Company with a detailed accounting of the actual cost of construction (excluding income taxes).

- (2) The pipe used in making extensions under this rule shall be of a type and size which will be adequate to supply the area to be served. If the area is to be served by conventional gravity piping, an 8-inch minimum diameter shall be required. Such determination as to size and type of pipe shall be left solely to the judgement of the Company. If the Company desires a pipe size, lift station or treatment facility larger than reasonably required to provide service to the lots abutting said extension area, the additional cost due to larger size shall be borne by the Company.
- (3) The Company, or its representative, shall have the right to inspect and test the sewer extension prior to connecting it to the Company's collecting sewers.
- (4) Connection of the extension to existing Company collecting sewers shall be made only by a duly authorized representative of the Company.
