25. The Commission has found that the interexchange market which FPCLD seeks to enter is sufficiently competitive so as to justify a lesser degree of regulation. In Re Classification of Service Provided by Interexchange Telecommunications Carrier within the State of Missouri, Case No. TO-88-142, Report and Order (effective October 16, 1989) at pp. 19-20. Expeditious grant of the instant request for certification will expand customer service options and increase the competition in the provision of interexchange services, consistent with the Commission's policies, and the legislative goals set forth in Chapter 392 RSMo and the federal Telecommunications Act of 1996. Accordingly, Applicant's proposed operations are in the public interest.

26. FPCLD requests that the Commission grant it a certificate of service authority to provide intrastate interexchange and local exchange telecommunications services to the public in the State of Missouri. If granted local exchange authority, such authority will be limited to the provisioning of dedicated, non-switched local exchange private line services. FPCLD also requests classification as a competitive telecommunications company and classification of its services as competitive. In addition, FPCLD requests a waiver of the above-referenced rules and statutory provisions.
