#### Schedule RCS-1 QUALIFICATIONS OF RALPH C. SMITH

#### Accomplishments

Mr. Smith's professional credentials include being a Certified Financial Planner<sup>™</sup> professional, a Certified Rate of Return Analyst, a licensed Certified Public Accountant and attorney. He functions as project manager on consulting projects involving utility regulation, regulatory policy and ratemaking and utility management. His involvement in public utility regulation has included project management and in-depth analyses of numerous issues involving telephone, electric, gas, and water and sewer utilities.

Mr. Smith has performed work in the field of utility regulation on behalf of industry, public service commission staffs, state attorney generals, municipalities, and consumer groups concerning regulatory matters before regulatory agencies in Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Jersey, New Mexico, New York, Nevada, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Washington DC, West Virginia, Canada, Federal Energy Regulatory Commission and various state and federal courts of law. He has presented expert testimony in regulatory hearings on behalf of utility commission staffs and intervenors on several occasions.

Project manager in Larkin & Associates' review, on behalf of the Georgia Commission Staff, of the budget and planning activities of Georgia Power Company; supervised 13 professionals; coordinated over 200 interviews with Company budget center managers and executives; organized and edited voluminous audit report; presented testimony before the Commission. Functional areas covered included fossil plant O&M, headquarters and district operations, internal audit, legal, affiliated transactions, and responsibility reporting. All of our findings and recommendations were accepted by the Commission.

Key team member in the firm's management audit of the Anchorage Water and Wastewater Utility on behalf of the Alaska Commission Staff, which assessed the effectiveness of the Utility's operations in several areas; responsible for in-depth investigation and report writing in areas involving information systems, finance and accounting, affiliated relationships and transactions, and use of outside contractors. Testified before the Alaska Commission concerning certain areas of the audit report. AWWU concurred with each of Mr. Smith's 40 plus recommendations for improvement.

Co-consultant in the analysis of the issues surrounding gas transportation performed for the law firm of Cravath, Swaine & Moore in conjunction with the case of Reynolds Metals Co. vs. the Columbia Gas System, Inc.; drafted in-depth report concerning the regulatory treatment at both state and federal levels of issues such as flexible pricing and mandatory gas transportation.

Lead consultant and expert witness in the analysis of the rate increase request of the City of Austin - Electric Utility on behalf of the residential consumers. Among the numerous ratemaking issues addressed were the economies of the Utility's employment of outside services; provided both written and oral testimony outlining recommendations and their bases. Most of Mr. Smith's recommendations were adopted by the City Council and Utility in a settlement.

Key team member performing an analysis of the rate stabilization plan submitted by the Southern Bell Telephone & Telegraph Company to the Florida PSC; performed comprehensive analysis of the Company's projections and budgets which were used as the basis for establishing rates.

Lead consultant in analyzing Southwestern Bell Telephone separations in Missouri; sponsored the complex technical analysis and calculations upon which the firm's testimony in that case was based. He has also assisted in analyzing changes in depreciation methodology for setting telephone rates.

Lead consultant in the review of gas cost recovery reconciliation applications of Michigan Gas Utilities Company, Michigan Consolidated Gas Company, and Consumers Power Company. Drafted recommendations regarding the appropriate rate of interest to be applied to any over or under collections and the proper procedures and allocation methodology to be used to distribute any refunds to customer classes.

Lead consultant in the review of Consumers Power Company's gas cost recovery refund plan. Addressed appropriate interest rate and compounding procedures and proper allocation methodology.

Project manager in the review of the request by Central Maine Power Company for an increase in rates. The major area addressed was the propriety of the Company's ratemaking attrition adjustment in relation to its corporate budgets and projections.

Project manager in an engagement designed to address the impacts of the Tax Reform Act of 1986 on gas distribution utility operations of the Northern States Power Company. Analyzed the reduction in the corporate tax rate, uncollectibles reserve, ACRS, unbilled revenues, customer advances, CIAC, and timing of TRA-related impacts associated with the Company's tax liability.

Project manager and expert witness in the determination of the impacts of the Tax Reform Act of 1986 on the operations of Connecticut Natural Gas Company on behalf of the Connecticut Department of Public Utility Control - Prosecutorial Division, Connecticut Attorney General, and Connecticut Department of Consumer Counsel.

Lead Consultant for The Minnesota Department of Public Service ("DPS") to review the Minnesota Incentive Plan ("Incentive Plan") proposal presented by Northwestern Bell Telephone Company ("NWB") doing business as U S West Communications ("USWC"). Objective was to express an opinion as to whether current rates addressed by the plan were appropriate from a Minnesota intrastate revenue requirements and accounting perspective, and to assist in developing recommended modifications to NWB's proposed Plan.

Performed a variety of analytical and review tasks related to our work effort on this project. Obtained and reviewed data and performed other procedures as necessary (1) to obtain an understanding of the Company's Incentive Plan filing package as it relates to rate base, operating income, revenue requirements, and plan operation, and (2) to formulate an opinion concerning the reasonableness of current rates and of amounts included within the Company's Incentive Plan filing. These procedures included requesting and reviewing extensive discovery, visiting the Company's offices to review data, issuing follow-up information requests in many instances, telephone and on-site discussions with Company representatives, and frequent discussions with counsel and DPS Staff assigned to the project.

Lead Consultant in the regulatory analysis of Jersey Central Power & Light Company for the Department of the Public Advocate, Division of Rate Counsel. Tasks performed included on-site review and audit of Company, identification and analysis of specific issues, preparation of data requests, testimony, and cross examination questions. Testified in Hearings.

Assisted the NARUC Committee on Management Analysis with drafting the Consultant Standards for Management Audits.

Presented training seminars covering public utility accounting, tax reform, ratemaking, affiliated transaction auditing, rate case management, and regulatory policy in Maine, Georgia, Kentucky, and Pennsylvania. Seminars were presented to commission staffs and consumer interest groups.

#### Previous Positions

With Larkin, Chapski and Co., the predecessor firm to Larkin & Associates, was involved primarily in utility regulatory consulting, and also in tax planning and tax research for businesses and individuals, tax return preparation and review, and independent audit, review and preparation of financial statements.

Installed computerized accounting system for a realty management firm.

#### Education

Bachelor of Science in Administration in Accounting, with distinction, University of Michigan, Dearborn, 1979.

Master of Science in Taxation, Walsh College, Michigan, 1981. Master's thesis dealt with investment tax credit and property tax on various assets.

Juris Doctor, cum laude, Wayne State University Law School, Detroit, Michigan, 1986. Recipient of American Jurisprudence Award for academic excellence.

Continuing education required to maintain CPA license and CFP® certificate.

Passed all parts of CPA examination in first sitting, 1979. Received CPA certificate in 1981 and Certified Financial Planning certificate in 1983. Admitted to Michigan and Federal bars in 1986.

Michigan Bar Association.

American Bar Association, sections on public utility law and taxation.

Partial list of utility cases participated in:

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Common stock, par value \$0.01 per share Name of each exchange on which registered New York Stock Exchange, Inc.

Securities registered pursuant to Section 12(g) of the Act:

None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☑ No □

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes □ No ☑

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes 🗹 No 🗆

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☑ No □

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. □

#### **Table of Contents**

jurisdiction over our operations, and adversely affect our financial condition, results of operations, cash flows, liquidity and reputation. Any business interruption or other losses might not be covered by insurance policies or be recoverable in rates, and such losses may make it difficult for us to secure insurance at acceptable rates in the future.

# Contamination of our sources of water could result in service interruptions and human exposure to hazardous substances and subject our subsidiaries to civil or criminal enforcement actions, private litigation and cleanup obligations.

Our water supplies are subject to contamination, including contamination from naturally-occurring compounds, chemicals in groundwater systems, pollution resulting from man-made sources, such as perchlorate and methyl tertiary butyl ether ("MTBE"), and possible terrorist attacks. In the event that our water supply is contaminated, we may have to interrupt the use of that water supply until we are able to substitute the supply of water from another water source, including, in some cases, through the purchase of water from a third-party supplier. In addition, we may incur significant costs in order to treat the contaminated source through expansion of our current treatment facilities, or development of new treatment methods. If we are unable to substitute water supply in a cost-effective manner, our financial condition, results of operations, cash flows, liquidity and reputation may be adversely affected. We might not be able to recover costs associated with treating or decontaminating water supplies through rates, or such recovery may not occur in a timely manner. Moreover, we could be held liable for environmental damage as well as damages arising from toxic tort, contractual obligations or other lawsuits or criminal enforcement actions, or other consequences arising out of human exposure to hazardous substances in our drinking water supplies.

