

The Company's increased operating expenses come primarily from sewer construction in surrounding areas, not Timber Park. The undersigned, find this proposed increase of 116% in 3 years to be wildly excessive, and therefore urge the Missouri Public Service Commission to reject it. If that is not done, then we ask that Timber Park sub division (the original site of the sewer plant and sewer line) be grandfathered in at the current sewer rates, as most of the sewage goes through our neighborhood to reach the new sewer plant.

Timber Park Home Owners Association Petition

The Timber Creek Sewer Company has proposed to the Missouri Public Service Commission (request number QS-2007-0008) increase sewer rates to \$35.67 per month, an increase of 32% over current rates. This comes on top of a 63% increase in July 2004.

The Company's increased operating expenses come primarily from sewer construction in surrounding areas, not Timber Park. the undersigned, find this proposed increase of 116% in 3 years to be wildly excessive, and therefore urge the Missouri Public Service Commission to reject it. If that is not done, then we ask that Timber Park sub division (the original site of the sewer plant and sewer li be grandfathered in at the current sewer rates, as most of the sewage goes through our neighborhood to reach the new sewer plant.

Timber Park Home Owners Association Petition

Reason for Petition: The Timber Creek Sewer Company has proposed to the Missouri Public Service commission(request number QS-2007-0008) to increase sewer rates to \$35.67 per month, an increase of 32% over the current rates. This comes on top of a 63% increase in July of 2004.

The company's increased operating expenses come primarily from sewer construction in the surrounding areas, not Timber Park. We, the undersigned, find this proposed increase of 116% in 3 years to be wildly excessive, and therefore urge the Missouri Public Service Commission to reject it. If that is not done, then we ask that Timber Park sub division (the original site of the sewer plant and sewer lines) be grandfathered in at the current sewer rates, as most of the sewage goes through our neighborhood to reach the new sewer plant.
