11 Q. Please state your name and business address.

12 A. Steve M. Traxler, Fletcher Daniels State Office Building, Room G 8, 615 East  
13 13th Street, Kansas City, Missouri 64106.

14 Q. Have you prefiled direct testimony in this proceeding?

15 A. Yes, I have.

16 Q. What is the purpose of your surrebuttal testimony?

17 A. Because the Staff now has information from Aquila that allows it to do so, I  
18 quantify an adjustment to Aquila's FAS 106 funding deficiency for loss of investment  
19 earnings that I identified in my prefiled direct testimony. Aquila agrees with this adjustment.  
20 I also respond to rebuttal testimony of AARP witness David J. Effron related to Aquila's  
21 FAS 106 funding deficiency and the elimination of specific deferred income tax debits from  
22 rate base.

23 **FAS 106 FUNDING DEFICIENCY**

24 Q. Have you addressed Aquila's existing funding deficiency related to Aquila's  
25 FAS 106 obligation before in this case?

Surrebuttal Testimony of  
Steve M. Traxler

1           A.     Yes. On pages 8 – 10 of my prefiled direct testimony I address the funding  
2 deficiency that resulted from Aquila’s failure to comply with the funding requirement under  
3 Section 386.315 RSMo.

4           Q.     Has the Staff made any adjustments based on Aquila’s funding deficiency?

5           A.     Yes. On pages 12 and 13 of my prefiled direct testimony I explain the  
6 adjustments made to the FAS 106 cost calculation, for the L&P division, to eliminate the  
7 funding deficiency’s detrimental impact on the 2005 FAS 106 calculation of postemployment  
8 benefits other than pensions (OPEB costs).

9           Q.     How did the Staff calculate its adjustments, included in the Staff’s direct  
10 filing, to eliminate the detrimental impact of the funding deficiency on Aquila’s 2005  
11 FAS 106 calculation?

12          A.     One of the components of the FAS 106 calculation is the expected rate of  
13 return assumption. The expected rate of return represents the estimated earnings on investing  
14 the funded assets. The investment earnings are used to offset the current year estimate for the  
15 OPEB benefits earned in the current year by employees. The higher the investment earnings  
16 the lower the net FAS 106 cost will be. In its direct filing, the Staff computed the expected  
17 rate of return assuming that the funding deficiency did not exist, using the same investment  
18 return used by Aquila’s actuary – 7%. The 7% rate of return was applied to the accumulated  
19 funding deficiency and used to reduce the 2005 FAS 106 calculation.

20          Q.     Is that adjustment sufficient to eliminate the detrimental impact of the funding  
21 deficiency?

Surrebuttal Testimony of  
Steve M. Traxler

1           A.     No. An additional adjustment is required to reflect the loss of earnings on the  
2 funding deficiency. If Aquila had made the required annual contributions to the VEBA trust,  
3 additional funds would have accumulated due to additional investment earnings.

4           Q.     Did the Staff include this loss of investment earnings adjustment in its direct  
5 filing?

6           A.     No. The Staff did not have sufficient information when that filing was made  
7 to quantify the adjustment. I noted in my prefiled direct testimony that the Staff had issued  
8 Staff Data Request No. 430 to obtain that information, but that that data request had not been  
9 answered prior to the Staff's direct filing.

10          Q.     Would you please explain the Staff's calculation of the loss of investment  
11 earnings adjustment?

12          A.     Aquila's response to Staff's Data Request No. 430 provided the actual  
13 investment returns earned from investing the assets in Aquila's VEBA trust. The Staff used  
14 this data to calculate the loss of earnings on the funding deficiency, which would have  
15 accrued in the fund, had Aquila timely made all required fund contributions. Adjustment  
16 S-35.18 has been updated to reflect this change for the L&P division. Aquila has agreed to  
17 this updated adjustment.

18           **EFFRON REBUTTAL – FAS 106 FUNDING DEFICIENCY**

19          Q.     On page 4 of his rebuttal testimony, Mr. Efron states that the "Staff has not  
20 recognized the time value of money to Aquila from its failure to fund its OPEB obligation, as  
21 required by Missouri law." Do you agree with this assertion?

Surrebuttal Testimony of  
Steve M. Traxler

1           A.     No, I do not. The “time value of money” concept has been addressed by the  
2 additional adjustments explained above. The Staff has restated the expected rate of return  
3 assumption in Aquila’s 2005 FAS 106 calculation to reflect, both:

4                   1)     the assumption that the funding deficiency had not occurred and was  
5 available for investment with the expected earnings used to reduce the 2005 FAS 106  
6 cost; and

7                   2)     the assumption to also include the additional earnings that would have  
8 accrued on the funding deficiency in prior years, had these amounts been funded on  
9 an annual basis and been available for investment.

10          Q.     Does Mr. Effron’s proposed adjustments to address the “time value of money”  
11 have anything to do with restating Aquila’s 2005 FAS 106 cost for the purpose of eliminating  
12 the detrimental impact resulting from Aquila’s failure to fund its FAS 106 obligation as  
13 required under Section 386.315 RSMo?