# Our business transformation initiative ("BT") involves risks, could result in higher than expected costs or otherwise adversely impact our operations and profitability.

We have undertaken a business transformation project, which is intended to upgrade our antiquated and manual processes and systems. This multi-year, enterprise-wide initiative is intended to support our broader strategic initiatives. The project is intended to optimize workflow throughout our field operations, improve our back-office operations and enhance our customer service capabilities. The scale and anticipated future costs associated with the business transformation project are significant and we could incur significant costs in excess of what we are planning to spend. Any technical or other difficulties in developing or implementing this initiative may result in delays, which, in turn, may increase the costs of the project. When we make adjustments to our operations, we may incur incremental expenses prior to realizing the benefits of a more efficient workforce and operating structure. Further, we may not realize the cost improvements and greater efficiencies we hope for as a result of the project. In addition, we can provide no guarantee that we will be able to achieve timely or adequate rate recovery of these increased costs associated with the transformation project.

Currently, we operate numerous systems that have varying degrees of integration, which can lead to inefficiencies, workarounds and rework. As such, delays in the initiative being put into service will also delay cost savings and efficiencies expected to result from the project. We may also experience difficulties consolidating our current systems, moving to a common set of operational processes and implementing a successful change management process. These difficulties may impact our customers and our ability to meet their needs efficiently. Any such delays or difficulties may have a material and adverse impact on our business, client relationships and financial results.

# Our liquidity and earnings could be adversely affected by increases in our production costs, including the cost of chemicals, electricity, fuel or other significant materials used in the water and wastewater treatment process.

We incur significant production costs in connection with the delivery of our water and wastewater services. Our production costs are driven by purchased water, chemicals used to treat water and wastewater as well as

#### **Table of Contents**

Our infrastructure investment plan consists of both infrastructure renewal programs, where we replace infrastructure as needed, and major capital investment projects, where we construct new water and wastewater treatment and delivery facilities to meet new customer growth and water quality regulations. Our projected capital expenditures and other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

Our projected capital expenditures and other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

During 2010, we continued to move forward with BT to enhance processes and upgrade antiquated legacy systems in order to generate efficiencies and provide more cost effective service to our customers. In 2010, we completed our evaluation of appropriate software solutions and selected our software vendor as well as our system integrator. During the fourth quarter of 2010, we began working with the system integrator to analyze our current processes and to design a blueprint for business processes and new systems that will enable business transformation. This work will continue through the first quarter of 2011. During the remainder of 2011, we will begin the detailed design and build of the Enterprise Resource Planning ("ERP") application. We expect to have all three enterprisewide systems or applications—the ERP, a new customer information system and an enterprise asset management system—implemented by the end of 2014.

Current estimates indicate that BT expenditures could total as much as \$280 million. Through December 31, 2010, we have spent \$34.5 million on the project. Expenditures associated with BT are included in the estimated capital investment spending of \$800 million to \$1 billion capital investment spending outlined above. As with any other initiative of this magnitude, there are risks that could result in increased costs. Any technical difficulties in developing or implementing this initiative, such as implementing a successful change management process, may result in delays, which in turn, may increase the costs of the project and also delay and, perhaps, reduce any cost savings and efficiencies expected to result from the initiative. When we make adjustments to our operations, we may incur incremental expenses prior to realizing the benefits of a more efficient workforce and operating structure. While we believe such expenditures can be recovered through regulated rates, we can provide no guarantee that we will be able to achieve timely rate recovery of these increased costs associated with this transformation project. Any such delays or difficulties encountered with such recovery may have a material and adverse impact on our business, customer relationships and financial results. We believe that the goals of BT—increasing our operating efficiency and effectiveness and controlling the costs associated with the operation of our business—are important to providing the quality service to our customers and communities we serve.

The following table provides a summary of our historical capital expenditures:

	For the Years Ended December 31,					
	2010	2009	2008			
		(in thousands)				
Transmission and distribution	\$299,303	\$309,851	\$ 399,597			
Treatment and pumping	133,473	125,031	186,480			
Services, meter and fire hydrants	157,982	153,455	224,089			
General structures and equipment	111,394	99,280	71,146			
Sources of supply	31,452	44,127	52,392			
Wastewater	32,032	53,521	75,102			
Total capital expenditures	\$765,636	\$785,265	\$1,008,806			

Capital expenditures during the periods noted above were related to the renewal of supply and treatment assets, construction of new water mains and customer service lines, as well as rehabilitation of existing water mains and hydrants.

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter.

Common Stock, \$0.01 par value—\$8,858,523,983 as of June 30, 2014.

Indicate the number of shares outstanding of each of the registrant's classes of common stock as of the latest practicable date.

Common Stock, \$0.01 par value per share—179,787,780 shares, as of February 19, 2015.

#### DOCUMENTS INCORPORATED BY REFERENCE

Schedule RCS-3 Page 1 of 2 Some of our Market-Based Operations enter into long-term contracts under which they agree to operate and maintain a municipality's, federal government's or other party's water or wastewater treatment and delivery facilities, which includes specified major maintenance for some of those facilities, in exchange for an annual fee. Our Market-Based Operations are generally subject to the risk that costs associated with operating and maintaining the facilities, including production costs such as purchased water, electricity, fuel and chemicals used in water treatment, may exceed the fees received from the municipality or other contracting party. Losses under these contracts or guarantees may adversely affect our financial condition, results of operations, cash flows and liquidity.

## Our inability to efficiently optimize and stabilize our recently implemented business transformation project, could result in higher than expected costs or otherwise adversely impact our internal controls environment, operations and profitability.

Over the past several years, we have implemented a "business transformation" project, which is intended to improve our business processes and upgrade our legacy core information technology systems. This multi-year, enterprise-wide initiative supports our broader strategic initiatives. The project is intended to optimize workflow throughout our field operations, improve our back-office operations and enhance our customer service capabilities. The scale and costs associated with the business transformation project were significant. Any technical or other difficulties in optimizing and stabilizing this initiative may increase the costs of the project and have an adverse effect on our operations and reporting processes, including our internal control over financial reporting. In August 2012, our new business systems associated with Phase I of our business transformation project became operational. Phase I consisted of the roll-out of the ERP, which encompassed applications that handle human resources, finance, and supply chain/procurement management activities. In the second quarter of 2013, we implemented Phase II of our business transformation project in a number of our regulated subsidiaries. In the fourth quarter of 2013, Phase II of our business transformation project was implemented in our remaining regulated subsidiaries. Phase II consisted of the roll-out of a new Enterprise Asset Management system, which manages an asset's lifecycle, and a Customer Information system, which contains all billing and collections data pertaining to American Water's customers for our Regulated segment. Although efforts have been made to minimize any adverse impact on our controls, we cannot assure that all such impacts have been mitigated.

As we make adjustments to our operations, we may incur incremental expenses prior to realizing the benefits of a more efficient workforce and operating structure. Further, we may not realize anticipated cost improvements and greater efficiencies from the project.

We operate numerous information technology systems that are in various stages of integration, sometimes leading to inefficiencies. Therefore, delays in stabilization and optimization of the business transformation project will also delay cost savings and efficiencies expected to result from the project. We may also experience difficulties consolidating our current systems, moving to a common set of operational processes and implementing a successful change management process. These difficulties may impact our ability to meet customer needs efficiently. Any such delays or difficulties may have a material and adverse impact on our business, client relationships and financial results.

## Our business has inherently dangerous workplaces. If we fail to maintain safe work sites, we can be exposed to financial losses as well as penalties and other liabilities.

Our safety record is critical to our reputation. We maintain health and safety standards to protect our employees, customers, vendors and the public. Although we intend to adhere to such health and safety standards it is unlikely that we will be able to avoid accidents at all times.

Our business sites, including construction and maintenance sites, often put our employees and others in close proximity with large pieces of equipment, moving vehicles, pressurized water, chemicals and other regulated materials. On many sites we are responsible for safety and, accordingly, must implement safety procedures. If we fail to implement such procedures or if the procedures we implement are ineffective or are not followed by our employees or others, our employees and others may be injured or die. Unsafe work sites also have the potential to increase employee turnover and raise our operating costs. Any of the foregoing could result in financial losses, which could have a material adverse impact on our business, financial condition, and results of operations.

