Transmittal No. 1034

FILED

JUL 2 9 2004

Secretary
Federal Communications Commission
Washington, D.C. 20554

Missouri Public Service Commission

Attention: Wireline Competition Bureau

The accompanying tariff material, issued on behalf of the National Exchange Carrier Association, Inc. (NECA) bearing Tariff F.C.C. No. 5, Access Service, is sent to you for filing, in compliance with the Communications Act of 1934, as amended.

The filing, to become effective July 31, 2004, consists of tariff pages as indicated on the following check sheet:

> Tariff F.C.C. No. 5   539th Revised Page 1

This filing adds Glenwood Telephone Company (SAC 220365), Mebtel, Inc. (SAC 230485), Planters Rural Telephone Cooperative, Inc. (SAC 220378) and Table Top Telephone Company, Inc. (SAC 453334) to the list of companies applying Local Number Portability (LNP) charges.

In compliance with Section 61.14 of the Commission's Rules, the transmittal, associated files, required Form 159 and $695.00 filing fee are being transmitted electronically today via the Commission's Electronic Tariff Filing System.

All correspondence and inquiries concerning this filing should be directed to me at the above address or faxed to 973-884-8082.

Bill Cook

NATIONAL EXCHANGE CARRIER ASSOCIATION, INC.
REVISIONS TO ACCESS TARIFF F.C.C. NO. 5
LOCAL NUMBER PORTABILITY CHARGES
TRANSMITTAL NO. 1034
July 16, 2004

DESCRIPTION AND JUSTIFICATION

1. INTRODUCTION

The National Exchange Carrier Association, Inc. proposes to modify its Access Tariff F.C.C. No. 5 to reflect the addition of Local Number Portability (LNP) End User Charges for Glenwood Telephone Company (Glenwood), which has received a bonafide request for number portability. The services provided by Glenwood are consistent with Section 13.14, Local Number Portability Services, of NECA's Tariff F.C.C. No. 5.

2. LNP DEMAND, COST AND RATE DEVELOPMENT

The demand for LNP capable access lines and queried calls were projected over five years. Glenwood does not currently have PBX or ISDN-PRI lines; however, a PBX End User Charge and an ISDN-PRI End User Charge have been calculated for it, at nine times and five times the End User Charge, respectively.

Costs provided by the company include switch upgrade investments required to support wireline and wireless LNP capability, and projected ongoing expenses over five years. LNP End User Charges were set to equate the present value of revenues to the present value of cost outlays. Present values of total costs were obtained using a discount factor of 15.21%, which is the after-tax cost of money (11.25%) grossed up for the tax rate (35%). This gross-up is only applied to the equity portion of the cost of money, because the debt portion is already tax-deductible, but the equity portion is taxable.

The circuit switching costs used in the development of the LNP End User Charges are only those direct costs required to implement LNP. In identifying which of these LNP costs could be included in the rate, the company used two criteria to isolate LNP costs, based on the FCC guidelines: (1) the costs would not have been incurred by the telephone company if number portability was not implemented, and (2) the costs were incurred "for the provision of" number portability. Using these criteria yielded an investment amount of $20,400. This amount includes switch manufacturer LNP software fees and translation costs.

Beginning year one, expenses recovered by the End User Charge range from approximately $1,700 to $2,700 per year, and fall into the following categories: a)

projected charges to be paid to the query provider for queries that the telephone company initiates in its capacity as an N-1 carrier, b) database administrator charges, and c) testing, maintenance, and training costs. Query expenses are only for queries necessary to complete local and Extended Area Service (EAS) calls originated from the company's end users. End user query expenses were obtained by multiplying query projections by the per query rate, paid by the telephone company to its query provider.

The demand and costs used to develop LNP End User Charges for the company are detailed in Exhibit 1A. (See Exhibit 1A attached.)

Transmittal No. 1034

NATIONAL EXCHANGE CARRIER ASSOCIATION, INC.
REVISIONS TO ACCESS TARIFF FCC NO. 5
LOCAL NUMBER PORTABILITY CHARGES
TRANSMITTAL NO. 1034
July 16, 2004

DESCRIPTION AND JUSTIFICATION

1. INTRODUCTION

The National Exchange Carrier Association, Inc. proposes to modify its Access Tariff
F.C.C. No. 5 to reflect the addition of Local Number Portability (LNP) End User
Charges and Query Service Charges for Mebtel, Inc. (Mebtel), which has received a
bonafide request for number portability. Mebtel is also processing LNP database
queries on behalf of other carriers. The services provided by Mebtel are consistent
with Section 13.14, Local Number Portability Services, of NECA's Tariff F.C.C.
No. 5.

