CORRECTED STAFF RECOMMENDATION

COMES NOW the Staff of the Missouri Public Service Commission (“Staff”) and for its recommendation, states as follows:

1. On December 30, 2011, 3L Communications Missouri, LLC (“the Company”) applied for a certificate of service authority to provide basic local, non-switched local and interexchange telecommunications service and for competitive classification.
2. The Application included sufficient information for the Staff to conclude that the Company possesses sufficient financial, technical and managerial resources to be certificated. In addition, the Staff notes that granting the requested waivers complies with §392.420 RSMo 2009.
3. In the attached Memorandum, the Staff recommends that the Missouri Public Service Commission (“Commission”) grant the Company’s request for basic local, non-switched local and interexchange telecommunications service authority. The Commission shall grant an application for a certificate of telecommunications service authority upon a finding that the grant of authority is in the public interest. §§ 392.430 and 392.440 RSMo 2000.
4. The Staff also recommends that the Commission classify the Company’s services as competitive. The Commission may classify a telecommunications provider or its services as

competitive if the Commission determines it is subject to sufficient competition to justify a lesser degree of regulation and that such lesser regulation is consistent with the protection of ratepayers and promotes public interest. §392.361.4 RSMo Supp. 2009. A majority of the services a competitive company provides must be classified as competitive. §392.361.3 RSMo Supp. 2009.

5. The Staff further recommends that the Commission state in its order that, pursuant to §392.410, the authority conferred by the certificate of service authority shall be null and void unless it is exercised within one year of its issuance.

6. Tariffs were submitted with the application; the Staff recommends that the Commission either approve them or allow them to take effect by operation of law.

7. The Applicant is not delinquent in filing an annual report, paying the PSC assessment, MoUSF, and Relay Missouri.

8. The Staff recommends that the application be granted with the following conditions:

- a. The applicant's originating and terminating access rates shall not exceed the access rates of the incumbent local exchange company against whom the applicant is competing pursuant to §§ 392.361.6 and 392.370 RSMo Supp. 2009.
- b. If the directly competing ILEC, in whose service area the applicant is operating, decreases its originating and/or terminating access service rates, the applicant shall file an appropriate tariff amendment to reduce its originating and/or terminating access rates in the directly competing ILEC's service area within 30 days of the directly competing ILEC's reduction of its originating and/or terminating access rates in order to maintain the cap.

9. The Staff also recommends that the application be conditioned on the continued compliance with the Company's representation that it will undertake all necessary measures to ensure its contracts with underlying carriers do not contain provisions preventing delivery of traffic to any telephone exchange area of Missouri. Such measures include but are not limited to:

- a. Prevention of call blocking and/or call gapping based on the cost of traffic termination.
- b. Preventing the alteration or stripping of Calling Party Number identification.
- c. Ensuring sufficient network capacity exists to process all traffic according to industry accepted practices.
