In the Matter of the Application of Central)
Rivers Wastewater Utility, Inc., for a)
Certificate of Convenience and Necessity)
to Provide Sewer Service)

Case No. SA-2000-105

STAFF RECOMMENDATION

COMES NOW the Staff of the Missouri Public Service Commission (Staff) and for its recommendation states:

In the attached Memorandum, which is labeled Appendix A, the Staff recommends that the Missouri Public Service Commission

- a. Grant Central Rivers Wastewater Utility, Inc. (Applicant) a Certificate of Convenience and Necessity as requested in its Application, with the Certificate to be effective on the same date the Applicant's tariff sheets become effective;
- b. Order the Applicant to file tariff sheets in conformance with Staff's Recommendation; and
- c. Order the Applicant to file tariff sheets that bear an effective date of at least 30 days after the date of filing.

Background

Public Service Commission

On August 10, 1999 Central Rivers Wastewater Utility, Inc. (CRW or Company) filed an Application for a Certificate of Convenience and Necessity (Certificate) to provide sewer service in Fox Run subdivision in Clay County. The Commission subsequently set an intervention date of September 22, 1999, but no applications to intervene were filed in the case.

CRW was incorporated in December 1997 and was granted a certificate to provide sewer service in its first service area known as Countryside Meadows in Case No. SA-98-530 on May 25, 1999. The service proposed for Fox Run utilizes a septic tank and pump at each customer's property, like service at Countryside Meadows. This is commonly called a septic tank effluent pump, or STEP system. The sewer system is a pressure collection system, which transports the wastewater from the residences to the treatment facility.

In order to ensure that potential lot buyers know of the cost for a STEP system, it was agreed that the developer would record with the county recorder of deeds a subdivision restriction stating that where a STEP system is required in order to obtain sewer service from CRW that such system will be installed by CRW at the charge specified in its PSC tariff.

The proposed STEP system installation charge for Fox Run is \$4,500 per lot, the same as the existing approved rate. The lot owners will own the STEP system, but CRW will have the responsibility for maintaining the pumps, including future replacements, and disposing of tank solids on an as-needed basis. CRW's responsibilities will also include an inspection of each STEP system at least annually.

CRW and Staff agreed to utilize the existing \$32 per month rate, with a review of the rate to be conducted by the Staff subsequent to May 2001 as prescribed in Case No. SA-98-530.

On November 19, 1999, the Staff sent a letter summarizing its position on the Application to CRW and requested a written response regarding CRW's agreement with the Staff's proposed recommendations (see Attachment A). On November 22, 1999 CRW faxed the Staff a letter dated November 22, 1999 stating the Company's agreement with the Staff's proposed recommendations (see Attachment B).

The Staff also sent a copy of its November 22, 1999 letter to CRW to the Office of the Public Counsel (the OPC). The OPC has not responded either in favor of or in opposition to the Staff's proposed recommendations.

CRW has agreed to continue to use its previously approved depreciation rates.

In conjunction with the Commission granting CRW a Certificate, CRW will need to amend its tariff by filing a map and a written description of the Fox Run service area.

All Staff members involved in the review of CRW's Application, and all levels of their up-line management, were afforded the opportunity to review and comment on this Memorandum prior to it being filed.

Staff's Recommendations

Based on the above, the Staff recommends that the Commission issue an order which:

- Grants CRW a Certificate of Convenience and Necessity as requested in its Application, with the Certificate to be effective on the same date the Company's tariff sheets become effective;
- Orders CRW to file tariff sheets to show the Fox Run map and description within 30 days of the date of issue of the Commission's order granting the Certificate, with the tariff sheets to bear an effective date that is at least 30 days from the date the tariff sheets are filed with the Commission;
- Approves the Company's existing depreciation rates, connection charge, and the customer rate of \$32.00/month for application to the Fox Run development;

RE: Case No.SA-2000-105, Application for Sewer Service Certificate (Fox Run subdivision)

Dear Mr. Hawthorne:

The purpose of this letter is to present to you the Staff's position on the Application by Central Rivers Wastewater Utilities Inc. (CRW) for a Certificate of Convenience and Necessity for the provision of sewer service at Fox Run subdivision.

The Staff is agreeable to the use of the flat rate of \$32.00 per month as established in the previous Case No. SA-98-530(Countryside Meadows) . The rate of \$32.00/month is based on estimates of expected cost, with the expectation that this rate will be reviewed subsequent to May of 2001 based on actual cost of service.

At such time as individual customer water usage is readily available, rates using wintertime water usage data should be instituted.

The proposed rate will not cover all expenses during the beginning phase of the development. Furthermore, in the short term, out-of-pocket expenses will not be covered. The Staff recognizes that CRW has an agreement with the developer to pay \$250/month to CRW until there are 24 customers. This is expected to substantially cover out-of-pocket expenses such as electric use, operator salary, and repairs. In addition, the developer has delivered CRW a \$25,000 Letter of Credit to assure the payment of the monthly fee.

The \$32/month rate is expected to support a ratebase of \$300 per customer as investment in the treatment facility, with the balance being contributed by the developer. The Staff understands that this has been agreed to by the developer and CRW.

As we have also discussed, the Staff is agreeable to a septic tank effluent pump (STEP) installation charge of \$4500 as previously approved in Case No. SA-98-530. This is to be a once per connection charge for the installation of the STEP system at each house where

Kevin Hawthorne
Fox Run
November 19, 1999
Page 2

it is necessary to receive sewer service. It is understood that where a developer intends to use STEP systems that the lot buyer will have notification of the installation charge prior to the purchase of the lot. CRW will insure this condition when a developer requests service by requiring that developer to record with the county recorder of deeds a restriction stating that where a STEP system is required in order to obtain sewer service from CRW, such system will be installed by CRW at the charge specified in its PSC tariff. The amount of such charge shall be the average actual cost of installation.

CRW has agreed to provide Staff estimates of the original cost of the Fox Run collection system and the treatment system which was contributed by the developer. CRW will forward this data to Staff by December 24, 1999. CRW will maintain records of each system's construction costs, accumulated depreciation, CIAC, revenues, operation and maintenance expenses.

As we have discussed, subsequent to the Commission issuing an order in this case, CRW will need to file appropriate tariff sheets to add the new service area description and map.

Our proposed recommendations on this case are:

- CRW keep its books and records according to the Uniform System of Accounts;
- Current depreciation rates be approved for the new Fox Run area;
- a flat rate of \$32.00/month be approved;
- a one time service charge for the installation of a STEP system, initially to be \$4500, will be included in the company's tariff; and
- that a Certificate of Convenience and Necessity be approved to be effective concurrent with the filing and approval of the appropriate tariff sheets.

If you agree with the proposed recommendations and conditions as set forth in this letter, CRW should send written acknowledgment.

Sincerely,

Martin Hummel
Water and Sewer Department

RE: Case No. SA-2000-105

Dear Mr. Hummel:

After review of your letters in response to Application for Sewer Service Certificate (Fox Run), all the information meets with our approval and we would encourage your expedience in moving this application forward through typical PSC channels.

If you have any questions, please contact me at (816) 483-3888.

Respectfully,

Kevin Hawthorne, Secretary & Treasurer
