Exhibit No. \_\_\_\_\_

Issues: Revenue Requirement

Witness: Brent Thies

Type of Exhibit: Direct Testimony

Sponsoring Party: Confluence Rivers Utility

Operating Company, Inc

File Nos.: WR-2023-0006 / SR-2023-0007

Date: December 21, 2022

### **Missouri Public Service Commission**

**Direct Testimony** 

of

**Brent Thies** 

On Behalf of

**Confluence Rivers Utility Operating Company, Inc** 

**December 21, 2022** 

### **PUBLIC**

### DIRECT TESTIMONY OF

### **BRENT THIES**

### **WITNESS INTRODUCTION**

1	Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.					
2	A.	My name is Brent G. Thies, and my business address is 1630 Des Peres Rd., Suite 140,					
3		St. Louis, MO 63131.					
4	Q.	BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?					
5	A.	I am employed by CSWR, LLC. My current position is Vice President & Corporate					
6		Controller.					
7	Q.	ON WHOSE BEHALF ARE YOU FILING THIS DIRECT TESTIMONY?					
8	A.	I am filing on behalf of Confluence Rivers Utility Operating Company, Inc.					
9		("Confluence Rivers" or "Company"), which is a subsidiary of CSWR, LLC.					
10	Q.	HAVE YOU PREVIOUSLY FILED TESTIMONY BEFORE THIS					
11		COMMISSION?					
12	A.	While I have not previously filed testimony before the Missouri Public Service					
13		Commission ("Commission"), I have previously filed testimony before the state utility					
14		commissions in Louisiana, Kentucky and Mississippi.					
15	Q.	PLEASE DESCRIBE YOUR EDUCATIONAL AND PROFESSIONAL					
16		BACKGROUND.					
17	A.	I hold a Bachelor of Arts in Communications/Public Relations from Missouri Baptist					
18		University in St. Louis, Missouri, and a Bachelor of Science in Accounting from					

Midwestern Baptist Theological Seminary in Kansas City, Missouri and a Master of

Business Administration degree from the University of Missouri-St. Louis. I am licensed as a Certified Public Accountant in the state of Missouri.

A.

I have been employed in the Accounting and Finance department of CSWR, LLC, ("CSWR") since July 2017. I started at CSWR as the Senior Accountant, responsible for monthly accounting work for CSWR and its regulated utility subsidiaries. This included analysis and reporting related to regulatory requirements. I was promoted to the position of Controller in October 2018 and Vice President & Corporate Controller in February 2022. While at CSWR, I have contributed to the financial analysis, planning and filing requirements for multiple rate case filings in other jurisdictions and various data requests and analysis items in acquisition cases in the jurisdictions where CSWR subsidiaries operate.

Prior to CSWR, I was employed as the Controller of a multi-entity non-profit in St. Louis, Missouri. During my time at CSWR, I have completed the Fundamentals, Intermediate and Advanced Regulatory Studies Programs through the Institute of Public Utilities at Michigan State University.

### 16 Q. WHAT ARE YOUR DUTIES AS VICE PRESIDENT & CORPORATE 17 CONTROLLER?

As Vice President & Corporate Controller, I am responsible for the accounting books and records of CSWR and its regulated utility subsidiaries. This includes setting financial controls and accounting policy along with the responsibility for the accurate recording of revenues, expenses and capital expenditures. With my team, I am also responsible for billing operations, preparing and filing regulatory annual reports and responding to certain data requests for the regulated utility subsidiaries of CSWR. My

1		responsibilities also include preparation of monthly and quarterly management reports					
2		and interfacing with external auditors and tax professionals.					
3	Q.	WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY IN THIS					
4		PROCEEDING?					
5	A.	My testimony will support the quantification of the revenue requirement in this case					
6		and other selected financial issues. Specific topics covered in my testimony include:					
7		- Development of the Test Year and Known and Measurable adjustments					
8		- Quantification of Revenue Requirement and Revenue Deficiency					
9		- Operating Expenses					
10		- Rate Base					
11		- Accounting for Acquisition of Systems					
12		- Depreciation and Amortization					
13		- Income Taxes					
14		- Property Tax tracker					
15	Q.	ARE YOU SPONSORING ANY SCHEDULES WITH YOUR TESTIMONY?					
16	A.	Yes. I am sponsoring the following schedules.					
17		- Schedule BT-1: Revenue Requirement Summary					
18		- Schedule BT-2: Income Statement Summary-Consolidated					
19		- Schedule BT-2.1: Income Statement Summary-Water					
20		- Schedule BT-2.2: Income Statement Summary-Sewer					
21		- Schedule BT-3: Detailed Income Statement-Consolidated					
22		- Schedule BT-3.1: Detailed Income Statement-Water					
23		- Schedule BT-3.2: Detailed Income Statement-Sewer					
24		- Schedule BT-4: Rate Base Summary-Consolidated					

