Re: Trigen-Kansas City District Energy Corporation
Case No. HA-90-5

Dear Mr. Hubbs:

Enclosed for filing in the referenced matter on behalf of Trigen-Kansas City District Energy Corporation are the original and 14 conformed copies of revised proposed rates for steam service which are issued of forms denominated as PSC No. No. 1 (First Revised). The enclosed rates for steam service replace the proposed rates which were originally filed by Trigen with the Commission on September 7, 1989.

Thank you for your assistance in this matter.

Very truly yours,

MORRISON, HECKER, CURTIS, KUDER & PARRISH

RATES FOR STEAM SERVICE

TRIGEN KANSAS CITY

RATES FOR STEAM SERVICE
December 4, 1989

Trigen-Kansas City District Energy Corporation (the "Company") shall provide steam service at the rates set forth below under the provisions of customer service agreements which shall include the provisions of the Company's general rules and regulations in effect and on file and the Commission's applicable general orders. The rates shall include a usage charge covering the incremental fuel, water and marginal costs incurred by the Company in the supply of each unit of steam, and an annual base charge which is designed to cover the fixed costs of operating the system, the fixed amount of thermal losses, and the capital recovery and system restoration.

I. USAGE CHARGE.

- A. The Company shall charge a monthly usage charge for each one thousand pounds (Mlb) of steam consumed not to exceed to \$3.90.
- B. The Company may apply a reduction to the \$3.90 per Mlb usage charge to reflect its success in reducing operating costs and improving system efficiency. Any reduction to the usage charge shall be uniformly applied to all customers receiving steam service under the terms of this rate schedule.
- C. The usage charge shall be computed and billed monthly and be based on the consumption of steam by the customer in the prior month, as measured by the Company's meters, or estimated as set forth in the general rules and regulations.

ENERGY CORPORATION
Name of Issuing CorporationFor KANSAS CITY, MISSOURI
Community, Town or City**RATES FOR STEAM SERVICE****II. BASE CHARGE.**

- A. All customers who take steam for substantially 100% of their space heating needs and optionally for their air conditioning needs, and for whom the dominant use of steam is not for a process load shall pay a base charge, as determined below.
- B. The base period is defined as January, February, March, October, November and December. The base consumption is defined as the steam consumed during the base period. The base percentage shall be the sum of the base consumption during the base periods for calendar years 1986, 1987 and 1988 divided by the sum of the total usage for calendar years 1986, 1987 and 1988, except in those cases where the current percentage varies from the average by more than five percent (5%). In those cases, the current percentage of winter use shall be the base percentage. "Base Usage" shall be determined by multiplying the base percentage times the total usage for calendar year 1988.
- C. The annual base charge shall equal the dollars per Mlb of annual Base Usage determined by reference to the rate table below. The annual base charge as so determined shall be payable in twelve equal monthly installments (monthly base charge).

ANNUAL BASE CHARGE SCHEDULE

First 500 Mlbs of Base Usage	\$11.75 per Mlbs
Next 1500 Mlbs of Base Usage	\$10.00 per Mlbs
Next 4000 Mlbs of Base Usage	\$9.75 per Mlbs
Base Usage greater than 6000 Mlbs	\$9.40 per Mlbs

RATES FOR STEAM SERVICE

D. New customers who do not have a record of use during the aforesaid years shall have their Base Usage estimated and mutually agreed upon prior to connection to the system, and shall be billed accordingly until they have completed an October through March period of connection to the Company during which the facility in question was at normal full occupancy. At the conclusion of this period, the Company shall review the actual consumption during the billing periods of October through March, adjust that consumption for both differences in the actual degree days and the average number of degree days experienced in the same periods in 1986-1988, adjust for any differences between the number of days in the Base Period and the number of days in the actual service period due to selection of meter reading dates, and shall then use this result as the annual base usage for future billings.

E. Changes shall be made to the Base Usage in the event that usage in the most recent October through March period, after a degree day weather adjustment, varies by more than 15% from the 1988-1989 base usage amount, or from the initial usage amount as adjusted to actual experience, per Section II.

F. Such changes shall become effective in the first billing period following their determination.

III. PROCESS USERS OF STEAM.

For customers whose primary use of the Company's steam is for process loads and for whom space heating and weather related changes in consumption are incidental, there may be a

negotiated rate pursuant to long term service contracts stipulating who bears the connection and distribution capital costs, penalties associated with failure to take service, such other aspects unique to the particular service and incorporating as many provisions of the general rules and regulations as are deemed relevant. These negotiated contracts, providing they are for a period of at least three years in duration, and providing they are with corporations, government entities, partnerships, or with individuals who are sophisticated in energy matters and are capable of negotiating energy contracts, will not be subject to commission approved rates and general rules and regulations of service.

IV. SERVICE FOR LESS THAN FULL SPACE HEATING REQUIREMENTS.

Customers who do not take substantially all of their space heating requirements from the Company shall be subject to separate calculations of the annual base amount depending on which type of partial service they use. Such annual base charges shall not exceed the charges that would apply if the user took full space heating requirements from the Company, and shall be subject within this constraint to agreement between the user and the Company.

V. MINIMUM CHARGE.

Regardless of Base Usage, there shall be a \$50 per month minimum base charge. The Company generally will install one meter, at its expense, to measure service to a customer's premises, but may elect to employ multiple meters. However, if a customer requests installation of any meter(s) in addition to those determined to be appropriate by the Company, the aforesaid minimum

monthly base charge shall apply to each such meter, regardless of actual consumption.

VI. MODIFICATION OF RATES.

These rates are effective from the initiation of service by the Company, on the date that it acquires the system from Kansas City Power and Light, and remain in effect until further notice.

VII. TAX ADJUSTMENT.

There shall be added to the monthly bill of the customer, as separate items, a surcharge equal to the proportionate part of any license, occupation or other similar fee or tax applicable to steam service by the Company to the customer, which fee or tax is imposed upon the Company by taxing authorities on the basis of the gross receipts, net receipts or revenues from the steam sales by the Company.

VIII. GENERAL RULES AND REGULATIONS.

All customers shall be subject to the General Rules and Regulations which are filed separately.
