello,

I recently received an email from Spire Gas President, Scott Carter. In this letter he shares his concern of not being able to guarantee the deliver of natural gas to the homes in Missouri.

I am outraged that an environmental group has block regulatory approval of the new pipeline at a time where Missourians will need this life blood fuel to heat our homes, cook our food and allow for a hot shower.

I am a senior citizen and am retiring from my job on New Years Eve Day. Now that I have the news that I might be in a cold (or freezing home) is an outrage.

I am voicing my demand that all government agencies use every legal avenue to allow Spire Gas to continue to supply natural gas to the residents of Missouri.

Regards,
Philip Dahlheimer
