G. Billing Rules for Message Service

- The monthly period for the message rate product begins on the first billing date following the date of connection. For the fraction of the month proceeding the billing date, a proportionate part of the monthly rate is billed and a proportionate allowance of local messages is made; excess messages, if any, are charged for in each excess message rate step in like proportion.
- When a customer changes to or from a message rate service, a proportionate part of the monthly contract rate and a corresponding allowance of local messages are made for the fraction of the billing period during which message rate service is used; excess messages, if any, are charged for in each excess message rate step in like proportion.
- If the allowance is not used in any one month, no credit of messages not used is applied against messages used in any other month.
- The furnishing of flat and message rate services on the same premises is not permitted.
- All message rate services of the same class furnished to the same customer for the same central office designation and installed on the same customer premises are considered collectively in determining the message allowance and excess messages. However message rate services of the same class or of different classes furnished to the same customer and installed on different premises or with different central office designations are not considered collectively in determining message allowances and excess messages.
