(FC) 6.15.1 General

- A. The Telephone Company furnishes, where facilities permit, Directory Assistance Call Completion (DACC) whereby customers may request the completion of local or intraLATA long distance calls to a requested number by either the Directory Assistance operator or the Directory Assistance audio response system that provides the requested directory number. DACC is classified as a noncompetitive service.
- B. The DACC portion of the call may either be billed in the same manner as the DA portion or alternately billed by using a Telecommunications Company Calling Card, billed to a third number or collect.
- C. Business customers may obtain DACC screening at no additional charge. DACC screening gives business customers the option of allowing DACC only on an alternately billed basis from the customer's lines. Where facilities permit, the customer may choose to apply this option to all DACC calls or to intraLATA long distance DACC calls only.
- D. The three types of DACC offered are as follows:

Fully-Automated DACC

The customer receives the requested directory number from the automated Interactive Voice System (IVS). The customer accepts DACC from the IVS by depressing "1" from a Touch-Tone telephone during the first DACC announcement and the call completes without operator intervention for completion or billing assistance.

Semi-Automated DACC

The customer receives the requested directory number from the IVS or verbally from the operator. The customer may request DACC by either allowing the IVS to time-out back to the operator to provide call completion, or the operator completes the call following the verbal report.
