Off-Network Service Roaming — Sprint also provides off-network service-known as roaming-on other wireless networks for those occasions when you need to make a call and you're not in a PCS Service Area. While you're roaming, some features may not be available, and you may incur additional per-minute charges.

Additional PCS Service — As always, you can get crystal-clear calls in these areas as well as on the Sprint Nationwide PCS Network. In these areas, however, PCS VisionSM is not available.

Service area maps approximate our service areas based on computer-generated radio-frequency coverage projections and information provided by third parties, but are not a guarantee of service availability. Actual coverage, quality and availability of coverage may vary based on network capacity, problems, signal strength, your equipment, terrain, weather and other limitations or conditions. Planned service areas are subject to change. Local service in some areas is managed and provided under contract with Sprint by independent Affiliates.

MAP INFORMATION: Our coverage maps approximate our wireless coverage area outdoors, which may vary from location to location and may include locations with limited or no coverage. They do not guarantee service availability. Even within a coverage area, factors, including without limit: network changes, traffic volume, service outages, technical limitations, signal strength, your equipment, terrain, structures, foliage, weather and other conditions, may interfere with actual service, quality and availability, including the ability to make, receive and maintain calls. Portions of the mapped areas include networks operated by our partners and affiliates and we are not responsible for the performance of those networks. IMPORTANT MAP INFORMATION

This map is not a guarantee of coverage, contains areas with no service, and is a general prediction of where rates and outdoor coverage apply, largely based on our internal data.

The Local DigitalChoice map includes networks operated by other carriers and some of the coverage depicted is based on their information and public sources and we cannot ensure its accuracy. Some Included Features and Optional Services are not available throughout the Local DigitalChoice Home Airtime Rate and Coverage Area. Wireless service is subject to limitations, particularly near coverage boundaries and remote areas. Equipment, topography and environmental considerations also affect service, which may vary significantly within buildings. All-Digital devices will not operate or be able to make 911 calls when digital service is not available, even when in the Local DigitalChoice Home Airtime Rate and Coverage Area.
