Public comment received from Chuck Sydlo, Buckner, MO

I agree with Karen Custard that the eligibility for the rebate should be retroactive to January 1, 2009, even if the payment is not actually made until the rule finalization. I have planned an installation at my own home that is on hold for rule clarification. I would also like to be sure that Missouri utilities are not allowed to satisfy green energy production requirements by simply purchasing power from other states or purchasing an energy producing facility in another state.

=====

Thanks

Mike