14          A.     No. Mr. Effron is proposing to flow back \$402,000 to L&P ratepayers over a  
15 three-year period. This amount represent the value to Aquila for having had the use of the  
16 funding deficiency amounts, as a result of collecting these amounts in rates, but not making  
17 annual contributions of these monies to fund its FAS 106 obligation. Mr. Effron has used the  
18 Staff’s midpoint rate of return, grossed up for income taxes, to compute the value to Aquila  
19 of having had the use of the funding deficiency monies through December 31, 2005.  
20 Mr. Effron’s proposed adjustment is not necessary to restate Aquila’s 2005 FAS 106 cost for  
21 the purpose of eliminating the detrimental impact resulting from the funding deficiency.

22          Q.     How would you characterize Mr. Effron’s “time value of money” adjustment?

Surrebuttal Testimony of  
Steve M. Traxler

1           A.     Mr. Effron's proposed time value of money adjustment can be fairly  
2 characterized as a penalty to Aquila for having failed to comply with the funding requirement  
3 of Section 386.315 RSMo. Since Mr. Effron's time value of money adjustments are not  
4 necessary to restate Aquila's 2005 FAS 106 cost, in order to eliminate the impact of the  
5 funding deficiency, they represent a penalty to Aquila for not having made the required  
6 annual contributions to fund its FAS 106 obligation.

7           Q.     How should any penalty to Aquila, for its failure to comply with Section  
8 386.315 RSMo be addressed?

9           A.     The Office of the Public Counsel (OPC) has filed a complaint, Case No.  
10 EC-2006-0171, against Aquila for its failure to comply with Section 386.315 RSMo. It is the  
11 Staff's view that any penalties, resulting from the violation of the funding requirement under  
12 Section 386.315 RSMo, must be addressed in Case No. EC-2006-0171.

13           **EFFRON REBUTTAL - ELIMINATION OF SPECIFIC DEFERRED TAX DEBITS**  
14           **FROM RATE BASE**

15           Q.     What additional section of the rebuttal testimony of AARP witness David  
16 Effron do you wish to respond to?

17           A.     On pages 5-8 of his rebuttal testimony, AARP witness David Effron proposes  
18 to eliminate specific Deferred Income Tax Debit balances from Rate Base. I will express the  
19 Staff's agreement on elimination of some of the specific deferred tax balances addressed by  
20 Mr. Effron, and disagreement on others.

21           Q.     On pages 5 and 6 of his rebuttal testimony, Mr. Effron asserts that the deferred  
22 tax debit balance related to Aquila's FAS 106 OPEB liability should be eliminated from Rate

Surrebuttal Testimony of  
Steve M. Traxler

1 Base because it results from Aquila's failure to fund its FAS 106 obligation. What is the  
2 Staff's view on this recommendation?

3 A. The Staff agrees with Mr. Efron's argument that the deferred tax debit,  
4 related to FAS 106 OPEB costs, should be excluded from Rate Base because it resulted from  
5 Aquila's failure to fund its FAS 106 costs collected in rates. If Aquila had made annual  
6 contributions to its VEBA trust equal to its annual FAS 106 cost, a deferred tax debit would  
7 not exist.

8 Q. On pages 7 and 8 of his rebuttal testimony, Mr. Efron identifies specific  
9 deferred tax debits, in Account 190, that in his view should be removed from Rate Base.  
10 Does the Staff agree with these recommendations?

11 A. Mr. Efron identifies the specific deferred tax debit balances he is addressing  
12 on his rebuttal schedule DJE-2. As previously stated, the Staff agrees with Mr. Efron's  
13 recommendation on the Other Post Retirement Benefits shown as the first balance on  
14 Efron's rebuttal schedule DJE-2.

15 The Staff agrees with Mr. Efron's recommendation related to Aquila's Supplemental  
16 Retirement Plan because the cost of this plan has not been included in cost of service by the  
17 Staff in prior cases. Any tax timing difference and resulting deferred tax balance should also  
18 be ignored for ratemaking purposes.

19 Q. What is the Staff's position regarding the deferred tax debit for Allocated  
20 Costs listed on Mr. Efron's rebuttal schedule DJE-2?

21 A. Allocated Costs include pension and OPEB costs allocated from Aquila's  
22 corporate headquarter departments to the L&P division. As previously explained, any  
23 deferred tax debit related to FAS 106 OPEB costs should be excluded from Rate Base.

Surrebuttal Testimony of  
Steve M. Traxler

1           The timing difference for pension cost results from using an accrual accounting  
2 method, FAS 87, for financial reporting and the ERISA contribution in determining taxable  
3 income for IRS purposes. The prior rates for the L&P division were set based upon the  
4 ERISA minimum contribution. The rates established in this case, Case No. ER-2005-0436,  
5 will also be based upon the ERISA minimum contribution for pension cost. Since the ERISA  
6 contribution is also used for IRS purposes, the timing difference related to pension cost has  
7 been eliminated for ratemaking purposes. If the deferred tax debit balance for pension cost  
8 occurred since the ERISA contribution has been used for setting rates, it is appropriate to  
9 exclude the deferred tax balance for pension cost from Rate Base. . Staff has requested that  
10 Aquila identify the amount of pension cost and OPEB cost which is included in Account 190  
11 – Allocated Costs.

12           Q.     Does this conclude your surrebuttal testimony?

13           A.     Yes it does.
