The new volume commitment will apply beginning in the following month for monthly commitments and as of the beginning of the commitment year in which the new volume commitment is elected for annual commitments. The discounts associated with the new commitment volume level apply to charges and usage only from the new election date forward.

RECD SEP 09 1999

13.7.1 Description

FX Service enables a Customer to receive Company-provided Exchange Access Service at a point outside the Local Exchange Service Area that normally serves the customer's location. FX service can be used to receive one-way inbound digital traffic only. Customers subscribing to FX service must purchase an entire T-1 and meet the following conditions: 1) 100 percent of the traffic carried must be inbound local; and 2) the average off-hook time per call is more than ten minutes.

The Local Exchange Calling Area and all Usage Services rates which apply to a FX Exchange Access Service are the same as those which regularly apply to other Company-provided Exchange Access Services bearing the same NPA-NXX designation.

Customers are prohibited from using FX service to place outbound calls including, but not limited to "911" emergency numbers. This restriction is required in order to assure that emergency calls are routed to the Public Safety Answering Point serving the geographical area associated with the Customer's telephone number. The Company strongly recommends that each Customer maintain at least one telephone exchange service access line bearing an NPA-NXX designation associated with the Customer's actual geographic location for emergency use.

FX Service customers are not eligible to enroll in the On-Net Term Plan or Local On-Net Term Plan discount programs.

TARIFF FORMAT

- A. **Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd revised Page 14. Because of the various suspension periods and deferrals the Commission follows in its tariff approval process, the most current page number on file with the Commission is not always the tariff page in effect.
- C. **Paragraph Numberings Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2
- 2.1
- 2.1.1
- 2.1.1.A
- 2.1.1.A.1
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).1
- 2.1.1.A.1.(a).1.(i)
- 2.1.1.A.1.(a).1.(i)(1)

EXPLANATION OF SYMBOLS

Changes to this tariff are identified on the revised page(s) through the use of symbols. The following are the symbols used and the change indicated by them:

- (C) - To signify a changed regulation.
- (D) - To signify a discontinued rate or regulation.
- (I) - To signify an increase in rate or charge.
- (M) - To signify material relocated from one page to another without change.
- (N) - To signify a new rate or regulation.
- (R) - To signify a reduced rate or charge.
- (S) - To signify a correction or reissued matter.
- (T) - To signify a change in text but no change in rate or regulation.

- (1) The Maximum Service and Equipment Charge per line is \$7.75 and \$14.50 for residential and business, respectively, except when the Simultaneous Call Forwarding service is established.
- (2) This rate is inclusive of the Cancel Call Waiting option where available.
- (3) Speed Calling 8 (business) and Speed Calling 30 (residence) are available only to existing customers at existing locations.
- (4) If Personalized Ring is ordered at the same time as another EasyOptionsSM service(s), the higher Service and Equipment Charge is applied.
- (5) Only one Service and Equipment Charge applies when more than one dependent DN is ordered or changed simultaneously.
- (6) Applies in addition to the Service and Equipment Charge for other EasyOptionsSM services.
- (7) Not used
- (9) In addition, a Service Establishment Charge of \$2.00 applies.
- (10) Caller ID (Calling Number and Name delivery). This feature enables the customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the CPN of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Per line blocking for the blocking of CPN will be available upon request, at no charge, to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to carrier

private, nonprofit, tax exempt, domestic violence intervention agencies and federal, state, and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call.

Line blocking customers can unblock their CPN information on a per call basis, at no charge by dialing an access code (*82 on their Touch Tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A customer may prevent the delivery of their calling name and or number to the called party by dialing an access code (#67 on their Touch Tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification customers will receive an anonymous indicator. This anonymous indicator notifies the caller ID customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer-Owned Pay Telephone Service. If the Caller ID customer also subscribes to Anonymous call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

FOOTNOTES (9) (Continued)

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the caller ID subscriber. Resale of this information is prohibited by this Tariff. CPN will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator handled calls.
