SURREBUTTAL TESTIMONY

OF

ROBERT O. GAEBE

BECKER v. AQUA MISSOURI, INC.

CASE NO. SC-2007-0044 et al.

Q. Please state your full name.

A. Robert O. Gaebe

Q. Have you previously testified in this matter?

A. Yes, I have previously submitted Direct Testimony.

Q. Has there been any change in your testimony since you previously gave your Direct Testimony?

A. No.

Q. What is the purpose of your testimony today?

A. To provide Surrebuttal Testimony to the report filed by Thomas Wells on behalf of Complainant Becker.

Q. Have you reviewed the report of Thomas Wells filed as Rebuttal Testimony in this case?

A. Yes.

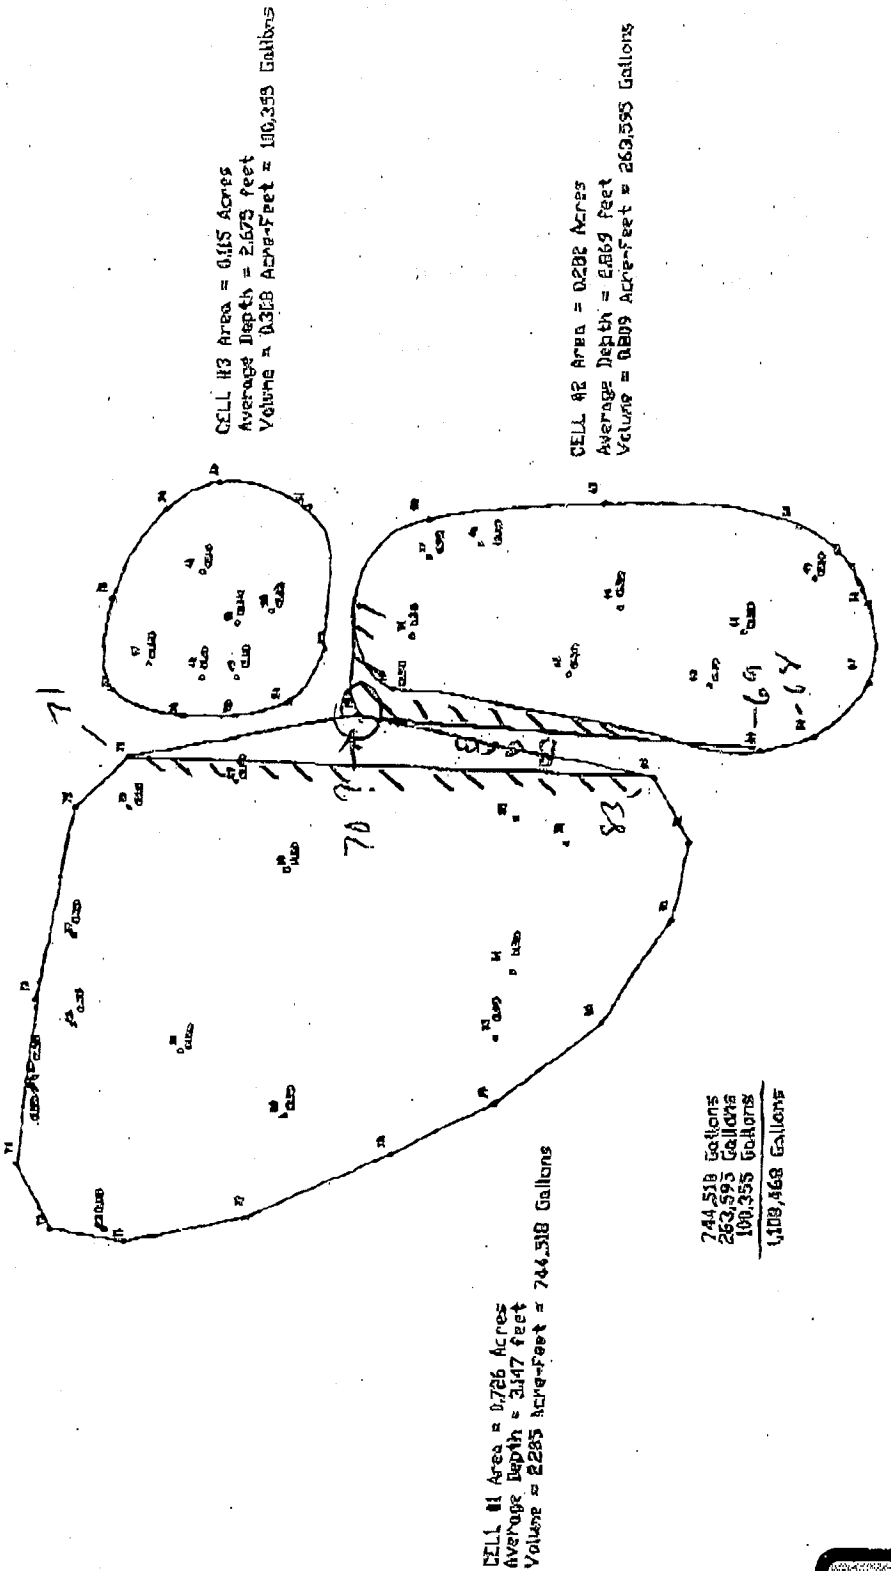
Q. Have you identified any problems or deficiencies with that report?

A. Yes. I noticed what seems to be an error in the item #15 testimony of Becker Development Company. The third page of the "Lake Carmel Lagoon Volume Confirmation" for Jason Becker by Thomas Wells is a sketch of the three cells with field

topographical shots labeled on it. I believe point number 70 is on the perimeter of the secondary cell not the primary cell. If this change is made to the sketch, the berm between the primary cell and the other two will be relatively straight and of uniform width. This straight uniform berm configuration can be seen in the field as well as on satellite imagery. This revision will most likely change the calculated quantities for the primary and secondary cells in the Wells report. My notations regarding this error are attached hereto as Exhibit A to my Surrebuttal Testimony.

Q. Does this conclude your Surrebuttal Testimony?

A. Yes.



CELL #3 Area = 0.115 Acres
Average Depth = 2.673 feet
Volume = 0.308 Acre-Feet = 100,355 Gallons
CELL #2 Area = 0.282 Acres
Average Depth = 2.869 Feet
Volume = 0.809 Acre-Feet = 263,593 Gallons
CELL #1 Area = 0.726 Acres
Average Depth = 3.147 feet
Volume = 2.285 Acre-Feet = 744,518 Gallons
744,518 Gallons
263,593 Gallons
100,355 Gallons
1,108,468 Gallons
