Subject: RE: Implementation of New ICA

Friday would be our preference but we can make Monday work. In general, we have a series of network projects that have been on hold pending the new ICA. We would like to initially talk about the following items -

- 1) CLEC profile - we will have this updated and provide it prior to the call. We will be able to answer any questions about it.
- 2) Branson Interconnect - forecast to follow shortly
- 3) What to do with existing Spectra interconnects
- 4) We have some general forecasting questions as far as forecasting UNEs and resold circuits.
- 5) Obtaining network information regarding the exchange of Columbia and Wentzville such as what general areas are covered by each wirecenter. This is necessary to be able to evaluate establishing additional interconnections in the Columbia exchange and to meet our forecasting obligations.

Subject: RE: Implementation of New ICA

I am working on it for either Friday, Monday or Tuesday. We have determined that the other days are impossible. Do you have a preference? In order to reduce the required attendees and scope, it may be helpful to target the call around certain areas. Can you send me the items you would like on the agenda?

Susan

Susan,

Any luck on setting a call up regarding implementing the new ICA?

Thanks,

Matt Kohly

Subject: Implementation of New ICA

Susan,

Based upon the Commission's orders that were issued yesterday, our new interconnection agreements become effective on October 13, 2007. I would like to schedule a meeting on that day or soon as possible afterwards to talk about implementing the ICA as well as discuss some of the network interconnection projects that Socket wants to do as part of implementing the ICA. Prior to that time, I will provide copies of interconnection trunk forecasts. We are currently working to complete the CLEC profile information and will have that to you as well.

Please let me know your availability to have this discussion.

Matt Kohly