In addition, our operations can involve the handling and storage of hazardous chemicals, which, if improperly handled, stored or disposed of, could subject us to penalties or other liabilities. We are also subject to regulations dealing with occupational health and safety. Although we maintain functional employee groups whose primary purpose is to ensure we implement effective health, safety, and environmental work procedures throughout our organization, including construction sites and maintenance sites, the failure to comply with such regulations could subject us to liability.

26

#### Our continued success is dependent upon our ability to hire, retain, and utilize qualified personnel.

The success of our business is dependent upon our ability to hire, retain, and utilize qualified personnel, including engineers, craft personnel, and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain

### Decision 12-06-016 June 7, 2012

### BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Application of California-American Water Company (U210W) for Authorization to Increase its Revenues for Water Service by \$4,134,600 or 2.55% in the year 2011, by \$33,105,800 or 19.68% in the 2012, by \$9,897,200 or 4.92% in 2013, and by \$10,874,600 or 5.16% in the year 2014.

Application 10-07-007 (Filed July 1, 2010)

And Related Matter.

Application 11-09-016

(See Attachment A for a list of appearances)

## DECISION ADOPTING THE 2011, 2012, 2013, AND 2014 REVENUE REQUIREMENT FOR CALIFORNIA-AMERICAN WATER COMPANY

This decision adopts the majority of the settled issues, with the exceptions listed below. A more detailed discussion of the approved settlement issues is contained in section 6.

## 3. Settled Issues Not Approved in this Decision

The settled issues we do not approve include:

- Regulatory Expenses
- Special Request #31 Walerga Special Facilities Fees (moved to Phase 2 for consideration);
- Non-revenue water reporting as volumes only;
- Non-revenue water reporting for the Monterey County District;
- Revisions to the Penalty/Reward Mechanism for the Monterey County District;
- Special Request #5 to establish a Water Revenue Adjustment Mechanism (WRAM) for the Sacramento District (moved to Phase 2 for consideration);
- Irrigation Rates for Larkfield, San Diego, Ventura, and Toro in the Monterey County District;
- Billing format changes;
- Advanced Metering Infrastructure;
- Volumetric rate structure for wastewater; and,
- Low-income surcredit increase (moved to Phase 2 for consideration).

A more detailed discussion of the settlement issues not approved is contained in section 7.

## 4. Disputed Issues Resolved in this Decision

This decision also resolves the disputed issues not contained in the settlement agreements. Some of the disputed items are:

• Special Requests #4, #11, #14, #19, #24, #32, #34,

- Supervisory Control and Data Acquisition System Update Costs;
- Domestic Production Activities Deduction; and,
- General Office Expense Adjustments.

A more complete discussion and resolution of the disputed items is contained in section 8.

## 5. Standards of Review

## 5.1. General Standard of Review

Cal-Am, as the applicant, bears the burden of proof to show that the regulatory relief it requests is just and reasonable and the related ratemaking mechanisms are fair.

## 5.2. Commission Rules on Settlements

The Commission's Rules of Practice and Procedure (Rules) specifically address the requirements for adoption of proposed settlements in Rule 12.1 *Proposal of Settlements,* and subject to certain limitations in Rule 12.5 *Adoption Binding, Not Precedential.*<sup>1</sup>

Rule 12.1(a) states:

Parties may, by written motion any time after the first prehearing conference and within 30 days after the last day of hearing, propose settlements on the resolution of any material issue of law or fact or on a mutually agreeable outcome to the proceeding. Settlements need not be joined by all parties; however, settlements in applications must be signed by the applicant....

<sup>&</sup>lt;sup>1</sup> <u>http://docs.cpuc.ca.gov/published/RULES\_PRAC\_PROC\_/105138-</u> <u>11.htm#P623\_143939</u>.

### 8.2. Income Tax and Related Issues

Cal-Am filed A.10-07-007 on July 1, 2010 claiming taxable income and expenses for the test year including \$2,698,590 in California Corporate Franchise Tax and \$10,282,710 in Federal Income Tax. Cal-Am's application also originally reflected certain tax deductions that reduce its revenue requirement request.

The Small Business Jobs Act was signed into law on September 27, 2010. The Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 was also enacted on December 17, 2010. Both laws affect aspects of Cal-Am's tax calculations. Because Cal-Am filed its application prior to the enactment of the laws, Cal-Am's rebuttal testimony addresses the impacts of the new laws on its tax situation.

## 8.2.1. Domestic Production Activity Deduction

Cal-Am claims that it is ineligible for the Domestic Production Activities Deduction (DPAD) because it is in a net operating loss position.<sup>26</sup> Cal-Am relies on D.09-03-007, the Suburban Water Company (Suburban) general rate case, in which the Commission found that if a deduction is not used, it should not be considered for ratemaking purposes. Cal-Am also requests approximately \$13 million in revenue requirement for California Corporate Franchise Tax and Federal Income Tax. Cal-Am's explanation for this apparent inconsistency is that the Commission requires Cal-Am to calculate income taxes for ratemaking purposes based on a "stand alone" basis and for tax reporting purposes on the American Water Works consolidated income tax return.<sup>27</sup>

<sup>&</sup>lt;sup>26</sup> Exhibit CAW-45 at 2.

<sup>&</sup>lt;sup>27</sup> Cal-Am Reply Brief at 14.

### A.10-07-007, A.11-09-016 ALJ/LRR/acr

DRA distinguishes the circumstances in this case from those in the Suburban case. Suburban showed an overall loss on its returns. Here, Cal-Am anticipates paying approximately \$12 million in California Corporate Franchise Tax and Federal Income Tax in 2012.<sup>28</sup>

TURN also objects to Cal-Am's explanation. TURN asserts that Cal-Am is asking ratepayers to fund tax obligations in the revenue requirement while also claiming a net operating loss, thus making Cal-Am ineligible to take tax deductions which reduce the revenue requirement for ratepayers. TURN points out that Cal-Am's own witness said that the net operating loss position is directly attributable to Cal-Am's WRAM deferrals and that absent the large deferrals, Cal-Am would have positive taxable income in 2011 and 2012.<sup>29</sup>

TURN recommends that the Commission remove the California Corporate Franchise Tax and Federal Income Tax request from the revenue requirement.<sup>30</sup> However, if the Commission relies on Cal-Am's original filing that assumes taxable income in 2012 for ratemaking purposes, then TURN recommends that the taxable income be reduced consistent with normal ratemaking adjustments such as the DPAD.<sup>31</sup>

We agree with DRA that the facts in Suburban are distinct from the facts here. Suburban did not include income taxes in its revenue requirement request for ratemaking purposes, and claimed a net operating loss for actual tax

<sup>&</sup>lt;sup>28</sup> Reporter's Transcript at 1145:22-27.

<sup>&</sup>lt;sup>29</sup> Reporter's Transcript at 1120:10-19.

<sup>&</sup>lt;sup>30</sup> TURN Opening Brief at 7.

<sup>&</sup>lt;sup>31</sup> TURN Opening Brief at 14.

reporting purposes. Suburban's tax situation was the same for both ratemaking and actual tax purposes.

We dislike inconsistent treatment of tax positions when the disparate treatment adversely impacts ratepayers, as it does in this case. As noted by TURN, Cal-Am includes the WRAM balances in income for ratemaking purposes, which results in taxable income. However, Cal-Am's calculation of its income for tax reporting purposes excludes the WRAM balances from income, which results in a net operating loss.<sup>32</sup>

The issue here is which of Cal-Am's tax positions should be used to determine whether the DPAD is applicable. In this case, because Cal-Am's tax position for ratemaking purposes resulted in income tax, it is reasonable to apply the DPAD to reduce the income tax obligation for ratemaking purposes.

In D.10-11-034, the Great Oaks Water Company general rate case, the Commission approved DRA's calculation of the DPAD. DRA uses the same methodology here as in the Great Oaks general rate case. DRA's methodology is supported by TURN. Cal-Am proposed a methodology in its initial application, but its rebuttal testimony claims that it is ineligible for the DPAD. As explained above, we disagree. Therefore we find DRA's DPAD methodology reasonable and we adopt it here.<sup>33</sup>

<sup>&</sup>lt;sup>32</sup> TURN Opening Brief at 12.

