

2017 INTEGRATED RESOURCE PLAN

FOCUSED ENERGY. *For life.*

Chapter 1: Executive Summary

Chapter 1 – Appendix A

Chapter 2: Planning Environment

Highlights	1
2.1 General Economic Conditions	1
2.2 Financial Markets	2
2.3 Load Growth.....	4
2.4 Reliability Requirements	7
2.5 Energy Markets	7
2.5.1 Natural Gas Market	8
2.5.2 Coal Market.....	11
2.5.3 Nuclear Fuel Market.....	13
2.5.4 Electric Energy Market	15
2.5.5 Power Capacity Market	15
2.5.6 Renewable Energy Standard	16
2.6 Environmental Regulations.....	17
2.7 Price Scenarios	20
2.8 Compliance References	24

Chapter 3: Load Analysis and Forecasting

Highlights	1
3.1 Energy Forecast	1
3.1.1 Historical Database	3
3.1.2 Forecast Vintage Comparison.....	3
3.1.3 Service Territory Economy	7
3.1.4 Economic Drivers	10
3.1.5 Energy Forecasting	12
3.1.6 Sensitivities and Scenarios	25
3.1.7 Planning Case Forecast.....	28
3.1.8 Forecast Results	28
3.2 Peak and Hourly System Load Forecast	37
3.2.1 Historical Peak and System Load	39

3.2.2	Profile Shapes.....	41
3.2.3	Peak Load Forecast	47
3.2.4	Hourly System Load Forecast.....	52
3.2.5	Forecast Results	54
3.2.6	Base Case Peak Demand Forecast.....	55
3.2.7	Peak Demand – Extreme Weather Sensitivity.....	59
3.3	Weather Normalization	60
3.4	Future Research Projects	62
3.5	Compliance References	64

Chapter 3 – Appendix A

Chapter 3 – Appendix B

Chapter 4: Existing Supply-side Resources

Highlights	1
4.1 Existing Generation Portfolio	2
4.1.1 Existing Coal Resources	2
4.1.2 Existing Gas & Oil Resources	5
4.1.3 Existing Nuclear Resource	6
4.1.4 Existing Renewable and Storage Resources	6
4.1.5 Levelized Cost of Energy Evaluation for Existing Resources	9
4.1.6 Planned Changes to Existing Non-Coal Resources	10
4.2 Existing Steam Generation Evaluation	11
4.2.1 Operations and Maintenance Costs	12
4.2.2 Capital Expenditures	13
4.3 Efficiency Improvement	15
4.3.1 Existing Facility Efficiency Options	15
4.3.2 Existing Energy Center Efficiency Options	16
4.4 Compliance References	17

Chapter 4 – Appendix A

Chapter 5: Environmental Compliance

Highlights	1
5.1 Overview	2
5.2 Air Regulation and Compliance Assumptions.....	4
5.3 Water Regulation and Compliance Assumptions.....	17
5.4 Solid Waste Regulation and Compliance Assumptions	20
5.5 Clean Power Plan (CPP)	23
5.6 Compliance References	25

Chapter 6: New Supply Side Resources

Highlights	1
6.1 New Thermal Resources	2
6.1.1 Potential Coal and Gas Options	2
6.1.2 Potential Nuclear Resources.....	4
6.2 Potential Renewable Resources	6
6.2.1 Potential Landfill Gas Projects	6
6.2.2 Potential Hydroelectric Projects	9
6.2.3 Potential Anaerobic Digestion Projects	11
6.2.4 Potential Biomass Projects.....	13
6.2.4.1 Assessment of Existing Biomass Resources	16
6.2.5 Potential Solar Resources.....	18
6.2.6 Potential Wind Resources.....	21
6.3 Potential Storage Resources.....	22
6.4 Power Purchase Agreements.....	28
6.5 Final Candidate Resource Options.....	28
6.6 Compliance References	30

Chapter 6 – Appendix A

Chapter 6 – Appendix B

Chapter 6 – Appendix C

Chapter 7: Transmission and Distribution

Highlights	1
7.1 Transmission	3
7.1.1 Existing System.....	3
7.1.2 Regional Transmission Organization Planning.....	3
7.1.3 Ameren Missouri Transmission Planning	7
7.1.4 Avoided Transmission Cost Calculation Methodology	8
7.1.5 Transmission Impacts of Potential Ameren Missouri Generation Resource Additions/Retirements & Power Purchases/Sales.....	9
7.1.6 Cost Allocation Assumptions for Modeling	13
7.1.7 Advanced Transmission System Technologies.....	14
7.1.8 Ameren Missouri Affiliates Relationship	16
7.2 Distribution.....	17
7.2.1 Existing System.....	17
7.2.2 System Inspection.....	19
7.2.3 System Planning	20
7.2.4 Peak Demand Reduction via Voltage Control	23
7.2.5 System Efficiency	24
7.2.6 Distributed Generation	26
7.2.7 Advanced Distribution System Technologies	26
7.2.8 Ameren Missouri's Smart Grid Plan	28
7.2.9 Advanced Technology Investment Strategy	35
7.3 Compliance References	38