- Schedule BT-4.1: Rate Base Summary-Water
- 2 Schedule BT-4.2: Rate Bas Summary-Sewer
- 3 Schedule BT-5: Utility Plant in Service Summary-Consolidated
- 4 Schedule BT-5.1: Utility Plant in Service Summary-Water
- 5 Schedule BT-5.2: Utility Plant in Service Summary-Sewer
- 6 Schedule BT-6: Accumulated Depreciation-Consolidated
- 7 Schedule BT-6.1: Accumulated Depreciation Water
- 8 Schedule BT-6.2: Accumulated Depreciation -Sewer
- 9 Schedule BT-7: Income Tax Summary
- Schedule BT-8: Contributions in Aid of Constructions-Consolidated
- 11 Schedule BT-8.1: Contributions in Aid of Constructions-Water
- Schedule BT-8.2: Contributions in Aid of Constructions-Sewer
- Schedule BT-9: Working Capital-Consolidated
- Schedule BT-9.1: Working Capital-Water
- Schedule BT-9.2: Working Capital-Sewer
- Schedule BT-10: Known and Measurable Adjustments Summary
- Schedule BT-11.1: Income Conversion Factor
- Schedule BT-11.2: Revenue Conversion Factor
- Schedule BT-12: Historic Rate Base Analysis (Confidential)
- 20 Q. WAS THE INFORMATION CONTAINED IN THE SCHEDULES OBTAINED
- 21 OR DERIVED FROM THE BOOKS AND RECORDS OF CONFLUENCE
- 22 RIVERS?
- 23 A. Yes.

### **DEVELOPMENT OF THE TEST YEAR**

- 2 Q. WHAT IS THE TEST YEAR THAT THE COMPANY HAS USED IN THIS
- 3 CASE?

1

9

10

11

12

13

14

15

16

17

18

19

20

21

- 4 A. The test year used in this case is the twelve-month period ending June 30, 2022.
- 5 Confluence Rivers further proposes an updated / known and measurable period through
- 6 December 31, 2022.
- 7 Q. HOW DOES THE TEST YEAR, AS UPDATED, RELATE TO THE
  8 ACQUISITIONS THAT HAVE BEEN MADE BY CONFLUENCE RIVERS?
  - A. As of the June 30, 2022, test year date, Confluence Rivers has acquired a total 24 water systems and 39 wastewater systems. These service areas provide service to a total of 4,443 water connections and 4,602 sewer connections. In addition, Confluence Rivers has closed or anticipates closing on additional systems before the December 31, 2022, update / known and measurable period. Specifically, the Company has included, as a known and measurable adjustment, the financial impacts of its post-test year acquisition of Glenmeadows and Deer Run. That said, Confluence Rivers also anticipates closing on its acquisition of the Margaritaville system. While this acquisition may close prior to the December 31, 2022, known and measurable date, the Company does not seek to include the financial impacts of this very recent acquisition. I would direct the Commission's attention to the testimony of Mr. Thomas for a discussion of the rationale underlying the exclusion of Margaritaville from this rate case.

the number of service areas that I have identified.