<sup>&</sup>lt;sup>33</sup> We note there is a pending application for rehearing of D.10-11-034. Today's decision does not and is not intended to prejudge the issues in the rehearing application, which will be addressed in a subsequent Commission Decision.

## 8.2.2. Cal-Am Repairs Deduction FIN 48<sup>34</sup>

This issue is no longer in dispute. In its reply brief, Cal-Am stated that it had inadvertently excluded the FIN 48 in its original application and it will accept its full repairs deduction which will increase deferred taxes.<sup>35</sup> On that basis, Cal-Am should remove from rate base the increased accumulated deferred income tax for 2010, 2011 and 2012 associated with its FIN 48 recorded deferred income tax.

### 8.2.3. Bonus Depreciation

Bonus depreciation is a result of the Economic Stimulus Act of 2008 (2008 Act) and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (2010 Act). The Acts permit a company to take deductions for investment in certain property recently purchased or acquired and placed into service. The 2008 Act added section 168(k) to the Internal Revenue Code that allows a company to take a 50% deduction or bonus depreciation of the adjusted basis of qualified property. The 2010 Act extended the 2008 Act and increased the deduction amount to 100%.

According to Internal Revenue Code Section 168(k)(2)(D)(iii), "taxpayers" are entitled to "elect" whether or not to take bonus depreciation at the legal entity level. Additionally, pursuant to Cal. Rev. & Tax Code § 24349, California does not allow bonus depreciation to be claimed on a California State income tax return.

<sup>35</sup> Cal-Am Opening Brief at 19.

<sup>&</sup>lt;sup>34</sup> FIN stands for Federal Accounting Standards Board Interpretation Number.

71. Cal-Am should recover group insurance expense based on the labor escalation rate pursuant D.04-06-018.

## Special Request #11 - Business Transformation Memorandum Account

72. Cal-Am's request for a memorandum account to track the difference between the business transformation project's original costs and actual costs is not reasonable.

73. Cal-Am's original estimate of the business transformation costs is reasonable.

74. Cal- original estimate of business transformation project costs should be moved into rate base via a Tier 2 advice letter filing once each phase is complete, used, and useful.

75. Cal-Am's projected savings from the business transformation project are reasonable.

76. Cal-Am's projected savings for 2012 from each phase of the business transformation project should be included in its initial Tier 2 advice letter filings as offsets to the costs associated with the rate base additions. The projected savings for 2013 and 2014 should be reflected as expense offsets in the 2013 and 2014 attrition advice letter filings.

77. The next general rate case should include a review of the business transformation project for savings that are projected by Cal-Am to occur after this rate case cycle.

## ORDER

## IT IS ORDERED that:

1. The joint motion of California-American Water Company and the

operation and maintenance cost of the Pureflow System is included in California-American Water Company's revenue requirement.

20. California-American Water Company's revenue requirement will include \$793,210 to provide Supervisory Control and Data Acquisition to sites not currently covered.

21. California-American Water Company's taxable income shall be reduced by the Domestic Production Activities Deduction calculated using the Division of Ratepayer Advocates' methodology.

22. California-American Water Company will take the repairs deduction Federal Accounting Standards Board Interpretation Number (FIN) 48 and remove from rate base the increased accumulated deferred income tax for 2010, 2011 and 2012 associated with its FIN 48 recorded deferred income tax.

23. California-American Water Company may file a Tier 2 advice letter seeking amortization of its Water Revenue Adjustment Mechanism balance in the Monterey County District once it has removed billing adjustments from the Water Revenue Adjustment Mechanism account and complies with the Division of Water and Audits instructions contained in the letters rejecting advice letters 735 and 838.

24. California-American Water Company's labor and labor-related expenses are reduced by 22 positions to account for ongoing vacancies.

25. California-American Water Company shall continue its pension expense balancing account to track and recover the difference between the level of pension expenses authorized in rates and the actual costs. California-American Water Company's recovery for ratemaking purposes shall be capped at the minimum level of expenses calculated according to the minimum funding levels

#### STATE OF INDIANA

#### INDIANA UTILITY REGULATORY COMMISSION

PETITION OF INDIANA-AMERICAN ) WATER COMPANY. INC. FOR) **AUTHORITY TO INCREASE ITS RATES** AND CHARGES FOR WATER AND SEWER UTILITY SERVICE AND FOR ) APPROVAL OF NEW SCHEDULES OF RATES AND CHARGES APPLICABLE ) **THERETO** 

CAUSE NO. 44022

APPROVED: JUN 0 6 2012

#### ORDER OF THE COMMISSION

Presiding Officers: Carolene Mays, Commissioner Jeffery A. Earl, Administrative Law Judge Company an avenue to build partnerships with businesses, communities, and consumers. He stated these activities allow the Company to participate in organizations that guide building and construction standards as well as provide a forum to discuss plans, coordinate building activities and promote programs like water conservation to consumers, fellow utility members, and business and government leaders. Mr. VerDouw testified that such participation benefits the Company's customers and serves to open up communication lines to customers. He then explained that \$2,398 of Ms. Stull's adjustment was for three events that she classifies as nonwork related meals when, in fact, they were meals for leadership meetings and training events held for Indiana-American managers and employees. Of Ms. Stull's proposed reduction to General Office Expense, Mr. VerDouw identified \$1,434 as payments to floral shops for flowers sent to employees who were hospitalized and/or to the families of Indiana-American employees when a loved one passed away. Although he believes these payments are a necessary cost of doing business, Mr. VerDouw stated he was willing to concede on this portion of Ms. Stull's Accordingly, Mr. VerDouw stated the appropriate adjustment for additional adjustment. disputable expenses is to reflect a reduction of \$1,434 to General Office Expense.

Petitioner's total pro forma General Office Expense on rebuttal was \$1,339,364.

(d) <u>Commission Discussion and Findings</u>. The Parties have agreed that no adjustment should be made to eliminate \$838 of miscellaneous test-year general-office expense for reimbursements for various employee expenses. We conclude these costs are proper expenses to recover through rates.

The Commission also agrees with Ms. Stull's proposed adjustment to eliminate an additional \$13,907 of non-allowed General Office Expenses. In Cause No. 43680, we denied recovery of dues and membership fees in various community organizations, and we remain unconvinced that membership in such associations and organizations is necessary for the provision of utility service to ratepayers. With respect to employee meals at leadership meetings and training sessions, we find it is not reasonable to ask ratepayers to fund these meals in light of the current state of the economy. During the field hearings in this case, we heard from many members of the public who told us how much they have already sacrificed to pay their bills. As Petitioner asks us to approve significant increases in one of those bills, we find it is appropriate for the Company to make sacrifices as well, especially when those sacrifices do not compromise its ability to provide quality utility service. Therefore, we conclude that Petitioner's General Office Expense adjustment is \$17,904 as a decrease in test-year expense.

#### (11) <u>Taxes</u>.

#### (a) <u>Federal Income Tax</u>.

(i) <u>Petitioner's Position</u>. Petitioner calculated its pro forma federal income tax expense utilizing the Muncie Remand Method. This is a long-standing practice of Petitioner, which reflects the impact of its inclusion in a consolidated federal income tax return. The Muncie Remand Method allocates a portion of American Water's interest deduction to Petitioner for purposes of computing tax expense, thereby providing a tax benefit to customers. The interest allocated under this procedure was \$3,929,964 and this reduced tax expense by \$1,375,487.

(iii) OUCC's Position. Mr. Smith explained that Indiana-American is a participant in the American Water consolidated federal income tax return, and thus does not pay federal income taxes directly to the government. He added that when Indiana-American shows a positive current federal income tax obligation, it remits the money to American Water, which in turn may or may not remit an income tax payment to the federal government depending on the results of its consolidated federal income tax return. Based on the information available in the rate case, Mr. Smith said Indiana-American has not had an obligation to pay federal income taxes in recent years. Mr. Smith noted that any federal tax liability on the American Water consolidated return would be paid by American Water. Mr. Smith noted that Indiana-American's responses to OUCC 52-051(e) and (f) indicated that Indiana-American did not pay any 2009 federal income tax and did not expect to pay any 2010 federal income tax. However, in this rate request, Petitioner has reflected positive federal taxable income and positive current federal income tax expense. Mr. Smith noted that subsequent discovery responses provided by Petitioner indicate that American Water did not pay 2009 or 2010 federal income taxes and that it does not expect to pay 2011 federal income tax. Mr. Smith noted also that American Water reported in its 2010 Securities and Exchange Commission ("SEC") form 10-K that it had a federal NOLC in excess \$1.185 billion as of December 31, 2010, which grew from approximately \$1.124 billion as of December 31, 2009.

