| Data Request No. | 0069 |
| Company Name | MO PSC Staff-(All) |
| Case/Tracking No. | EO-2019-0067 |
| Date Requested | 4/1/2019 |
| Issue | Expense - Operations - Fuel Expenses |
| Requested From | Jeff Keevil |
| Requested By | Lena Mantle |
| Brief Description | Lake Road Auxiliary Power |
| Description | Did Staff include the GMO steam operations requirements when modeling the fuel usage to estimate normalized fuel costs in rate cases ER-2012-0156 and ER-2016-0156? |
| Response | No case with the designation ER-2012-0156 is filed within EFIS. Assuming that OPC meant to reference Case No. ER-2012-0175, Staff performed a review of available workpapers and did not find any evidence that GMO industrial steam operations requirements were included when modeling the fuel usage to estimate normalized fuel costs. In Case No. ER-2016-0156 Staff did not include GMO industrial steam operations requirements when modeling the fuel usage to estimate fuel costs. Units 1, 2, and 3 are fed steam by the same set of boilers that are used by the Company to make steam for sale to industrial steam customers. There is sufficient boiler capacity at the Lake Road Plant to serve the needs of both the industrial steam customers and the electric customers simultaneously. Therefore, the industrial steam business at Lake Road was not modeled in any way and Units 1, 2, and 3 at Lake Road were modeled as "electric only."
