

Exhibit No.:
Issue(s): Declining Usage
Witness: Jarrod J. Robertson
Sponsoring Party: MoPSC Staff
Type of Exhibit: Surrebuttal Testimony
Case No.: WR-2023-0303
Date Testimony Prepared: February 8, 2023

MISSOURI PUBLIC SERVICE COMMISSION

INDUSTRY ANALYSIS DIVISION

WATER, SEWER & STEAM DEPARTMENT

SURREBUTTAL TESTIMONY

OF

JARROD J. ROBERTSON

MISSOURI-AMERICAN WATER COMPANY

CASE NO. WR-2022-0303

Jefferson City, Missouri
February 2023

1 **DECLINING USAGE**

2 Q. What does Mr. Rea state in his rebuttal testimony about MAWC's and Staff's
3 annual residential usage estimates?

4 A. Mr. Rea states on page 6, lines 7 through 21 of his rebuttal testimony that the
5 difference between the annual amount of volumetric residential decline on a per customer basis
6 between Staff's method and MAWC's analysis is approximately 5,400 gallons per year, for
7 both Tariff District 1 (St. Louis County) and Tariff District 2 (non-St. Louis County).

8 Q. Does Staff agree with this assessment?

9 A. No. Mr. Rea states on page 39, lines 12 through 14 of his direct testimony that
10 the annual amount of volumetric residential decline on a per customer basis is approximately
11 1,400 gallons and 1,200 gallons, for Tariff Districts 1 and 2, respectively. Staff reports in
12 Schedule JJR-r1, attached to my rebuttal testimony, that the annual amount of volumetric
13 residential decline on a per customer basis is 1,160 gallons for Tariff District 1 and 57 gallons
14 for Tariff District 2.

15 Q. What is Staff's conclusion regarding this comparison?

16 A. Staff calculated the difference between Staff's and MAWC's residential usage
17 estimates to be approximately 240 gallons and 1,143 gallons for Tariff Districts 1 and 2,
18 respectively, and this data is displayed in the table on the following page of this testimony.

19 Q. Has Staff analyzed how MAWC's and Staff's differences in residential usage
20 estimates affects annual revenue?

21 A. Yes. Please see the table below:

Surrebuttal Testimony of
Jarrod J. Robertson

1

Tariff District 1				
A	B	C	D	E
	Annually	Total Annual Decline in Usage	Units	Total Annual \$
Staff 5yr Avg Decline/Customer (Actuals)	1,160			
Co. Predicted 10yr Avg Decline/Customer	1,400	(240*317,267)	(76,143,992.57/1,000)	(76,143.99*5.629)
	240	76,143,992.57	76,143.99	428,614.53
Tariff District 2				
A	B	C	D	E
	Annually	Total Annual Decline in Usage	Units	Total Annual \$
Staff 5yr Avg Decline/Customer (Actuals)	57			
Co. Predicted 10yr Avg Decline/Customer	1,200	(1,143*113,130)	(129,307,151.85/1,000)	(129,307.15*6.2469)
	1,143	129,307,151.85	129,307.15	807,768.85

- Column A shows Tariff Districts 1 (St. Louis County) and 2 (non-St. Louis County), with each section containing labels pertaining to Staff’s method versus MAWC’s method.
- Column B shows the per customer average annual decline in monthly residential usage (as calculated by Staff and MAWC), and the difference between the two methods for each District.
- Column C shows the total annual decline in usage, as calculated by multiplying the volumetric difference between the two methods (240 and 1,143 gallons, respectively), by the average total number of customers for each specific District (317,267 and 113,130, respectively).
- Column D shows the total usage from Column C divided by 1,000 to convert the usage to charged units, which provides the commodity charge per 1,000 gallons of usage per District.
- Column E shows the total annual dollar amount related to each of Staff’s and MAWC’s method, calculated by multiplying the charged units by the commodity charge for District 1 and 2 (\$5.629¹ and \$6.2469² per 1,000 gallons, respectively).

19

Q. What is Staff’s conclusion concerning the effect on revenue of MAWC’s and Staff’s differences in the average annual decline in residential volume?

20

21

A. When comparing average annual residential volumetric usage based on Staff’s five (5) year averaging method versus MAWC’s linear regression analysis, Staff concludes that

22

¹ P.S.C. MO NO. 13 Water Tariff, 4th Revised Sheet No. RT 1.2.

² P.S.C. MO NO. 13 Water Tariff, 6th Revised Sheet No. RT 1.3.

Surrebuttal Testimony of
Jarrod J. Robertson

1 the effect on annual revenues is approximately \$1.2 million for the two Districts combined,
2 not the approximately \$13.8 million Mr. Rea reports on page 6, lines 19 through 21 of
3 his rebuttal testimony.

4 Q. Does this conclude your surrebuttal testimony?

5 A. Yes it does.