2. LNP DEMAND, COST AND RATE DEVELOPMENT

The demand for LNP capable access lines, including PBX trunks and ISDN-PRI lines,
and queried calls were projected over five years. The PBX End User Charge and
ISDN-PRI End User Charge have been calculated at nine times and five times the End
User Charge, respectively.

Costs provided by the company include switch upgrade investments required to
support wireline and wireless LNP capability, and projected ongoing expenses over
five years. LNP End User Charges were set to equate the present value of revenues to
the present value of cost outlays. Present values of total costs were obtained using a
discount factor of 15.21%, which is the after-tax cost of money (11.25%) grossed up
for the tax rate (35%). This gross-up is only applied to the equity portion of the cost of
money, because the debt portion is already tax-deductible, but the equity portion is
taxable.

The circuit switching costs used in the development of the LNP End User Charges are
only those direct costs required to implement LNP. In identifying which of these LNP
costs could be included in the rate, the companies used two criteria to isolate LNP
costs, based on the FCC guidelines: (1) the costs would not have been incurred by the
telephone company if number portability was not implemented, and (2) the costs were
incurred "for the provision of" number portability. Using these criteria yielded an
investment amount of $41,837. This amount includes switch manufacturer LNP
software fees and translation costs.

Beginning year one, expenses recovered by the End User Charge range from approximately $15,700 to $16,400 per year, and fall into the following categories: a) projected charges to be paid to the query provider for queries that the Telephone Company initiates in its capacity as an N-1 carrier, b) database administrator charges, and c) training, planning, and programming costs. Query expenses are only for queries necessary to complete local and Extended Area Service (EAS) calls originated from the company's end users. End user query expenses were obtained by multiplying query projections by the per query rate, paid by the telephone company to its query provider.

The demand and costs used to develop LNP End User Charges for the company are detailed in Exhibit 2A. (See Exhibit 2A attached.)

Allocation of investments and expenses to the LNP Query Service Charge are based on the ratio of N-1 queries to total queries. Expenses include charges for queries performed on behalf of N-1 carriers. Demand for LNP Query Service is the total projected demand for prearranged and default N-1 queries. The development of the Query Service Charge is detailed in Exhibit 2B. (See Exhibit 2B attached)

A one time LNP Billing Charge (per account) applies to N-1 carriers who terminate non-queried traffic in the Telephone Company's network and have not prearranged with the Telephone Company to perform LNP queries. Cost support for the LNP Billing Charge is shown in Exhibit 2C. (See Exhibit 2C attached)

DESCRIPTION AND JUSTIFICATION

1. INTRODUCTION

   The National Exchange Carrier Association, Inc. proposes to modify its Access Tariff
   F.C.C. No. 5 to reflect the addition of Local Number Portability (LNP) End User
   Charges and Query Service Charges for Planters Rural Telephone Cooperative, Inc.
   (Planters), which has received a bonafide request for number portability. Planters is
   also processing LNP database queries on behalf of other carriers. The services
   provided by Planters are consistent with Section 13.14, Local Number Portability
   Services, of NECA's Tariff F.C.C. No. 5.

2. LNP DEMAND, COST AND RATE DEVELOPMENT

   The demand for LNP capable access lines, including PBX trunks, and queried calls
   were projected over five years. The PBX End User Charge was calculated at nine
   times the End User Charge. Planters does not currently have ISDN-PRI lines;
   however, an ISDN-PRI End User Charge has been calculated for it at five times the
   End User Charge.

   Costs provided by the company include switch upgrade investments required to
   support wireline and wireless LNP capability, and projected ongoing expenses over
   five years. LNP End User Charges were set to equate the present value of revenues to
   the present value of cost outlays. Present values of total costs were obtained using a
   discount factor of 15.21%, which is the after-tax cost of money (11.25%) grossed up
   for the tax rate (35%). This gross-up is only applied to the equity portion of the cost of
   money, because the debt portion is already tax-deductible, but the equity portion is
   taxable.

   The circuit switching costs used in the development of the LNP End User Charges are
   only those direct costs required to implement LNP. In identifying which of these LNP
   costs could be included in the rate, the companies used two criteria to isolate LNP
   costs, based on the FCC guidelines: (1) the costs would not have been incurred by the
   telephone company if number portability was not implemented, and (2) the costs were

Page 5 of 8

Transmittal No. 1034

incurred "for the provision of" number portability. Using these criteria yielded an investment amount of $74,971. This amount includes switch manufacturer LNP software fees and translation costs.

