Re: Dispute and Complaint for Access Traffic Terminating over Local Trunks –  
Missouri

Dear Mr. Kohly:

CenturyTel of Missouri, LLC and Spectra Communications Group, LLC (collectively referred to as "CenturyTel") have determined that Socket Telecom, LLC ("Socket") has been terminating certain access calls as local calls in violation of our Interconnection Agreement ("ICA") in the state of Missouri. Pursuant to Article V Section 11.1.2.1 and 11.1.2.2, CenturyTel and Socket shall provide separate trunk groups to originate and terminate IXC traffic calls. As further clarification, the ICA states under 11.1.3.2 "Neither Party shall route IXC Switched Access Service traffic over local interconnection trunks or Local Traffic over Switched Access Service trunks". Further, Commission Rule 4 CSR 240-29.050(4) prohibits IXC traffic on local interconnection trunks once the parties have established separate trunk groups.

CenturyTel has reviewed a portion of its call records and has found that Socket is terminating IXC toll traffic over its local trunks to CenturyTel; Socket Telecom's long distance affiliated CIC code of 0538 is appearing on traffic routed over the local interconnection trunks, which is a direct violation of the ICA.

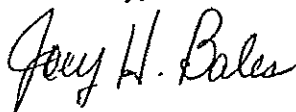

The following trunk group breakdown is:

St. James Local, Columbia Main TDM intra-lata Local, Licking Local, Branson Local, St. Peters Local, Troy and Warrenton Local, O'Fallon Local, Wentzville Local and Wentzville TDM intra-late Local.

This improper routing of access calls to local trunks must cease immediately. CenturyTel requests a written full statement from Socket as to the scope and extent of the improperly routing of traffic. In addition, CenturyTel request an explanation of how this misrouted traffic occurred and verification that the problem has been permanently corrected no later than 30 business days from the date of the letter or by July 31, 2008.

CenturyTel will calculate the amount that will be back billed for the IXC traffic in question and Socket shall be responsible for payment in full of all charges. Your immediate attention in resolving this issue will be appreciated.

Sincerely,

JOEY H. BALES

CenturyTel
