

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

In the Matter of the Review of Economic, Legal)
And Policy Considerations of District-Specific) **Case No. SW-2011-0103**
Pricing and Single-Tariff Pricing.)

**JOINT FILING OF STAFF AND MISSOURI-AMERICAN WATER COMPANY
REGARDING THE EFFECTS OF SINGLE-TARIFF PRICING ON COMMERCIAL
AND INDUSTRIAL CONSUMERS IN MISSOURI-AMERICAN’S SERVICE TERRITORY**

COME NOW the Staff of the Missouri Public Service Commission (“Staff”) and Missouri-American Water Company (“Missouri-American” or “the Company”), by and through counsel, and submit the following information requested by the Missouri Public Service Commission (“the Commission”):

1. On November 9, 2010, the Commission held an on-the-record presentation to discuss the economic, legal, and policy implications of district-specific and single-tariff pricing. During this presentation Commissioner Davis requested information demonstrating the effects of single-tariff pricing on commercial and industrial consumers in Missouri-American’s service territory.

2. On November 16, 2010, the Commission issued an order directing Staff and Missouri-American to file by December 15, 2010, the information requested by Commissioner Davis at the November 9, 2010 presentation.

3. The attached document, labeled Attachment A, demonstrates the potential impact of single-tariff pricing on commercial and industrial consumers in Missouri-American’s service territory. As a bit of background, these classes are each currently comprised of subgroups of consumers that receive service from meters of different sizes. Under the single-tariff pricing

scenario presented in Attachment A, all consumers within their respective commercial or industrial class would pay the same per class commodity charge, regardless of meter size. However, all consumers within their respective class would not pay the same per class customer charge. Staff and Missouri-American note that in compiling this information these parties elected to show the effects of single-tariff pricing on the customer charges of those commercial consumers utilizing a 5/8" meter and those industrial consumers utilizing a 2" meter. These meter sizes are the most prevalent among these customer classes and provide an accurate representation of the effects of single-tariff pricing on these customer classes.

WHEREFORE, Staff and Missouri-American provide the attached information for the Commission's consideration and in compliance with the Commission's November 16, 2010 order.

Respectfully submitted,

/S/ ERIC DEARMONT

Eric Dearmont

Assistant General Counsel

Missouri Bar No. 60892

Attorney for the Staff of the

Missouri Public Service Commission