<sup>&</sup>lt;sup>1</sup> It is important to recognize that the number of service areas that I identify will differ slightly from the number of facilities quantified in the engineering testimony of Mr. Freeman. My testimony focuses of the number of service areas as identified in the Confluence Rivers tariffs. On the other hand, Mr. Freeman focuses on the number facilities as identified by distinct NPDES or PWS permits. Recognizing that some service areas (i.e., Terre de Lac) may have multiple permitted facilities, the number of facilities identified by Mr. Freeman will be higher than

### 1 Q. IS THE COMPANY PROPOSING A TRUE-UP IN THIS CASE?

- 2 A. No. The Company is simply proposing a test year as updated through December 31,
- 3 2022.
- 4 Q. PLEASE EXPLAIN HOW THE TEST YEAR VALUES IN THIS CASE WERE
- 5 **DERIVED.**
- 6 A. Confluence Rivers developed the test year by analyzing and including rate base,
- 7 revenues and expense data over the 12-month period of July 2021 June 2022. Due to
- 8 the integration of newly acquired water and sewer systems throughout the test year and
- 9 the amount of ongoing capital investments planned or in process to provide safe and
- reliable service, amounts were normalized, annualized or otherwise adjusted to arrive
- at test year revenues and expenses. The Company has also incorporated known and
- measurable adjustments to test year revenues and expenses.

### REVENUE REQUIREMENT AND REVENUE DEFICIENCY

- Q. PLEASE GENERALLY DESCRIBE THE DERIVATION OF THE REVENUE
- 15 **REQUIREMENT.**

13

- 16 A. Confluence Rivers' revenue requirement, as calculated herein, is equivalent to the costs
- 17 necessary to provide service to Confluence Rivers' existing sewer and water customers
- and provide the Company an opportunity to earn a reasonable return on the value of its
- investment devoted to public utility service. Given the operational state of the systems
- 20 that the Company acquires (as discussed by Mr. Freeman), the provision of safe and
- 21 reliable service to Confluence Rivers' customers has already required, and continues
- 22 to require, increased operational expense and new capital improvements to the water
- and sewer systems.

### Q. WHAT IS CONFLUENCE RIVERS' REVENUE REQUIREMENT IN THIS

### PROCEEDING?

1

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

The revenue requirement in this proceeding is \$3,479,616 for water and \$4,685,572 for A. sewer which represent an increase over pro forma revenue at current rates of \$2,192,868 for water and \$2,823,456 for sewer. This increased revenue requirement is driven primarily by two factors. First, Confluence Rivers has made significant amounts of investment and incurred large amounts of operating costs in order to bring these systems into regulatory compliance. The capital improvement projects that have been completed are discussed in great detail in the testimony of Mr. Freeman. In addition to operating expense and capital improvements, Confluence Rivers is entitled to the opportunity to earn a fair return on the value of the capital investments that support the improvements. The rate of return used in my calculations is supported in the testimony of Company expert witness, Dylan D'Ascendis. Second, many of the systems which were acquired had not had a rate case in years, if not decades. The rates for those systems were not reflecting the costs being incurred to operate those systems. Ultimately, Confluence Rivers seeks recovery of its revenue requirement through the rate base ratemaking process. The revenue requirement accomplishing the cost recovery is found on **Schedule BT-1** for both water and sewer.

### Q. HOW IS THE REVENUE DEFICIENCY DERIVED?

A. The revenue deficiency is shown in <u>Schedule BT-1</u>. It is the difference between the total revenue requirement and present rate revenue. The revenue deficiency in this case is \$1,286,748 for water and \$1,862,116 for sewer. As mentioned, the deficiency results from the financial impact of the substantial capital investments and necessary operating

1		improvements that Confluence Rivers has implemented since acquiring the subject
2		properties.
3		PRESENT RATE REVENUE AND PROPOSED RATE REVENUE
4	Q.	PLEASE DESCRIBE HOW PRESENT RATE REVENUES WERE
5		CALCULATED.
6	A.	As mentioned, the Company is proposing a test year of the twelve months ended June
7		30, 2022, updated for known and measurable changes through December 31, 2022. For
8		systems that have been owned for more than twelve months, revenues were the actual
9		revenues realized for the test year. Recognizing that revenues for these systems were
10		not expected to materially change during the update period, we did not update the
11		revenue from these systems through December 31, 2022.
12		For systems that were acquired during the test year, the Company has not
13		collected a full twelve months of actual revenues. For these systems, an annualization
14		was conducted based upon test year revenue levels. So, if a system was acquired on
15		January 1, 2022, the Company would have collected 6 months of revenue data and
16		would annualize based on that total.
17		Finally, for those systems that were acquired after the test year (June 30, 2022),

but prior to the end of the update period (December 31, 2022), the Company used either the revenues from the most recent annual report for the system or used an annualization similar to that described above.

