

STATE OF MISSOURI  
PUBLIC SERVICE COMMISSION

At a Session of the Public Service  
Commission held at its office  
in Jefferson City on the 25th  
day of August, 1992.

In the matter of the request for community )  
optional service from GTE North's Unionville )  
exchange to Northeast Missouri Rural Telephone's )  
Martinstown and Omaha exchanges and Grand River ) Case No. TO-91-367  
Mutual Telephone's Lucerne, Newton and )  
Powersville exchanges. )

ORDER OF DISMISSAL

The Commission has received a request from the County Commission of Putnam County, Missouri, requesting extra-exchange calling at less than toll rates from the Unionville exchange served by GTE North, Incorporated to the Martinstown and Omaha exchanges served by Northeast Missouri Rural Telephone Company and the Lucerne, Newton and Powersville exchanges served by Grand River Mutual Telephone Corporation.

By order issued May 31, 1991, the Commission directed GTE North, Incorporated to perform a calling usage study covering one billing cycle in order to ascertain whether a sufficient community of interest exists between these exchanges to justify providing them with community optional service (COS).

On September 10, 1991, GTE North, Incorporated filed the results of the calling usage study performed in said exchanges. The results of said study are as follows:

<u>Originating</u> <u>Exchange</u>	<u>Terminating</u> <u>Exchange</u>	<u>Average</u> <u>Calls Per</u> <u>Access Lines</u>	<u>Percent</u> <u>Making</u> <u>2+ Calls</u>
Unionville	Martinstown	.68	8.03%
Unionville	Omaha	.75	8.03%
Unionville	Lucerne	.59	7.91%
Unionville	Newton	.23	10.14%
Unionville	Powersville	.25	3.93%

In its Report and Order issued in Case No. TO-87-131, the Commission found that a community of interest would be demonstrated if a calling usage study showed that six calls per access line per month are made on the average from the petitioning exchange to the requested exchange and two-thirds of the customers in the petitioning exchange make two or more calls per month to the requested exchange. *In re the investigation of experimental extended measured service (EMS)*, 30 Mo. P.S.C. (N.S.) 45 (1990).

Since the petitioned routes did not demonstrate a sufficient community of interest, the Commission determines that this case should be dismissed.

Even though the COS petition in this case has been dismissed, customers may still be provided expanded calling through a statewide expanded calling scope plan currently under consideration by the Commission in Case No. TO-92-306. The plan under consideration would implement a Metropolitan Calling Area (MCA) service in St. Louis, Kansas City and Springfield. The MCA service modifies and expands the Wide Area Service Plan currently in place in St. Louis and Kansas City. The plan being considered by the Commission would also provide an Outstate Calling Area (OCA) service for those exchanges not included in an MCA. The OCA service would be an optional service offered for expanded calling beyond a customer's local exchange. The Commission is considering two alternatives for the scope of the OCA: a 23-mile radius from each exchange's central office or a 23-mile multipoint service measured from central office to central office.

Inquiries concerning the calling scope plan under consideration by the Commission should be directed to the Information Office of the Missouri Public Service Commission, P. O. Box 360, Jefferson City, Missouri 65102.

IT IS THEREFORE ORDERED:

1. That this case is hereby dismissed.

2. That this order shall become effective on September 4, 1992.

BY THE COMMISSION
