Donald Taylor, Alex Walters, Minnie Henderson,

Name: Stephen Carroll, Micheal McClinton
Complainant

Missouri Public
Service Commission

vs.

Case No.

Company Name: Ameren UE
Respondent

COMPLAINT

Complainant resides at 4819, 4823, 4825, 4831 and 4833 Maffitt Avenue
(address of complainant)

St. Louis, Missouri 63113

1. Respondent, Ameren UE Electric Company
(company name)

of P.O. Box 66529 St. Louis, MO 63116-6529, is a public utility under the
(location of company)

jurisdiction of the Public Service Commission of the State of Missouri.

2. As the basis of this complaint, Complainant states the following facts:

We believe the Ameren UE electric company is solely and totally responsible for the series of
electrical power surges which occurred on Saturday August 13, 2005. We base this on the
neglect and poor vegetation management that they maintain. These power busts attributed to the
loss and disrepair of numerous electrical appliances and equipment and a concern for the safety
of our homes. The neutral line had development slack in it, and had begin to bow from the weight
of the tree branches that grew on it. The power lines that extended from the power transformer
were and still are somewhat bare with little, or no insulation to prevent contact with the neutral line.
Over the years many of my neighbors have witness electrical sparks and some form of electrical
arcing taking place at or near these same power lines and transformer.
Attached are photos which would substantiate this claim.
Photo A : Clearly visible is were the neutral line had been cut and spliced together with a brass
connector also is the new transformer. Note the thick vegetation recently trimmed and cleared
away to repair the line and replace the transformer. Still evident are those tree branches,
although trimmed, but soon to be a danger to those lines again.

3. The Complainant has taken the following steps to present this complaint to the Respondent:

On August 13, 2005 after the storm, about 6:45 I was watch television in my living room at the above address, when sudden my large screen television made a strange sound and blinked out seconds later the ceiling light in my dinning room begun to dim and than glow dangerously bright, I also heard my refrigerator making a strange noise like a out of control high revving sound. I open the refrigerator door and was amazed to find its light also glowing frightful bright. At that point I begin to unplug and turn off as many appliances as I could, until I could find out what was going on. Suddenly the lights went complete out, I immediately then when outside to see what was going on.

After being outside for about a minute I saw Miss Henderson who lives at 4831 Maffitt and she ask me If my lights had went out, I told her that my lights did go out but before they did, I believe I was experiencing a Series of power surges. I mention to her what had occurred in my house and she said the same things happened in her house, later that night at about 9:30 p.m. I was awaken by a lot of popping noise inside my house the last of which was my television in my bedroom. It seems the power surges the transformer was emitting had burnout my television even though it was turn off. I also heard louder popping noise outside in the alley. I looked out my bedroom window just in time to see the transformer on the telephone post in alley sparking and it blew out another light on another light-post. I tried to phone this in, but that night the lines were still busy I could not get through. I decided to go out see if any of my neighbors had called in to report this problem. After talking to some of the neighbors some did manage to get through. They said that one of the Ameren UE representative said that our power would be restored by 2- 3:00 a.m. Sunday morning.

Early Sunday morning I got up and realized that the power had not been restored, after noon I was talking with some of the neighbors and they said that Ameren said that they would restore power by Monday morning. I decided to stay home that Monday August 15, thinking that it might be restored that day and nothing happen. I decided to go work Tuesday August 16 and that I would come home at lunch. About 2:00 p.m. I was able to come home and check to see if my electricity was on, The electricity was still off, however some of the neighbors electricity was on. Perplexed about this situation I call Ameren from the my office and told the representative about my situation and she ask me why didn't I call earlier, I told her I did but could not get through, but some of the neighbors did report it.

She said she would report it and that I should be hearing from someone soon, by the time I arrived home that evening a Ameren UE technician had just drove-up in the alley behind my house. As I approach him, he asked me if I was the one who called in, I told I did and explained to him that almost everyone around here had electricity except one neighbor and myself. He checked the overhead power lines and said that the nearest transformer had been disconnected and the power was rerouted from a different transformer, and that power-lines going into my house were hot and I should be getting some power, he also said that he would have come in to my house and check the main power switchbox. After checking the main switchbox, his conclusion was that I may have experienced a power surge, it probable tripped the main power switch and that switch at this point was not function properly and the main power breaker switch would have to be replaced. He assured me that if the breaker switch was replaced, I would have power in my house.

After having a electrician replace the main power switch I had electricity in my house. I went through my house and start checking all of the electrical appliances in the house. I found out that (4) televisions were burned out, along with my microwave oven, my stereo equipment, my central air-conditioner, and my home security alarm system.