Mr. Smith noted the amounts that Indiana-American recorded on its books related to the American Water federal NOLC as of December 31, 2009 and 2010, respectively, are listed in the Company's confidential response to OUCC 52-039. Mr. Smith also noted that in another response Petitioner stated that based on current tax law, Indiana-American currently anticipates that American Water will pay alternative minimum tax in 2011. Mr. Smith stated that Indiana-American does not know if American Water will pay federal income taxes in any year, 2012 through 2015, but anticipates the parent company will pay only alternative minimum tax in each of those years. Mr. Smith noted that American Water did not pay federal alternative minimum tax in 2010. He added that Indiana-American stated no analysis has been done to project alternative minimum tax liability for 2011-2015." Thus, there is no reliable basis for concluding that American Water is likely to pay federal alternative minimum tax in any year in that period.

Mr. Smith noted that Indiana-American's income tax calculations for ratemaking purposes reflect that it would have positive state and federal taxable income. Thus, he noted Petitioner has included a positive amount for current state and federal income tax expense in its rate increase request. Mr. Smith noted that Petitioner has reflected a reduction to current federal income tax expense of \$1,375,487 related to a tax deduction for interest on parent company debt. Mr. Smith added that Petitioner determined the amount of its equity capital that was supported by American Water debt, and computed an interest deduction for the parent company debt of \$3,929,964, which Indiana-American multiplied by the 35% federal income tax rate to obtain the reduction to current income tax expense for parent company debt interest of \$1,375,487.

Mr. Smith advised that in a data request response, Petitioner explained that American Water does not allocate interest expense (or any other parent company expenses) to the operating companies for either book or tax purposes. For ratemaking purposes, Indiana-American advised in a discovery response that Petitioner uses the "Muncie Remand Method" to reflect the impact of participating in the consolidated federal income tax return. Mr. Smith noted language from the Commission's Order in Cause No. 37176 states as follows:

The Petitioner is a subsidiary of American Water Works Company, Inc. (AWW). As such it joins with AWW and other affiliated companies in filing a consolidated federal income tax return. Both the Petitioner and the Staff reduced the Petitioner's federal income tax expense allowable for ratemaking purposes by allocating a portion of AWW's interest expense to the Petitioner, thereby reducing taxable income. The same type of adjustment has been made in rate proceedings of other AWW subsidiaries. The method which was used was set forth by the Commission in its Supplemental Order on Remand dated September 16, 1981 in Cause No. 34571 involving Muncie Water Works Company. The Commission hereby takes administrative notice of the Supplemental Order on Remand in Cause No. 34571 and the methodology employed therein. The Commission finds and determine [sic] that such methodology accurately reflects the tax benefits resulting from the Petitioner's participation in the filing of a consolidated tax return, and should be used in this proceeding.

Indiana-American Water Co., 1983 Ind. PUC LEXIS 86, at \*12-13 (Pub. Serv. Comm'n of Ind. Nov. 23, 1983).

Mr. Smith advised that the parent company interest deduction does not fully reflect the tax benefits resulting from Indiana-American's current participation in the consolidated income tax return. Rather, he noted it only reflects a sharing of the tax savings relating to the parent company interest deduction. To fully reflect the tax benefits from participation in a consolidated federal income tax return for ratemaking purposes, Mr. Smith stated it is necessary to make a consolidated federal income tax savings adjustment.

Mr. Smith explained that consolidated income tax savings adjustments are made in jurisdictions where Indiana-American's affiliates are regulated including Pennsylvania, New Jersey, and West Virginia. Of those, he was most familiar with the consolidated tax savings adjustments made in Pennsylvania and West Virginia, having participated in recent rate cases involving the American Water utility-operating subsidiaries in those states. Previously, a consolidated tax savings adjustment had also been made for the American Water utility-operating subsidiary in Kentucky; however, that adjustment was discontinued in the most recent Kentucky-American Water Company rate case.

Mr. Smith also discussed the impacts from filing a consolidated federal income tax return. Mr. Smith explained that the Consolidated Tax Savings Adjustment reflects the consolidated tax savings that result from Indiana-American's participation in a consolidated federal income tax return. Based on the four-year period, 2007 through 2010, Indiana-American had total positive federal taxable income of \$24,545,225, which was 6.0% of the total positive federal taxable incomes on the American Water consolidated federal income tax returns of \$409,318,033. During that period, the losses from non-regulated affiliate tax loss companies amounted to \$447,038,088. Mr. Smith noted Indiana-American's share of those, based on its 6.0% of total positive taxable income amounted to \$26,822,285, and the federal income tax benefit at the 35% statutory rate totaled \$9,387,800. He added that the average benefit over the four-year period to Indiana-American is \$2,346,950. Therefore, Indiana-American's share of the consolidated income tax savings are \$2.347 million. Mr. Smith explained that because a portion of the benefit of participating in a consolidated federal income tax return has already been

reflected by Indiana-American in its calculation of the parent company debt interest deduction, only the additional consolidated income tax savings above that amount are being reflected as an adjustment in the OUCC's calculation of current federal income tax expense. The net amount of consolidated tax savings adjustment is \$908,681.

Mr. Smith explained that Indiana-American computed federal income tax expense for the test period by applying a 35% federal income tax rate to the Company's determination of the test period's taxable income. He noted this is referred to as the "stand-alone" method, which assumes that the Company files a separate federal income tax return. Mr. Smith reiterated the fact that Petitioner reflected a deduction for parent company debt interest in computing its proposed current federal income tax expense for rate making purposes. He described that as the single exception to Indiana-American's use of a "stand-alone" or "separate return" method for computing its requested income tax expense for ratemaking purposes.

Mr. Smith noted Indiana-American does not actually file a separate federal income tax return. Rather, Indiana-American is part of the consolidated federal income tax return that is filed by American Water to minimize its federal income tax liability. Mr. Smith explained a consolidated income tax return generates tax savings because some members of the consolidated group generate tax losses, and these tax losses are used to offset a portion of the taxable income generated by the other affiliates, such as Indiana-American, to reduce income taxes payable for the entire consolidated entity. Mr. Smith noted that without a consolidated filing, it could take several years under the carry-forward and carry-back provisions of the Internal Revenue Code ("IRC") for recurring loss companies to fully realize tax savings. Without combining those recurring loss companies into a consolidated tax return with other companies that generate positive taxable income, such savings might not be realized. Mr. Smith testified that by filing a consolidated return, the consolidated entity, American Water, as a whole is able to realize, in the current tax year, the tax benefits generated by the loss companies.

Mr. Smith asserted that Indiana-American's ratepayers should share in the tax savings realized from the consolidated federal income tax filings. To that end, Mr. Smith stated that Indiana-American's ratepayers should only reimburse the Company for actual income taxes paid. He noted that if the tax savings from the consolidated income tax filings do not flow through to the Indiana-American ratepayers on an appropriate, proportionate basis, the ratepayers will pay rates that are higher than necessary to compensate Indiana-American for its actual costs. He therefore recommended that an appropriate consolidated income tax benefit be calculated for Indiana-American and reflected as a reduction to its current federal income tax expense in this case.

To calculate the consolidated income tax benefit adjustment for Indiana-American, Mr. Smith used the "effective tax rate" method, which is the exact same method that has been applied in the five Pennsylvania-American Water Company rate cases (four wastewater and one water) that Mr. Smith has participated in as an expert witness in the past two years. The only exception is that the calculation for Petitioner can include actual 2010 federal income tax results for American Water, which have become available as the result of American Water filing its consolidated federal income tax return for tax year 2010 by September 15, 2011. First, he considered the combined annual taxable income of all of the consolidated group members (including both regulated and non-regulated group members) with positive taxable income. He

examined the four years 2007 through 2010, obtaining information from Indiana-American's confidential response to OUCC data request 52-065, which listed the taxable income and tax losses each year for Indiana-American and each regulated and non-regulated affiliate that participates in the American Water consolidated federal income tax return. He then calculated for each year the ratio of Indiana-American's positive taxable income in that year to the total of all positive taxable income by consolidated group members. Next, he determined the combined annual taxable losses of all non-regulated group members for each year. Regulated group members with tax losses were not used in the analysis because such tax losses were not considered to be recurring events, and it is generally considered inappropriate to share the tax losses of a regulated utility with another regulated utility in a different jurisdiction. He then applied the Indiana-American ratio to the combined annual tax loss amounts from the nonregulated affiliates to arrive at the annual tax losses that should be allocated to Indiana-American in order to calculate Indiana-American's share of tax benefits produced by the consolidated income tax return filing. Finally, Mr. Smith applied the federal income tax rate of 35% to the average consolidated tax loss benefits allocated to Indiana-American. This calculation indicates a normalized consolidated tax savings benefit for Indiana-American of \$2,346,950 on a four-year average basis.