The annualization of present rate revenues for these acquired systems, through the end of the test year, results in an increase of \$81,922 in revenue for water and \$96,857 for sewer between the test year and the pro forma test year at present rates.

This results in a pro forma test year rate revenue of \$2,192,868 for water and \$2,823,456 for sewer.

### O. HOW WAS THE PROPOSED RATE REVENUE DEVELOPED?

The proposed rate revenue represents the increase in current rate revenue necessary to meet the revenue requirement in this case (pro forma test year revenues plus the revenue deficiency). Therefore, it is the amount necessary to cover Confluence Rivers' cost to provide safe and reliable water and sewer service, per regulatory and environmental requirements, to its customers in the pro forma test year and provide the company's investors a fair rate of return. It is summarized in the Revenue Requirement Summary included as **Schedule BT-1**.

A.

### **OPERATING EXPENSES**

### 13 Q. PLEASE DESCRIBE THE OPERATING EXPENSES INCLUDED IN YOUR 14 FILING.

A. The operating expenses included in Confluence Rivers' cost of service are categorized into three like groups. The cost groups that are <u>directly incurred</u> by Confluence Rivers include contract operations, fuel & power, chemicals, maintenance, depreciation and amortization, property taxes and administrative expenses. Certain costs incurred by Confluence Rivers are part of contracts or invoices in which services to all CSWR subsidiaries are combined for administrative efficiency and directly charged to the operating utility subsidiaries. These <u>jointly billed</u> costs include property and liability insurance, certain software and management consulting services and billing system costs. A third and final cost group includes <u>indirect charges</u> in the form of overhead charges allocated to Confluence Rivers by its parent, CSWR. The methodologies used

to assign direct charges, jointly billed charges and indirect charges to Confluence
Rivers are the same as those used to assign charges to other CSWR affiliates and are
part of CSWR's written accounting policy.

### 4 Q. PLEASE DESCRIBE CONTRACT OPERATIONS EXPENSE.

A.

A. Confluence Rivers does not employ water or sewer field operations staff but instead contracts with professional third-party water and sewer operations and maintenance companies. These contractors are managed by an employee of CSWR who is assigned to Missouri. This model provides the ability to expense operations and management costs in a direct manner that does not require further allocation methodologies. Since these costs are incurred exclusively for Confluence Rivers, they are directly assigned to Confluence Rivers. Similarly, operations and management costs for other utility subsidiaries are assigned exclusively to that subsidiary. Confluence Rivers' process for operating and maintaining its properties using outside contractors is discussed in greater detail in the direct testimony of Company witness Todd Thomas.

# Q. IN HIS TESTIMONY, MR. THOMAS INDICATES THAT A REQUEST FOR PROPOSALS ("RFP") HAS BEEN RECENTLY COMPLETED FOR O&M PARTNERS IN MISSOURI. HAVE YOU INCORPORATED THE RESULTS OF THAT RECENTLY COMPLETED RFP?

Yes. The RFP process was completed in December 2022 and new contracts have been executed. The reduced operations costs that flowed out of the RFP process have been passed through to the customers' benefit as a known and measurable expense in this case. Thus, the magnitude of the rate increase in this case is lower than it would have been just a month ago.

### Q. HOW DOES CSWR ALLOCATE JOINTLY BILLED COSTS?

A. CSWR, as the managing entity for its various operating utility subsidiaries, is sometimes able to negotiate agreements on behalf of its subsidiaries that reflect economies of scale and administrative efficiencies each individual affiliate could not achieve on its own. The Company refers to these charges as jointly billed charges. Examples include insurance costs and certain software costs. When this situation occurs, CSWR identifies the cost drivers related to the incurred service and directly charges that cost to its utility operating subsidiaries consistent with those cost drivers.

### 8 Q. PLEASE DESCRIBE THE INCLUDED INSURANCE EXPENSE.

9 A. Property, general liability and environmental liability insurance coverage is provided 10 to Confluence Rivers and other utility subsidiaries as part of a single policy held by 11 CSWR. The policy is billed to CSWR but covers all the regulated utility subsidiaries 12 owned by CSWR. Procuring a combined policy creates cost efficiencies and results in 13 better coverage than might otherwise be obtained should each utility operating 14 company seek an individual policy. The costs for the policy coverage are allocated to 15 Confluence Rivers and each regulated utility subsidiary based on the replacement 16 values of covered assets.

