

EC-2023-0395
Brett Felber
Vs
Ameren Missouri

Counsel, in response to your second set of data requests, just admit instead of further lying that the copy sent that shows the payment agreement date of May 22, 2023, not May 18, 2023. The sooner you admit that Ameren is in the wrong and services are restored properly, everyone can move on .

It is from Ameren Missouri Customer Service as it shows in the titling of the agreed terms and conditions. In addition, I sent it in JPEG so it couldn't be altered. In JPEG it protects I and you from any alteration.

It shows the date it was sent and the terms. That is Ameren's email address in it as well. Quit with the pathological lies, like you have done and restore services immediately.

You have until the end of business Tuesday to restore services, otherwise I will proceed with an emergency restoral petition for breach of contract, agreement, attorney misconduct. Hindrance of evidence that would have resulted in an immediate restoral of services.

Also, it is hypocritical that you state I have said words of disparaging and inflammatory, yet you've done the same thing in all your responses about me. Works both ways.

Either restore services or deal with the lawsuits filed against you and a new one for a clear breach of contract and agreement and will result in a restoral petition being filed outside of the PSC and in civil courts.

You are also trying to have the PSC interfere and commit tortious interference, which I highly discourage as you had a lawsuit filed against you personally for requesting your "golden rule" conference.

Have fun with Kangaroo Court! Doesn't look like they can help with the lawsuits and the new one for an illegal disconnection that is coming your way!

FYI, respond to the lawsuits filed, instead of asking the Commission to Obstruct and Interfere with them, if you aren't presented to restore services. Just more to the total of my claims filed in civil court!