Mr. Smith explained that the calculation of the consolidated tax savings adjustment he derived for Petitioner is generally consistent with the derivation of the consolidated income tax savings adjustments in recent rate cases involving Indiana-American's affiliates in West Virginia and Pennsylvania, where consolidated tax savings adjustments have been made. For the Indiana-American calculation, the American Water consolidated federal income tax return for 2010 was filed by September 15, 2011; so, 2010 information is currently available, and he used it in the calculation shown on his Attachment LA-2, Schedule 2.

In the event that his proposed consolidated tax savings adjustment is not accepted, Mr. Smith proposed that an adjustment should be made to impute a domestic production deduction ("Section 199 Deduction"). He testified that, to the extent Indiana-American has positive federal taxable income on a separate return basis and otherwise qualifies, the Company would be eligible to claim a deduction under Section 199 of the IRC for domestic production activities. Because Indiana-American has its own water supply and treats the water, such activities qualify and would render Indiana-American eligible for the deduction if it has positive taxable income and meets the other requirements. He testified that, if his proposed consolidated tax savings adjustment is rejected and Indiana-American's current federal income tax expense is calculated primarily on a separate return basis, then the Section 199 Deduction should also be calculated on a separate return basis. Mr. Smith calculated a stand-alone Section 199 Deduction to be \$1,432,402 at Petitioner's proposed rates and \$1,079,763 at the OUCC's proposed rates.

Mr. Smith's final proposed adjustment for federal income taxes was to reduce current federal income tax expense by \$12,841 for the research and development credit based on Petitioner's discovery responses.

(iii) <u>Petitioner's Rebuttal</u>. Mr. Warren accepted Mr. Smith's research and development credit, but he opposed the consolidated tax savings adjustment and the Section 199 Deduction. He testified that, by adhering to the Muncie Remand Method, Petitioner properly reflected the benefits of its participation in a consolidated federal income tax return

under Indiana regulatory practice. He explained that the Muncie Remand Method was this Commission's specific attempt to address the proper ratemaking treatment for Petitioner's participation in a consolidated federal income tax return. In the Muncie Remand Order, the Commission determined that the tax savings from participation in a consolidated return were limited to the tax deduction taken by the parent company for its interest expense and rejected a method very much like that proposed by Mr. Smith. Mr. Warren testified that Mr. Smith's proposed adjustment is based on the tax results of the operations of non-regulated affiliates having nothing to do with the provision of regulated service to Indiana customers. Mr. Warren testified there were three major reasons for his disagreement with Mr. Smith's proposal. First, this Commission specifically considered and definitively rejected such a proposal in the Muncie Remand Method case. Second, his calculation is demonstrably one-sided. Mr. Smith imports tax losses from affiliates for the benefit of Indiana-American when Indiana-American has taxable income and the affiliates have tax losses. However, Mr. Smith does not export Indiana-American's tax losses to affiliates when Indiana-American has tax losses and those members have taxable income. Third, he believes it is neither economically justifiable nor equitable to reflect in ratemaking the tax consequences of expenses that are not, themselves, reflected in ratemaking. Mr. Warren testified that he knows of only four jurisdictions where consolidated tax savings adjustments are made. The only one that uses a method like that proposed by Mr. Smith is Pennsylvania - and that method was mandated by the Pennsylvania courts.

Mr. Warren further provided an example of why, philosophically, he opposes consolidated tax savings adjustments generally. If Indiana-American were to make a charitable contribution to a food bank, which is non-recoverable in rates, no party would contend that the benefit of the tax deduction for the charitable contribution should be allocated to ratepayers. However, under Mr. Smith's proposed consolidated tax savings adjustment, if an affiliate of Indiana-American made precisely the same charitable contribution, ratepayers could be allocated all or a portion of the benefit of that tax deduction. In his opinion, there is no justification for this inconsistency. Further, when a consolidated tax savings adjustment is imposed, the results of non-jurisdictional operations will have a direct effect on the setting of jurisdictional rates. A consolidated tax savings adjustment will reduce rates only if non-regulated affiliates produce tax losses. Conversely, if the Company's non-regulated affiliates begin to produce taxable income, the Company's revenue requirement will increase even if regulated operations do not change. Thus, decisions having tax implications that a non-regulated company makes in the normal course of business have the potential to impact customer rates.

As for the Section 199 Deduction, Mr. Warren testified that this is a very complex mechanism Congress enacted to provide a tax subsidy for certain domestic production activities. American Water presently does not qualify for a Section 199 Deduction – not because it does not engage in the requisite activities, but because the deduction is limited to consolidated taxable income. Largely due to bonus depreciation and the Repairs Method Change, American Water has no consolidated taxable income. Since the Section 199 Deduction is computed only on a consolidated basis, he testified that there is no deduction to allocate. Mr. Smith proposes to impute a tax deduction that does not exist in the tax law. Mr. Warren further explained that, even accepting, for the sake of argument, Mr. Smith's assertion that a commission could reasonably impute a Section 199 Deduction where it computes tax expense on a "stand-alone" basis, in Indiana, that is not the way tax expense is computed. The Muncie Remand Method is not a stand-alone approach to taxes but rather an attempt to account for the savings from

participation in a consolidated income tax return. He further had two disagreements with Mr. Smith's calculation of the Section 199 Deduction adjustment. First, Mr. Smith failed to take account of Indiana-American's stand-alone NOLC which must be absorbed before Indiana-American would qualify for a Section 199 Deduction on a stand-alone basis. Second, Mr. Smith would need to make assumptions that no party has made about deductions that will be taken on the tax return in years during which rates will be in effect in order to determine that Indiana-American would even qualify for the Section 199 Deduction on a stand-alone basis.

(iv) <u>Commission Findings</u>. As noted, Petitioner has accepted Mr. Smith's research and development credit adjustment, and we accept that portion of Mr. Smith's proposed adjustments. With respect to the proposed consolidated tax savings adjustment, we have previously determined that tax savings from participation in a consolidated return are limited to the tax deduction taken by the parent company on its interest expense. We use the following procedure to compute the parent company interest allocation: 1) compute the parent company's long-term debt to equity ratio; 2) multiply the Indiana utility's equity amount by the results of step 1; 3) calculate the parent company's average cost of long-term debt; and 4) multiply the results in steps 2 and 3. The result represents the interest expense on that portion of the parent company's debt that supports investment in the Indiana utility. The tax benefits of this amount should be allocated to the Indiana utility to determine its federal income tax expense for rate-making purposes. *Muncie Remand Order*, 1981 Ind. PUC LEXIS 246, at \*37-38.

We have relied on this method for computing the benefits from participation in a consolidated federal income tax return for over thirty years. The precedent results from a remand from the Court of Appeals directing us to undertake such an effort. We continue to be concerned about the allocation to Indiana ratepayers of either the tax burden or the tax savings of out-of-state affiliated companies. The effect of the OUCC's proposed consolidated tax savings adjustment would be to change Petitioner's revenue requirement due solely to the activities of affiliate companies. Therefore, we reject the OUCC's proposed consolidated tax savings adjustment and adhere to the Muncie Remand Method.

We further reject the Section 199 Deduction adjustment because that adjustment assumes a stand-alone income tax expense calculation. Insofar as we continue to employ the Muncie Remand Method, we do not utilize a stand-alone calculation. As a result, it is inappropriate to impute the Section 199 Deduction on a stand-alone basis.