Chapter 7 – Appendix A

Chapter 7 – Appendix B

Chapter 8: Demand-Side Resources

Highlights	1
8.1 Implementation Plan Summary.....	2
8.1.1 Introduction	2
8.2 DSM Potential Study & Implementation Plan	4
8.2.1 2016 Ameren Missouri DSM Potential Study	4
8.2.1.1 Overview	4

8.2.1.2	Stakeholder Interactions during DSM Potential Study.....	5
8.2.1.3	Overall Conclusions	5
8.2.1.4	Energy Efficiency Potential.....	5
8.2.1.5	Portfolio Descriptions	8
8.2.1.6	Portfolio Impacts and Costs	9
8.3	Evaluation Measurement and Verification (EM&V).....	12
8.3.1	Existing EM&V Model.....	12
8.3.2	Proposed EM&V Model	13
8.3.2.1	Evaluation Contractor Role	13
8.3.2.2	Evaluation Plan	13
8.3.2.3	Impact Evaluations	13
8.3.2.4	Process Evaluations.....	14
8.3.2.5	Data Collection	14
8.3.2.6	Internal Verification and Quality Control	14
8.3.2.7	Annual EM&V Reporting	15
8.4	Outreach, Marketing and Communications	15
8.5	The Planning Process	15
8.5.1	Cost-Effectiveness Defined	15
8.5.2	Interactive Effects.....	17
8.6	Demand-Side Rate Potential	17
8.6.1	Introduction	17
8.6.2	Approach.....	18
8.6.3	Inclining Block Rates.....	21
8.6.4	Residential Demand Charges	26
8.6.5	Implementation.....	26
8.7	DSM Potential Uncertainty	27
8.7.1	Risk and Uncertainty Analysis.....	27
8.8	Other Special Contemporary Issues.....	33
8.8.1	Distributed Generation & Combined Heat & Power.....	33
8.8.2	Utility Rates/Standards for DG Development	33
8.8.3	DER Deployment	34

8.8.4	Potential Benefits of Co-delivery of DSM programs	35
8.8.5	DSM Opportunities for Providing Customer Financing	37
8.8.5.1	Customer Financing	37
8.8.5.2	Ameren Missouri's Current Focus	38
8.8.6	DSM Opt-out Considerations	39
8.8.7	Electric Vehicles	40
8.8.8	Conservation Voltage Reduction	40
8.9	Compliance References	44

Chapter 8 – Appendix A

Chapter 8 – Appendix B

Chapter 8 – Appendix C

Chapter 8 – Appendix D

Chapter 8 – Appendix E

Chapter 9: Integrated Resource Plan and Risk Analysis

Highlights	1
9.1 Alternative Resource Plan Attributes	2
9.2 Capacity Position	2
9.3 Planning Objectives	7
9.4 Determination of Alternative Resource Plans	9
9.5 Sensitivity Analysis	13
9.5.1 Uncertain Factors	13
9.5.2 Sensitivity Analysis Results	19
9.6 Risk Analysis	22
9.6.1 Risk Analysis Results	23
9.7 Conclusions from Integration and Risk Analysis	24
9.8 Resource Plan Model	25
9.9 Compliance References	28

Chapter 9 – Appendix A

Chapter 10: Strategy Selection

Highlights	1
10.1 Planning Objectives.....	2
10.2 Assessment of Alternative Resource Plans	4
10.2.1 Scoring of Alternative Resource Plans	4
10.2.2 DSM Portfolio Considerations	7
10.3 Preferred Plan Selection.....	9
10.4 Contingency Planning	11
10.4.1 DSM Cost Recovery and Incentives.....	11
10.4.2 Addition of Large Customer Load.....	12
10.4.3 Greenhouse Gas Regulation.....	12
10.4.4 Optionality for New Generation	13
10.5 Resource Acquisition Strategy.....	13
10.5.1 Preferred Plan.....	14
10.5.2 Contingency Plans	15
10.5.3 Expected Value of Better Information Analysis	15
10.5.4 Implementation Plan	17
10.5.5 Monitoring Critical Uncertain Factors	18
10.6 Compliance References	20

Chapter 10 – Appendix A**Chapter 10 – Appendix B****Chapter 10 – Appendix C****Chapter 11: Stakeholder Process**

Highlights	1
11.1 Stakeholder Group	2
11.2 Stakeholder Workshop.....	2
11.3 Stakeholder Comments on Draft Report	3
11.3.1 Comments-Department of Economic Development-Division of Energy	3
11.3.2 Comments-Office of Public Counsel	6
11.4 Special Contemporary Issues	7
11.5 Post-Filing Activities	13
