

Sandra H Klevorn, St. Louis, MO.

This pipeline is a lifeline to us in the Eastern section of Missouri. We will freeze in the winter if you shut it down. We won't be able to go to work, etc. You cannot think that everyone has a fireplace, and wood to burn? Have you come up with a way to keep us warm or hot water in place of shutting it down? Use your common sense, what is happening to America? Don't shut the pipeline down, ever our lives depend on it, millions do.
