Subject: RE: Remote Call Forward changes for Socket--denied

Scott-

Please accept this as a response to your request submitted earlier today to reconfigure various Remote Call Forwarded (RCF) lines that are currently forwarded to 888-720-4045. Please note that CenturyTel is denying the request on the grounds that it is inconsistent with the RCF tariff.

Section 6.B.2 of the tariff provides that "RCF service can not be used for toll by-pass." The RCF lines that are the subject of your request are currently forwarded to an inter-exchange 888 service which is appropriate given that calls to the forwarded RCF number will be answered outside of the local calling area. Your request would instead have these RCF lines be forwarded to a supposed local number even though the calls would continue to be answered outside of the local calling area. This would result in a toll bypass arrangement and is not allowed under the RCF tariff.

CenturyTel would be willing to re-evaluate this determination if you can make a showing that, contrary to the above statement, calls to the RCF number would in fact be answered within the local calling area. In the mean time, your request will be denied and the RCF lines will continue to be forwarded to the 888 number (or any other appropriate inter-exchange toll service of your choice). Of course you always also have the option of terminating the RCF service if it no longer meets your needs.

Thank you-
Gelene

Subject: Remote Call Forward changes for Socket

Please have the following change orders placed for existing Remote Call Forward lines. All of the numbers are currently configured to route to 888-720-4045. I need each of those numbers forwarded to the numbers listed in the last column. Please send order numbers and due dates when they are received.

City