CORPORATE CLAIMS MANAGEMENT, INC.

Claims Administration Services

Ameren Dedicated Unit
(314) 554-3382

September 23, 2005

Donald H Taylor
4825 Maffitt Avenue
Saint Louis MO 63113

RE: Our Client: AmerenUE
Date of Loss: August 13, 2005
Claim #: AG0508344

Dear Mr. Taylor:

Corporate Claims Management, Inc. is the third party administrator handling claims on behalf of Ameren. This letter is in response to your claim.

On the date reported this area experienced a series of major storms. During these storms, electric service to many customers was disrupted. Ameren put the Storm Restoration Program into effect immediately and repair crews restored service as quickly and safely as possible.

While we regret any loss or inconvenience you have experienced, it is impossible for Ameren to guarantee a time for service to be restored from outages caused by acts of nature. Due to this, we are unable to make any voluntary payments regarding this matter and must respectfully decline your claim.

Sincerely,

Corporate Claims Management, Inc.

Wiley Brandon

Re:	Our Client:	Donald Taylor
	Your Client:	Ameren UE
	Your Claim No.:	AG0508344
	Date of Loss:	August 13, 2005

Dear Mr. Brandon:

Please be advised that our office has been contacted by Mr. Donald Taylor with regard to the above-referenced claim. Unfortunately, your correspondence of September 23, 2005, to Mr. Taylor fails to even address the purpose of Mr. Taylor's claim.

Mr. Taylor believes that the electricity in his residence experienced a series of power surges. These power surges occurred subsequent to any storms of August 13, 2005. As a result, Mr. Taylor experienced damage to all of the televisions in his residence as well as his microwave oven, stereo system, air conditioning system, electrical main power switch, alarm system, and electrical transformer. Accordingly, I would strongly suggest that you reconsider Mr. Taylor's claim.

Your response to this correspondence would be greatly appreciated within fourteen (14) days from the date of this letter. If I do not receive any response within 14 days, I will advise Mr. Taylor of his legal rights, including his right to file a lawsuit wherein he will seek damages in excess of what he is now requesting. Thank you for your anticipated cooperation.

Very truly yours,

BRIAN R. SEIGEL

 Our Claim No.: AG0508344
 Date of Incident: August 13, 2005

Dear Mr. Seigel:

Corporate Claims Management, Inc. is the third party administrator that provides claims management on behalf of AmerenUE and this letter is to acknowledge your letter dated October 6, 2005 concerning the above reference matter.

Please be advised that our investigation indicate there is no liability on the part of AmerenUE, therefore our position has not changed since our letter of September 23, 2005 to Mr. Taylor.

We regret any inconvenience and any loss your client experience. We have found no negligence or absence of care on the part of AmerenUE and must, respectfully, deny the claim.

Sincerely,

Wiley Brandon

MICHAEL McCLENNON

On the night of 8-05, the power in our home was not on.

I went outside to my neighbors to speak to Mr. Carroll Jan my left of the house & Donald on the right. They both were talking about what had happened in their home.

They both talked about how the lights glared brightly and then dimming low as much, our lights did so too. This went on for (3) three more days until the American U.E. guys came and replaced the old transformer.

One spoke to my sister in our house about how the negative relays had burn out, and that they storm from days before had nothing to do with it.

He said the transformer should have been replaced long ago.

On a personal level, for some yrs I've witness the same transformer popping & arcing electricity for some time which the wires are exposed because of the ~~over~~ overgrowth of the tree over the limbs that had rot away the covers insulations.

Alex Walters
4833 Maffitt Avenue
St. Louis, MO 63113
Nov. 7, 2005

Below is a written statement of what I experienced and witness on Saturday August 13, 2005.

At about 7:00 p.m. that evening my lights begun to glow real bright and then go deem and bright again my refrigerator started to make loud noises and than my cordless phone blew- up in a cloud of smoke, it was than I begin to unplug my deep freezer and my television, I try to unplug my refrigerator but I could not make it to fast enough before the surge of electricity blew it out. At that time I though of the "Pot" (The Electrical Transformer) Behind my house which is the main electrical source for our area and had been leaking for about three years must have finally started to overloaded itself.

On Sunday August 14, an Ameren repairman came out to repair the "Pot". I noticed that the top ground wire had sagged down and was touching the hot wire and causing the power surges. The repairman went up on the lift and resagging the line by cutting and pulling the line and inserting a sleeve in it.
