Case No. ES-2007-0458

**STAFF'S MOTION TO NOT FILE INTERIM INCIDENT REPORT**

COMES NOW the Staff of the Missouri Public Service Commission (Staff) and, in response to the Missouri Public Service Commission's September 7, 2007, *Order Directing Staff to File Report*, states:

1. In its *Order Directing Staff to File Report*, the Missouri Public Service Commission (Commission) ordered, "The Commission's Staff shall file either its final incident report or an interim incident report no later than November 30, 2007."

2. The Staff recently learned Kansas City Power & Light Company (KCPL) plans to complete, by December 7, 2007, its final report on the May 9, 2007, superheater attenuator spray water pipe failure at the Iatan Generating Station which KCPL operates near Weston, Missouri, that caused the deaths of two KCPL employees and critically injured another.

3. KCPL is to make its response to OSHA's citations by November 28, 2007.

4. The Staff just learned that KCPL has retained an outside consultant to develop a flow accelerated corrosion monitoring program for which KCPL executive approval is not expected before December 31, 2007.

5. Once the Staff has completed its final report, the Staff plans to provide the report to KCPL to review for information KCPL deems should not be made publicly available.

6. Rather than filing an additional interim report November 30, 2007, followed by a final report by the end of January 2008, the Staff requests that the Commission, instead, allow the Staff until January 2008 to file a final report on this incident.

WHEREFORE, the Staff requests the Commission, rather than requiring the Staff to file an interim or final report on November 30, 2007, instead allow the Staff to file the Staff's final report by January 31, 2008.

Respectfully submitted,

/s/ Nathan Williams