#### (b) General Taxes.

(i) <u>Petitioner's Position</u>. The Company proposed five adjustments totaling a \$1,130,374 increase to test-year general tax expense. The first was to payroll tax expense based on the pro forma level of wages. The second was to the Safe Drinking Water Act fee based on test-year accounts and rates. The third and fourth adjustments were for the IURC fee and utility receipts tax based on pro forma level of revenues. The final adjustment was to property taxes. Mr. VerDouw explained that property taxes were adjusted based on a calculation that starts with property taxes paid in 2010, determines the ratio of property taxes to total utility plant in-service on December 31, 2009, and applies that same ratio to utility plant in service on June 30, 2011, including the major project. The pro forma adjustment to property tax expense increased general taxes by \$768,267.

## DATA INFORMATION REQUEST Missouri-American Water Company WR-2015-0301 / WR-2015-0302

Requested From:Tim LuftDate Requested:10/14/15

## Information Requested:

Business Transformation (BT). Refer to the Direct Testimony of Company witness VerDouw at page 15 (lines 19-21) and Schedule GMV-1. Mr. VerDouw states that the cost of the BT to MAWC is estimated to be \$46.5 million and that the overall total BT cost are estimated to be \$326.2 million to American Water Works. However, Schedule GMV-1 indicates that these amounts, as well as the BT costs allocated to other American Water affiliates, have been incurred during the period 2009 through 2014.

a. Since Schedule GMV-1 reflects BT costs incurred over the six-year period 2009- 2014, please clarify whether these amounts reflect actual or estimated costs. If the costs are estimates, explain fully and in detail why actual costs are not known six years into the BT program.

Requested By: Jere Buckman – Office of Public Counsel – jere.buckman@ded.mo.gov

## Information Provided:

The costs reflected on Schedule GMV-1 are actual costs. This is reflected as "estimated" on Mr. VerDouw's testimony due to the numbers being rounded to the nearest \$100,000.

## DATA INFORMATION REQUEST Missouri-American Water Company WR-2015-0301 / WR-2015-0302

Requested From:Tim LuftDate Requested:10/14/15

## Information Requested:

Business Transformation (BT). Are there any BT systems that do not use the SAP software platform? If not, explain fully why not. If so, identify each BT system that does not use the SAP software platform.

Requested By: Jere Buckman – Office of Public Counsel – jere.buckman@ded.mo.gov

## Information Provided:

No, it is a fully integrated system.

## **OPC 5012**

## DATA INFORMATION REQUEST Missouri-American Water Company WR-2015-0301 / WR-2015-0302

Requested From:Tim LuftDate Requested:10/14/15

## Information Requested:

Do any AWWC non-regulated operations or subsidiary companies have any licenses for any of the software that is included in the AWWC BT program?

- a. If not, explain fully why not.
- b. If so, identify each license related to the BT program that is held by each AWWC non-regulated operation or subsidiary.

Requested By: Jere Buckman – Office of Public Counsel – jere.buckman@ded.mo.gov

## Information Provided:

American Water Works Service Company, Inc. is licensed to use all of the BT related software applications. The BT systems are designed for American Water's regulated utilities, and American Water Company's "non-regulated" or market-based affiliates. American Water Enterprises ("AWE") owns and operates separate finance, accounting, management of asset lifecycle, customer service, customer billing and strategic planning systems, which satisfy the market-based operational needs.

## DATA INFORMATION REQUEST Missouri-American Water Company WR-2015-0301 / WR-2015-0302

Requested From:Tim LuftDate Requested:10/14/15

## Information Requested:

Business Transformation (BT). Refer to the Direct Testimony of Company witness VerDouw at page 20 (lines 3-4). Mr. VerDouw stated that the Company has included \$46.5 million in rate base related to the BT program and that depreciation or amortization expense is recorded monthly. Please provide the BT related depreciation or amortization expense that was recorded during the test year by month and by BT component. In addition, show the BT depreciation expense by component that was included in the Company's filing and show how this amount was derived. Show detailed calculations.

**Requested By**: Jere Buckman – Office of Public Counsel – jere.buckman@ded.mo.gov

## Information Provided:

Please refer to OPC 5007\_Attachment for details.

# **Missouri Public Service Commission**

## **Respond Data Request**

Data Request No. Company Name Case/Tracking No. Date Requested Issue	0182 Missouri-American Water Company-(Water) WR-2015-0301 9/1/2015 General Information & Miscellaneous - Other General Info & Misc.
Requested From	Jeanne Tinsley
Requested By	Kevin Thompson
Brief Description	Business Transformation Program related amounts
Description	For each of the following, please provide the information on an American Water and Missouri American basis separately: 1) provide, by month, by FERC account all amounts expended on the Business Transformation Program from the beginning of the project through current. Update by month through January 31, 2016 as information becomes available. Summarize all capital and expense items separately. Also identify amounts for hardware costs, software costs, training costs, and all other categories of cost that exist in regards to this project; 2) provide a categorization of the costs expended to date on the Business Transformation Program by type, such as consulting fees, upfront licensing, internal labor, overhead, taxes and interest that was capitalized and for all other categorizations that exist. Provide a copy of all supporting summary work order authorizations that summarize all of these costs; 3) for all cost categories identified in item 2 above, provide a detailed description of what these costs represent; 4) provide a categorization of all costs incurred to date, broken down between capital and expense, by vendor, by month; 5) for each vendor identified in item 4 above, describe what goods or services were provided in regards to the program. Requested by: Lisa Hanneken (lisa.hanneken@psc.mo.gov) Please refer to MoPSC W0182_Attachment for a
icopolio6	summarization of costs. Due to the voluminous nature of the requested items, the additional information requested above will be available for review at the Company's office at a mutually agreed upon time.
Objections	NA

The attached information provided to **Missouri Public Service Commission** Staff in response to the above data information request is accurate and complete, and contains no material misrepresentations or omissions, based upon present facts of which the undersigned has knowledge, information or belief. The undersigned agrees to immediately inform the **Missouri Public Service Commission** if, during the pendency of Case No. **WR-2015-0301** before the Commission, any matters are discovered which would materially affect the accuracy or completeness of the attached information. If these data are voluminous, please (1) identify the relevant documents and their location (2) make arrangements with requestor to have documents available for inspection in the **Missouri-American Water Company-(Water)** office, or other location mutually agreeable. Where identification of a document is requested, briefly describe the

document (e.g. book, letter, memorandum, report) and state the following information as applicable for the particular document: name, title number, author, date of publication and publisher, addresses, date written, and the name and address of the person(s) having possession of the document. As used in this data request the term "document(s)" includes publication of any format, workpapers, letters, memoranda, notes, reports, analyses, computer analyses, test results, studies or data, recordings, transcriptions and printed, typed or written materials of every kind in your possession, custody or control or within your knowledge. The pronoun "you" or "your" refers to **Missouri-American Water Company-(Water)** and its employees, contractors, agents or others employed by or acting in its behalf.

Security : Public Rationale : NA

## DATA INFORMATION REQUEST Missouri-American Water Company WR-2015-0301 / WR-2015-0302

Requested From:Tim LuftDate Requested:10/14/15

## Information Requested:

Did MAWC or American Water Works is opt out of (i.e., not take) bonus tax depreciation in any year (2011 through 2014)? If so, explain fully, and for each year for which AWWC or MAWC did not claim full available amounts of bonus tax depreciation, provide the following information:

- a. Please confirm that any tax NOL can be carried forward for 20 years to reduce future income taxes. If this cannot be confirmed, explain fully why this is not the case.
- b. Please provide all analysis performed by or for American Water Works and for MAWC comparing the projected results of
  - (1) claiming bonus tax depreciation and
  - (2) non claiming bonus tax depreciation for each year. Include all assumptions and supporting workpapers.
- c. Please provide all American Water Works and MAWC projections of taxable income that were used to evaluate whether using bonus tax depreciation that could be claimed in each year will result in overall tax savings during each tax year of the 20 year NOL carry forward period.
- d. How does MAWC propose to compensate Missouri ratepayers for any imprudence effects and/or higher revenue requirements for each year of the 20 year NOL carry forward period related to the parent company decision to not use bonus tax depreciation in each year that bonus tax depreciation was available but was not claimed by MAWC? Explain fully and show in detail.
- e. How much current income tax expense is MAWC claiming in the current case for the test year, before and after its requested revenue increase?
- f. What amount of tax NOL did MAWC have as of each date: 12/31/2011, 12/31/2012, 12/31/2013 12/31/2014 and 9/30/2015?
- g. Show in detail how the MAWC tax NOLs as of 12/31/2014 and 6/30/2015 were determined.
- h. What amount of tax NOL does American Water Works Company have as of each date: 12/31/2011, 12/31/2012, 12/31/2013, 12/31/2014 and 6/30/2015?
- i. Show in detail how the American Water Works Company tax NOLs as of each date were determined: 12/31/2011, 12/31/2012, 12/31/2013, 12/31/2014 and 9/30/2015.
- j. Show in detail how much federal taxable income MAWC has for the first year of new rates in the current MO rate case as if the Company's requested revenue increase were to be granted in full. Include supporting calculations.
- k. Provide all Excel files, electronically, with formulas and calculations intact, relative to your answers to this data request.