Beginning year one, expenses recovered by the End User Charge range from approximately $6,100 to $7,100 per year, and fall into the following categories: a) projected charges to be paid to the query provider for queries that the Telephone Company initiates in its capacity as an N-1 carrier, b) database administrator charges, and c) training, planning, and programming costs. Query expenses are only for queries necessary to complete local and Extended Area Service (EAS) calls originated from the company's end users. End user query expenses were obtained by multiplying query projections by the per query rate, paid by the telephone company to its query provider.

The demand and costs used to develop LNP End User Charges for the company are detailed in Exhibit 3A. (See Exhibit 3A attached.)

Allocation of investments and expenses to the LNP Query Service Charge are based on the ratio of N-1 queries to total queries. Expenses include charges for queries performed on behalf of N-1 carriers. Demand for LNP Query Service is the total projected demand for prearranged and default N-1 queries. The development of the Query Service Charge is detailed in Exhibit 3B. (See Exhibit 3B attached)

A one time LNP Order Charge (per order) applies to N-1 carriers who prearrange to have the Telephone Company perform queries on their behalf. Cost support for the LNP Order Charge is shown in Exhibit 3C. (See Exhibit 3C attached)

A one time LNP Billing Charge (per account) applies to N-1 carriers who terminate non-queried traffic in the Telephone Company's network and have not prearranged with the Telephone Company to perform LNP queries. Cost support for the LNP Billing Charge is shown in Exhibit 3C. (See Exhibit 3C attached)

NATIONAL EXCHANGE CARRIER ASSOCIATION, INC.
REVISIONS TO ACCESS TARIFF F.C.C. NO. 5
LOCAL NUMBER PORTABILITY CHARGES
TRANSMITTAL NO. 1034
July 16, 2004

DESCRIPTION AND JUSTIFICATION

1. INTRODUCTION

The National Exchange Carrier Association, Inc. proposes to modify its Access Tariff
F.C.C. No. 5 to reflect the addition of Local Number Portability (LNP) End User
Charges for Table Top Telephone Company, Inc. (Table Top), which has received a
bonafide request for number portability. The services provided by Table Top are
consistent with Section 13.14, Local Number Portability Services, of NECA's Tariff
F.C.C. No. 5.

2. LNP DEMAND, COST AND RATE DEVELOPMENT

The demand for LNP capable access lines and queried calls were projected over five
years. Table Top does not currently have PBX or ISDN-PRI lines; however, a PBX
End User Charge and a ISDN-PRI End User Charge have been calculated for it, at
nine times and five times the End User Charge, respectively.

Costs provided by the company include switch upgrade investments required to
support wireline and wireless LNP capability, and projected ongoing expenses over
five years. LNP End User Charges were set to equate the present value of revenues to
the present value of cost outlays. Present values of total costs were obtained using a
discount factor of 15.21%, which is the after-tax cost of money (11.25%) grossed up
for the tax rate (35%). This gross-up is only applied to the equity portion of the cost of
money, because the debt portion is already tax-deductible, but the equity portion is
taxable.

The circuit switching costs used in the development of the LNP End User Charges are
only those direct costs required to implement LNP. In identifying which of these LNP
costs could be included in the rate, the company used two criteria to isolate LNP costs,
based on the FCC guidelines: (1) the costs would not have been incurred by the
telephone company if number portability was not implemented, and (2) the costs were
incurred "for the provision of" number portability. Using these criteria yielded an
aggregate investment amount of $121,178, including switch manufacturer LNP
software fees, testing and translation costs. Because of the non-contiguous nature of its

study area, Table Top has five stand alone offices at large distances from each other, spread throughout Arizona. Each of these switches require LNP software upgrades, and translations adding up to the above amount.

Beginning year one, expenses recovered by the End User Charge range from approximately $2,700 to $24,800 per year, and fall into the following categories: a) projected charges to be paid to the query provider for queries that the telephone company initiates in its capacity as an N-1 carrier, b) database administrator charges, and c) consulting and training costs. Query expenses are only for queries necessary to complete local and Extended Area Service (EAS) calls originated from the company's end users. End user query expenses were obtained by multiplying query projections by the per query rate, paid by the telephone company to its query provider.

The demand and costs used to develop LNP End User Charges for the company are detailed in Exhibit 4A. (See Exhibit 4A attached.)