### Q. PLEASE DESCRIBE OVERHEAD ALLOCATION EXPENSE.

17

18

19

20

21

22

23

24

A.

Costs that cannot be directly charged to the operating subsidiaries are considered indirect charges. For instance, certain general and administrative expenses are allocated to Confluence Rivers and other operating subsidiaries from their parent CSWR. These expenses support the operations of all operating subsidiaries, including Confluence Rivers, and include the cost of services such as executive management, legal, accounting, human resources, customer experience and other business services. These shared administrative expenses allow Confluence Rivers and its component

systems to benefit from the cost efficiencies and shared expertise of a larger organization that otherwise would not be available to a company like Confluence Rivers.

CSWR uses a three-factor formula to allocate general and administrative costs to its subsidiaries. The component factors of the allocation formula are operating expense, customer count, and utility plant in service ("UPIS"). These factors correspond to the significant drivers of general and administrative expense that CSWR incurs for its affiliates. For example, a higher level of operating expense in a particular subsidiary would naturally require more time and higher expense at the corporate level to perform the necessary accounting procedures to track costs and ensure timely payment of vendors. Similarly, a larger number of customers at a particular subsidiary would result in more management time, and the associated compensation expense, devoted to that subsidiary from groups like the Customer Experience staff. Calculation of the three-part Overhead Allocation is reviewed at the end of each fiscal quarter by CSWR management. For the expense included in this filing, the total allocated overhead expense during the test year was determined using the actual cost incurred by CSWR for the period and adjusted for known and measurable items.

## Q. HAS CONFLUENCE RIVERS INCLUDED ANY COSTS ASSOCIATED WITH CHARITABLE OR CIVIC CONTRIBUTIONS, LEGISLATIVE-ADVOCACY EXPENSES OR POLITICAL/PROMOTIONAL ADVERTISING?

A. No. Confluence Rivers has not included any costs related to donations, lobbying activities or political/promotional advertising.

1	RATE BASE
---	-----------

### 2 Q. WHAT ARE THE COMPONENTS OF RATE BASE INCLUDED IN THIS

- 3 FILING?
- 4 A. Major components of rate base include:
- 5 Utility Plant in Service
- 6 Accumulated Depreciation
- 7 Working Capital Allowance
- 8 Contributions in Aid of Construction ("CIAC")
- 9 Rate Case Expense
- Each of the major components is described in the testimony below.

### 11 Q. PLEASE DESCRIBE UTILITY PLANT IN SERVICE ("UPIS").

12 A. UPIS includes the original cost of acquired systems along with acquisition-related 13 expenses and post-acquisition improvements necessary to provide safe and reliable 14 sewer and water services. The UPIS calculation begins with the acquisition date asset 15 values, the accounting process for which is described in the following section, and 16 acquisition-related expenses. UPIS in this filing includes asset values for all systems 17 that have been acquired as of December 31, 2022. In addition to these acquisition 18 values, the cost of post-acquisition improvements that were completed and in use and 19 useful as of December 31, 2022, have been included. The total balances of UPIS for 20 water and sewer as of June 30, 2022, are \$11,578,568 and \$17,065,293, respectively. These values have been adjusted to include the acquisitions of Glenmeadows and Deer 21 22 Run. The calculations are shown in **Schedule BT-5.1** for water and **Schedule BT-5.2** 23 for sewer.

### 1 Q. PLEASE DESCRIBE THE CALCULATION OF ACCUMULATED

- 2 **DEPRECIATION.**
- 3 A. Accumulated depreciation consists of the historic total of UPIS depreciation to date.
- Where available, the balances in accumulated depreciation that were associated with
- 5 assets acquired by Confluence Rivers from the prior owners have been carried forward
- on the books of Confluence Rivers. Assets that Confluence Rivers has subsequently
- 7 placed into service have been depreciated according to the rates shown on the schedules
- 8 found in the testimony of Company witness Ned Allis. The values for accumulated
- 9 depreciation that are included in rate base are based on life to date depreciation of UPIS
- placed into service as of December 31, 2022, and total \$2,605,567 for water and
- \$4,920,163 for sewer. The calculations are shown in **Schedule BT-6.1** for water and
- 12 **Schedule BT-6.2** for sewer.