**Requested By**: Jere Buckman – Office of Public Counsel – jere.buckman@ded.mo.gov

## Information Provided:

MAWC and American Water Works opted out of bonus depreciation in tax years 2011 and 2013. In 2011, the bonus depreciation allowed by the IRS to deduct was 100% of qualifying property. It was determined that because the consolidated group already had sufficient net operating losses (NOL's), adding to that would jeopardize its ability to use them in the future, even though the carryforward is 20 years. In 2013, the consolidated group had charitable contribution carryforwards that were going to expire unused if the Company was in a taxable loss position. That would have been an additional tax expense to the Company. Therefore, it was decided to opt out of taking the bonus depreciation.

- a. Yes, federal NOL's can be carried forward for 20 years to reduce future income taxes.
- b. No analysis was done for MAWC, only in consolidation. Please see the file OPC 5038\_Attachment 1 Highly Confidential for the 2011 analysis. As stated above, the 2013 decision was mostly due to charitable contributions expiring. Please see the file OPC 5038\_Attachment 2, which shows the Company would have had a taxable loss with taking bonus depreciation in 2013.
- c. No analysis was done for MAWC, only in consolidation. Please see the OPC 5038\_Attachment 1 Highly Confidential.
- d. The business decision to elect not to take bonus depreciation is not imprudent. As can be seen in the 2011 analysis in the file OPC 5038\_Attachment 1 Highly Confidential, the full NOL utilization was projected to be close to the expiration date. Should the NOLs expire, the tax effect is booked to income tax expense. In addition, any additional accumulated deferred income tax liability (ADIT) generated by taking a bonus depreciation deduction would be partially (or fully) offset by the deferred tax asset generated by the NOL. Similarly in 2013, as mentioned above, had the Company taken bonus depreciation in 2013 and created additional taxable loss, a portion of its charitable contribution would have expired and would have created additional tax expense.
- e. Federal income tax at current rates for Federal and State respectively are (\$7,774,691) and (\$1,227,755) at present rates. Federal income and State income tax at proposed rates is \$8,964,056 and \$1,402,614. Please reference schedule CAS-10 TAX in the original case filing.
- f. Please see file OPC 5038\_Attachment 3.
- g. Please see file OPC 5038\_Attachment 3.
- h. Please see file OPC 5038\_Attachment 3.
- i. Please see file OPC 5038\_Attachment 3.
- j. The federal taxable income for MAWC for the first year of new rates in the current MO rate case if the requested revenue increase were granted in full would be \$27,020,081. Please reference schedule CAS-10 TAX in the original case filing for detailed calculations.
- k. See referenced attachments above.

## DATA INFORMATION REQUEST Missouri-American Water Company WR-2015-0301 / WR-2015-0302

Requested From:Tim LuftDate Requested:10/14/15

## Information Requested:

2014 Bonus Tax Depreciation.

- a. Does the Company agree that the availability of 2014 bonus tax depreciation constitutes a known and measurable change for any test years involving 2014 or later periods? If not, explain fully why not.
- b. Please provide a detailed listing by plant account of all plant and equipment added in 2014. Provide the listing in Excel.
- c. Please identify, in the listing provided in response to part "b", all plant and equipment having an MACRS recovery period of 20 years or less, and provide the MACRS recovery period for such property.
- d. Did the Company claim 2014 bonus tax depreciation? If not, explain fully why not.
- e. Does the Company agree that the impact of utilizing the 2014 bonus tax depreciation is a substantial increase in the balance of Accumulated Deferred Income Taxes that offset rate base, and thus a significant decrease to utility rate base? If not, explain fully why not.
- f. Please provide calculations showing the impact of 2012, 2013 and 2014 bonus tax depreciation and include complete supporting calculations and Excel files with all formulas and calculations intact.

**Requested By:** Jere Buckman – Office of Public Counsel – jere.buckman@ded.mo.gov

## Information Provided:

- a. The Company agrees that if bonus depreciation is available for a particular year and the Company takes the deduction, then it should be included in a rate case filing.
- b. See OPC 5039\_Attachment 1.
- c. See OPC 5039\_Attachment 1.
- d. Yes, and it is included in the rate filing.
- e. Yes, taking a bonus depreciation deduction will, by itself, increase accumulated deferred income taxes (ADIT) and reduce rate base. There are other effects on ADIT related to taking a bonus depreciation deduction, such as net operating loss carryforwards.
- f. Please see OPC 5039\_Attachment 2 for the impact on ADIT of 2012, 2013 & 2014 bonus depreciation taken on our tax returns filed. Also see OPC 5039\_Attachment 3 for Form 4562 from MO-American Water's federal proforma which shows the bonus depreciation amount taken on line 14.

## Respond Data Request

Data Request No.	0184
Company Name	Missouri-American Water Company-(Water)
Case/Tracking No.	WR-2015-0301
Date Requested	9/1/2015
Issue	General Information & Miscellaneous - Other General Info & Misc.
Requested From	Jeanne Tinsley
Requested By	Kevin Thompson
Brief Description	Business Transformation Program cost savings
Description	With regard to the implementation of the Business Transformation Program provide 1) a detailed listing and quantification of all cost savings that are associated with the implementation of the program on an annual going forward basis; 2) all dates or timeframes when these cost savings would be achieved; 3) provide a comprehensive description of each cost savings and a quantification of the actual and expected capital or expense savings that will be realized by Missouri American by month, including all applicable FERC accounts; 4) provide a copy of all supporting documentation and calculations relied upon to support the quantification of all cost savings. Requested by: Lisa Hanneken (lisa.hanneken@psc.mo.gov)
Response	The information requested is deemed highly confidential in accordance with commission rules and we ask that confidentiality is maintained which is consistent with those rules or Section 386.480 RSMo, as the case may be. American Water does not track all cost savings related to the Business Transformation (BT) program. Nevertheless, the Company has identified areas of cost savings in 2014, realized as a result of the Business Transformation program. American Water determined that the anticipated benefits from the implementation of the BT program provided the Company the opportunity to review its organizational structure with the goal of making it more efficient and cost effective. Please see MoPSC W0184_Attachment Highly Confidential, which summarizes the estimated impact of the realignment to MAWC. After the implementation of BT, the Company has realized estimated cost savings as well as avoided higher costs in the areas of Supply Chain, Finance and Customer Service Center. Please see MoPSC W0184_Attachment Highly Confidential, which summarizes both the estimated cost savings and avoided costs.
Objections	NA

The attached information provided to **Missouri Public Service Commission** Staff in response to the above data information request is accurate and complete, and contains no material misrepresentations or omissions, based upon present facts of which the undersigned has knowledge, information or belief. The undersigned agrees to immediately inform the **Missouri Public Service Commission** if, during the pendency of Case No. **WR-2015-0301** before the Commission, any matters are discovered which

would materially affect the accuracy or completeness of the attached information. If these data are voluminous, please (1) identify the relevant documents and their location (2) make arrangements with requestor to have documents available for inspection in the **Missouri-American Water Company-(Water)** office, or other location mutually agreeable. Where identification of a document is requested, briefly describe the document (e.g. book, letter, memorandum, report) and state the following information as applicable for the particular document: name, title number, author, date of publication and publisher, addresses, date written, and the name and address of the person(s) having possession of the document. As used in this data request the term "document(s)" includes publication of any format, workpapers, letters, memoranda, notes, reports, analyses, computer analyses, test results, studies or data, recordings, transcriptions and printed, typed or written materials of every kind in your possession, custody or control or within your knowledge. The pronoun "you" or "your" refers to **Missouri-American Water Company-(Water)** and its employees, contractors, agents or others employed by or acting in its behalf.

Security : Rationale : **Highly Confidential** 

: The information requested is deemed highly confidential in accordance with commission rules and we ask that confidentiality is maintained which is consistent with those rules or Section 386.480 RSMo, as the case may be.