15

16

19

20

21

22

23

24

### 13 Q. HOW DID YOU CALCULATE THE CASH WORKING CAPITAL

### 14 ALLOWANCE IN THIS CASE?

A. Cash working capital is the capital that is required to bridge the gap from when cash is

paid for expenses necessary to provide safe and reliable service and when cash is

17 received from customers for that service. As such, cash working capital is included in

rate base and permitted to earn a return. This amount of required capital must be

supplied by investors as part of their investment. While known methods, such as a

lead/lag study, are used to calculate the working capital allowance, Confluence Rivers

has opted to use the 45-day convention, also known as the 1/8 convention. Many

jurisdictions use a 45-day convention to produce a reasonable working capital

adjustment without the need to conduct an expensive lead/lag study. According to

Hahne and Aliff, "[t]he wide acceptance of the 1/8 formula resulted from the fact that

it was determined to be a reasonable estimate of what a lead-lag study would produce without the related expense of a lead-lag study..." This convention multiplies the operating expenses (excluding depreciation, overhead allocation and taxes) by 45/365 to produce a working capital amount to be included in rate base. The Company has used the 45-day convention to calculate the \$112,772 and \$186,385 cash working capital amounts for water and sewer, respectively. These amounts are included in the rate base calculation. The Working Capital calculation is shown in **Schedule BT-9.1** for water and **Schedule 9.2** for sewer.

### Q. PLEASE DESCRIBE CIAC IN RATE BASE.

A.

CIAC reflects property or money received from third parties related to the establishment of service. For ratemaking purposes, it is not considered to be investor supplied capital. Therefore, Confluence Rivers is not permitted to include this amount in rate base and earn a return on it. Confluence Rivers expects that it will receive CIAC from amounts paid for sewer and water tap-in fees related to development inside its existing service areas. Confluence Rivers' CIAC balances will be amortized as an offset to depreciation expense and the net amount of CIAC calculated as a reduction to rate base. The primary source of CIAC on the books of Confluence Rivers has resulted from customer tap fees. The net balance of CIAC that is included in the rate base calculation is \$286,702 for water and \$982,992 for sewer and is the balance on the Company's books as of June 30, 2022. The calculations are shown in Schedule BT-8.1 for water and Schedule BT-8.2 for sewer.

<sup>2</sup> Hahne, Robert L. & Aliff, Gregory E. (2021). "Accounting for Public Utilities, Vol. 1". LexisNexis. Pp. 5.04[1].

### Q. PLEASE DESCRIBE ANY RATE CASE EXPENSE THAT THE COMPANY HAS INCLUDED IN THIS FILING.

Outside of internal labor, the cost of which is allocated to the various subsidiaries as described above, the Company has incurred additional cost associated with contractor services, including the preparation of a depreciation study, a class cost of service study and a cost of capital witness, as well as outside counsel. It is my understanding that the Commission has allowed recovery of 100% of the cost associated with a depreciation study as rate case expense. On the other hand, the Commission has only allowed recovery of 50% of the other rate case expenses. The Company estimates that the total cost for the preparation and presentation of the depreciation study is \$38,750. Similarly, to date, the Company has received invoices for the remaining rate case expense of \$4,302. Company expects to true-up the rate case expense as invoices are received throughout this case. Applying the relevant sharing discussed above, the total rate case expense for which the Company seeks recovery is \$43,051. I proposed that this amount be amortized into rates over 3 years.

A.

A.

### **CONSOLIDATION OF MISSOURI ENTITIES**

### Q. PLEASE EXPLAIN THE CONSOLIDATION OF ALL OF CSWR, LLC'S MISSOURI OPERATING ENTITIES.

Prior to December 31, 2021, the service areas included in this rate case were divided among six separate operating entities. These entities were all utility operating subsidiaries of Confluence River's parent, CSWR, LLC. The six entities were Hillcrest Utility Operating Company, Inc., Raccoon Creek Utility Operating Company, Inc., Indian Hills Utility Operating Company, Inc., Elm Hills Utility Operating Company,

1		Inc., Confluence Rivers Utility Operating Company, Inc. and Osage Water Utility
2		Operating Company, Inc. The operating companies sought and received Commission
3		approval to merge all of these utility operating entities with Confluence Rivers Utility
4		Operating Company, Inc. Being the surviving entity
5	Q.	DESCRIBE THE FINANCIAL COMPONENTS OF THIS CONSOLIDATION.
6	A.	Upon consolidation of the entities, all assets and liabilities were transferred to
7		Confluence Rivers. This includes cash, receivables, payables, utility plant assets and
8		contributions in aid of construction (CIAC). As of the date of consolidation, all
9		revenues and expenses have been incurred in the name of Confluence Rivers.
10	Q.	HAVE THERE BEEN ANY FINANCIAL BENEFITS FROM THE
11		CONSOLIDATION?
12	A.	Yes. The consolidation of six companies into one allows for the immediate elimination
13		of some administrative costs. An example of such costs is tax preparation fees. Instead
14		of six federal and state returns, only one is now required. Fewer returns reduce
15		preparation costs and results in a savings of approximately \$8,750 based on 2021 costs.
16		Another example is fees associated with bank accounts. Each of the legacy entities
17		required its own bank accounts to collect payments from customers and remit payments
18		to vendors. These accounts carry base fees and upon consolidation, the number of bank
19		accounts can be reduced from twelve to two resulting in significant cost savings over
20		prior years.
21		
22		ACCOUNTING FOR ACQUISITIONS
23	Q.	WHAT IS THE ACCOUNTING TREATMENT THAT HAS BEEN USED IN
24		RECORDING HISTORIC ASSET VALUES AT ACQUISITION?

The methodology for determining the initial asset value for the Confluence River systems, as used in this case, fall within 3 different categories. The Company's determination of accurate net book values began with an examination of the historic values of acquired assets using books and records provided by prior owners, including the annual reports provided to the Commission, when applicable. Where these values were available in sufficient detail, they were the primary source of the information used to initially record the acquired assets. This is in keeping with the Utility Plant Instructions contained in the Uniform System of Accounts published by the National Association of Regulatory Utility Commissioners ("NARUC"). As it relates to an acquired system, the instructions state, "all amounts included in the accounts for utility plant acquired as an operating unit or system, shall be stated at the cost incurred by the person who first devoted the property to utility service."<sup>3</sup> Where detailed annual reports were available, Confluence Rivers adjusted the balances for any known and measurable changes, that have occurred since the annual report was filed, and used the adjusted values to create acquisition date accounting entries on its books.<sup>4</sup>

1

16

17

18

19

20

21

A.

In some of the acquisitions, no asset records were available from the prior owner. In other cases, the asset records obtained during the acquisition process lacked detail regarding the plant values at an account level. The asset records also did not include values for all the assets that were determined to be in use and useful by the utility system, primarily land and land values. In these cases, the Company sought to establish its reasonable estimate of net book value using depreciated original cost

<sup>3</sup> Uniform System of Accounts for Class A Water Utilities. 1996. National Association of Regulated Utility Commissioners, Washington, D.C. p. 20.

<sup>&</sup>lt;sup>4</sup> Please note that the known and measurable changes in this instance consisted primarily of adjusting the accumulated depreciation reserve by calculating depreciation expense between the date of the annual report used to obtain asset account balances and the date of acquisition.

1		studies and appraisals. Schedule BT-12 (confidential) provided with this testimony
2		summarizes the acquisition date rate base for each acquired system and denotes the
3		source of data relied upon to calculate that rate base.
4		<b>DEPRECIATION AND AMORTIZATION</b>
5	Q.	HOW WAS DEPRECIATION EXPENSE CALCULATED IN THIS CASE?
6	A.	Depreciation expense was calculated for the test year by multiplying forecasted UPIS
7		balances of each plant account, as of June 30, 2022, by the applicable life depreciation
8		rates proposed by Confluence Rivers. As mentioned previously, depreciation expense
9		is offset by the amortization of CIAC, which is also calculated by multiplying CIAC
10		balances by their corresponding amortization rate. For reasons discussed below,
11		Confluence Rivers proposes to use unified depreciation rates for future depreciation.
12		The schedule of rates is included in the testimony of Company witness Ned Alis.
13	Q.	HOW DID CONFLUENCE RIVERS ARRIVE AT ITS PROPOSED
14		DEPRECIATION RATES?
15	A.	The Company retained Gannett Fleming to conduct a depreciation study. This
16		depreciation study is presented and supported in the testimony of Ned W. Allis. The
17		Company used those recommended depreciation rates for purposes of calculating
18		depreciation expense in this case.
19		
20		INCOME TAXES
21	Q.	WHAT IS THE FEDERAL TAX CLASSIFICATION OF CONFLUENCE
22		RIVERS?
23	A.	Confluence Rivers is organized as a C-Corporation. The entity is required to file Form
24		1120 annually with the Internal Revenue Service.

1	Q.	HOW HAS CONFLUENCE RIVERS CALCULATED INCOME TAX IN ITS
2		REVENUE REQUIREMENT?
3	A.	The income tax rates used by Confluence Rivers are 21% for federal income and 4%
4		for Missouri state income. Income tax has been calculated by first calculating the
5		estimated equity return on rate base included in our revenue requirement and
6		multiplying that return by an Income Conversion Factor of 1.33.
7	Q.	WHAT IS THE GROSS INCOME CONVERSION FACTOR?
8	A.	Each dollar of equity return granted to Confluence Rivers also carries a tax
9		responsibility for both federal and state income tax. The Gross Income Conversion
10		Factor incorporates the federal and state tax rates, along with an allowance for bad debt
11		of 1%, into an income multiplier. The Income Conversion Factor used in this filing is
12		1.33 and its calculation can be found in <b>Schedule BT-11.1</b> .
13		
14		ACCOUNTING CONTROLS AND BUDGET PROCEDURES
15	Q.	PLEASE SUMMARIZE THE CORPORATE ACCOUNTING POLICIES FOR
16		CONFLUENCE RIVERS AND CSWR.
17	A.	CSWR and Confluence Rivers keep and maintain accounting records on an accrual
18		basis in accordance with GAAP in the United States. The Company uses the account
19		structure and procedures provided in the Uniform System of Accounts for Water and
20		Wastewater Utilities as published by NARUC. CSWR has obtained unqualified audit
21		opinions, based on GAAP, annually since 2015. These audits have included a review
22		of control procedures and the corporate control environment.
23	Q.	HOW ARE OPERATING BUDGETS FOR CONFLUENCE RIVERS
24		DEVELOPED?

A. The Company undertakes an annual budgeting process and proposes a budget to management in November of each year. Operating budgets are developed based on available data from prior periods which are adjusted for any changes to operations. For systems that have been owned and operated by Confluence Rivers, or any affiliate, the most recent monthly results are analyzed by internal accounting and finance staff. Once known changes have been incorporated, the operating budgets are sent to operations staff for review and adjustment. For systems that are expected to be acquired, budgets are set by examining the records available from prior owners, by comparing historic data from similar plants that are already owned and by incorporating any estimates obtained for contracted services. Once the operations team reviews, adjusts and confirms all amounts, the budgets are sent to management for review and approval.

A.

### 13 Q. IS THE COMPANY PROPOSING A CHANGE TO ITS ACCOUNTING FOR 14 PROPERTY TAX BASED ON RECENTLY PASSED LEGISLATION?

Yes. The Missouri General Assembly passed Senate Bill 745 in May 2022 allowing for the deferral of differences in property tax expenses into a regulatory asset or liability. As a result, the Company will create a regulatory asset or liability account and book any differences between the property tax approved in the cost of service as part of this rate case and any future property tax expense incurred above or below that level until the next rate case. The Company would include the regulatory asset or liability in rate base during its next rate case and begin amortization after that case.

### Q. HOW WILL THE COMPANY IMPLEMENT THE PROPOSED CHANGE TO ITS ACCOUNTING FOR PROPERTY TAX?

1	A.	The Company expects to true-up amounts and other information initially submitted for
2		this case during the course of the proceedings. This would include all property tax
3		payments made through the date of the true-up. The total expense will be requested for
4		recovery and would be the amount tracked against for the purposes of booking the
5		regulatory asset or liability.
6		
7		CONCLUSION
8	Q.	DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

9

A.

Yes.

### BEFORE THE PUBLIC SERVICE COMMISSION OF THE STATE OF MISSOURI

In the Matter of Confluence Rivers Utility Operating Company, Inc.'s Request for Authority to Implement a General Rate Increase for Water Service and Sewer Service Provided in Missouri Service Areas.  File No. WR-2023-0006 File No. SR-2023-0007
